examined under a glass discloses a most perfect winding, and it will be seen upon close inspection that each turn of wire when wound in this manner, compared with ordinary winding, occupies much less space and consequently permits of many more turns being obtained in the limited winding space, or with a desired number of turns these turns can be **crowded** or wound much **nearer to the core** than is the case with the ordinary wound magnet. They are now universally adopted by nearly all Telephone, Telegraph and Instrument Makers, and they are **cheaper** than an equivalent amount of single silk covered wire.

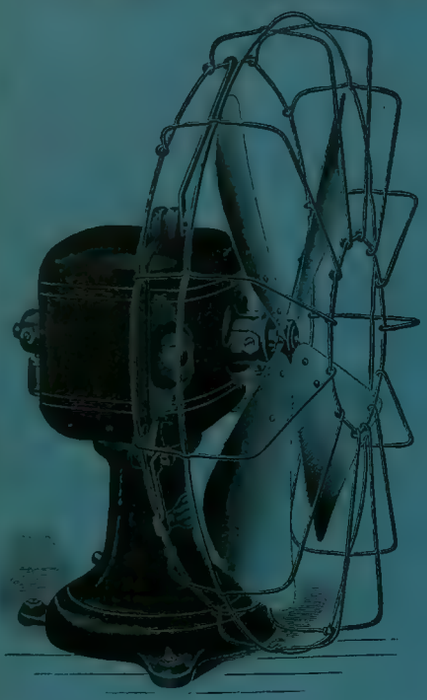
DIEHL DIEHL

OUR CEILING AND ELECTROLIER FAN



PATENTS

——SUSTAINED BY——

U. S. COURT'S

DECISION

MARCH 8th AND DEC. 5th, 1900.

Our fans appeal to users whose electricity is measured by meter, and the central station managers who furnish electricity at a fixed monthly rate.

A special feature in the design is that the two field cores are cast integral with one frame, making an unbroken magnetic circuit. The armature is built up of thin, soft iron, with slots in the periphery, cut accurately, for the reception and protection of the wire, which has double silk insulation. The commutator is made of hard drawn copper bars with mica insulation. The commutator bushing is secured to the steel shaft by a lock nut. The self-aligning bronze bearings are also self-oiling, having an improved self-feeding wick oil cup. The brush holders are unique in design, no wires are shown, and the carbon brushes are easily removed by unscrewing the fibre cap. The frame and supporting base have a smooth finish of enamel with suitable decoration. The blades, guards and trimmings are furnished in japan, nickel or brass, as ordered. Our Desk Fans are also made with universal joint by means of which the current of air can be directed as desired. When it is found desirable to permanently secure the fan it can be fastened by means of screws through the holes in the base.

A special feature of the Diehl Electrolier Ceiling Fan is the detachable basket which may be unscrewed from the fan without disturbing any of the wires, and by screwing on the basket makes connection with the lights automatically.

The Electrolier Fans are also run successfully with the motors on arc circuits and the lights on alternating system, as the two currents are kept entirely separate throughout and are thoroughly insulated.

The 5-light Electrolier Fan is furnished with etched shades, complete as shown, without lamps.

DIEHL MANUFACTURING CO.

SHOW ROOMS { NEW YORK, 561-563 Broadway. CHICAGO, 192-194 Van Buren St. BOSTON, 128-132 Essex St. PHILADELPHIA, W. Irwin Cheyney & Co.

MAIN OFFICE AND WORKS: ELIZABETHPORT, N. J.

DIEHL DIEHL

Roads Having Lines Extending

considerable distances beyond their power stations will do well to investigate the merits of *Storage Battery Sub-Stations.*

A Chloride Accumulator Sub-Station

is a "reservoir" located on a line—absorbing energy when the local consumption is light—giving forth this energy to the sections fed by it, at times when the service demand is above normal.

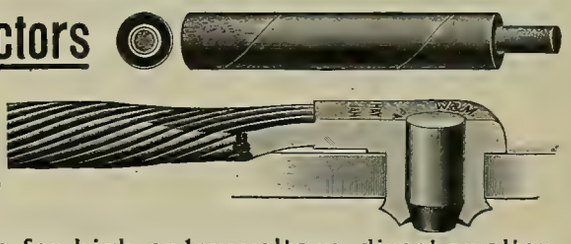
Many such Chloride Accumulator installations have been made. We will be pleased to advise you of results attained and saving effected and of the probability of our being able to assist your situation similarly.

THE ELECTRIC STORAGE BATTERY COMPANY,

19th Street and Allegheny Avenue, Philadelphia, Pa.

SALES OFFICES: NEW YORK: 100 Broadway; BOSTON: 60 State Street; BALTIMORE: Equitable Bldg.; CHICAGO: Marquette Bldg.; DETROIT: Michigan Electric Co.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

THREE IMPORTANT POINTS:

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN

are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels, not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours.
No alignment necessary.
Trims easier than an open arc lamp.
Allows easy access to every part of lamp.
Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

OUR TRADE FOLLOWS THE FLAG.

With the close of the year 1900, our business expansion kept pace with the country's commercial progress, and we enter upon the Twentieth Century with the confidence gained by the experience of the past, and with enlarged plans and a determined purpose to meet all the demands, which we expect will be greater than ever, on our sources of supply.

In entering on the New Year and New Century we continue to offer Okonite insulation, the standard of all insulations, which has been tried on land and sea, in the mine and in the air, and never has been found deficient. It never disappoints. The claims made for its superior and lasting qualities, if made for any other insulation, would be extravagant. It has no equal; there is no other insulation nearly "just as good," and it is the only safe insulation that should be used in a permanent installation, as it improves with age, as Lord Kelvin testifies in his report on tests made covering a period of years.

Okonite does not crack when exposed to the severest changes in temperature; it will not deteriorate when placed in lime or mortar; it is not affected when immersed in sulphuric acid; it will stand a greater amount of kinking and torsion without injury to the insulation than any other insulation.

There is more of it used than ever before. It is used in the operation of the telegraph, telephone, electric light, street railways, mines and automobiles, also in laboratory work. In submarine service it is pre-eminent.

Its familiar trade mark OKONITE TRADE MARK is known wherever the electric current flows.

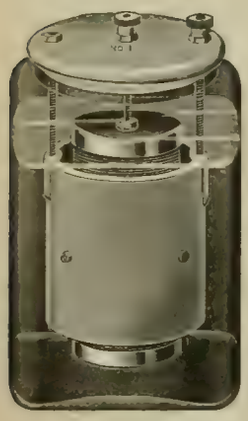
Nungesser Closed Circuit Batteries.



No. 1—SIZE 4½ x 4½ x 7½ in.

Our improved No. 1 300 ampere-hour Closed Circuit Battery is the most powerful battery of this class. It is put up in both glass and porcelain jars.

This battery is very largely used for telephone exchange service, central energy systems, gas and gasoline engine ignition, railway signals, etc.

The 1900 Dry Battery

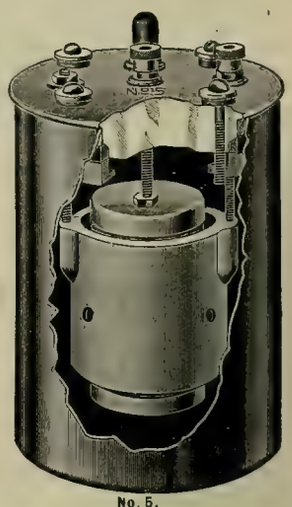
IS MANUFACTURED

Expressly for Telephone Exchange Service.

SIZE 2½ in. dia. x 6 in. high.

Our No. 5 Portable Closed Circuit Battery is the ONLY liquid TIGHT cell yet produced. It is most largely used for electric ignition on gasoline propelled automobiles and launches.

It has the greatest mileage capacity for its size and weight. It is put up in steel jars, with patented liquid tight porcelain covers, and is guaranteed superior to all others.



No. 5.

OUR PRICES ARE THE LOWEST.

In every comparative test made within the past four years, the 1900 Dry Battery has proven its superiority over all other dry or wet batteries. This battery has shown, in many of the most progressive telephone exchanges in this country, over three years' continuous service, without attention of any kind. They are now more largely used than all other dry or wet batteries combined.

MANUFACTURED BY

THE NUNGESSER ELECTRIC BATTERY CO.,

Western Sales Agent: THOMAS G. GRIER, 141 So. Clin'on St., CHICAGO, ILL.

CLEVELAND, OHIO, U. S. A.

THE GORDON PRIMARY CELL.

The most improved, efficient, long lived and economic primary cell of the new century.

Extensively used for telephone, telegraph, fire and police alarm service, railroad signal work, gas engine ignition and automobiles.

Manufactured in ten different styles.

Catalogue, price-list, etc., upon application.

THE GORDON BATTERY CO.,

13 and 15 Laight Street, New York.

UNITED STATES COMMISSION
TO THE
PARIS EXPOSITION OF 1900

PARIS 20 AVENUE RAPP | CHICAGO AUDITORIUM BUILDING | NEW-YORK EQUITABLE BUILDING

PARIS OFFICES. November 9 1900.

Ball Engine Company,

Mr. D. N. McBrier, Vice President,

Erie, Pennsylvania.

Dear Sir:

The end of the exposition having arrived I feel it my duty and privilege to inform you, officially, concerning the operation of the 300 h.p. tandem compound engine, which you supplied this department for the operation of the power generator at the United States Machinery Building at Vincennes. Our plant was the first of the entire exposition to be put in active service and since the starting of your engine we have never had a moment's shut down or the least difficulty which could, in any way, be traceable to your engine. It has operated noiselessly and continuously and has made many friends among the foreigners who have visited the plant . I must congratulate you upon the workmanship and execution, in all directions, of the engine, as was evidenced by the fact that we procured for you at the hands of the International Jury of Award a Gold Medal which is an exceedingly high honor for an engine of this size and class.

I must again thank you for your many courtesies, and the promptness with which you dispatched the engine.

Yours very truly,

F. E. Drake

Director of Machinery & Electricity

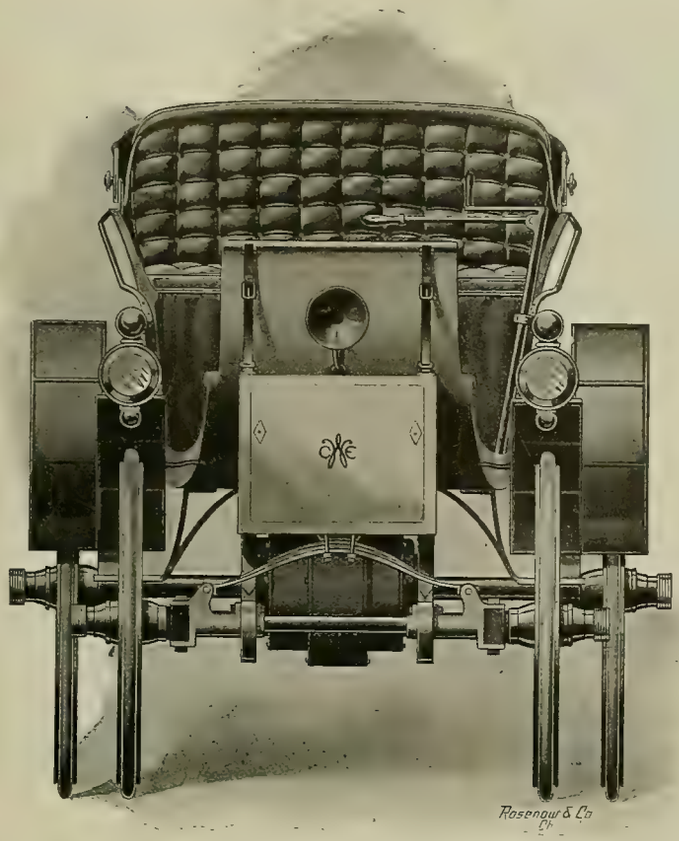
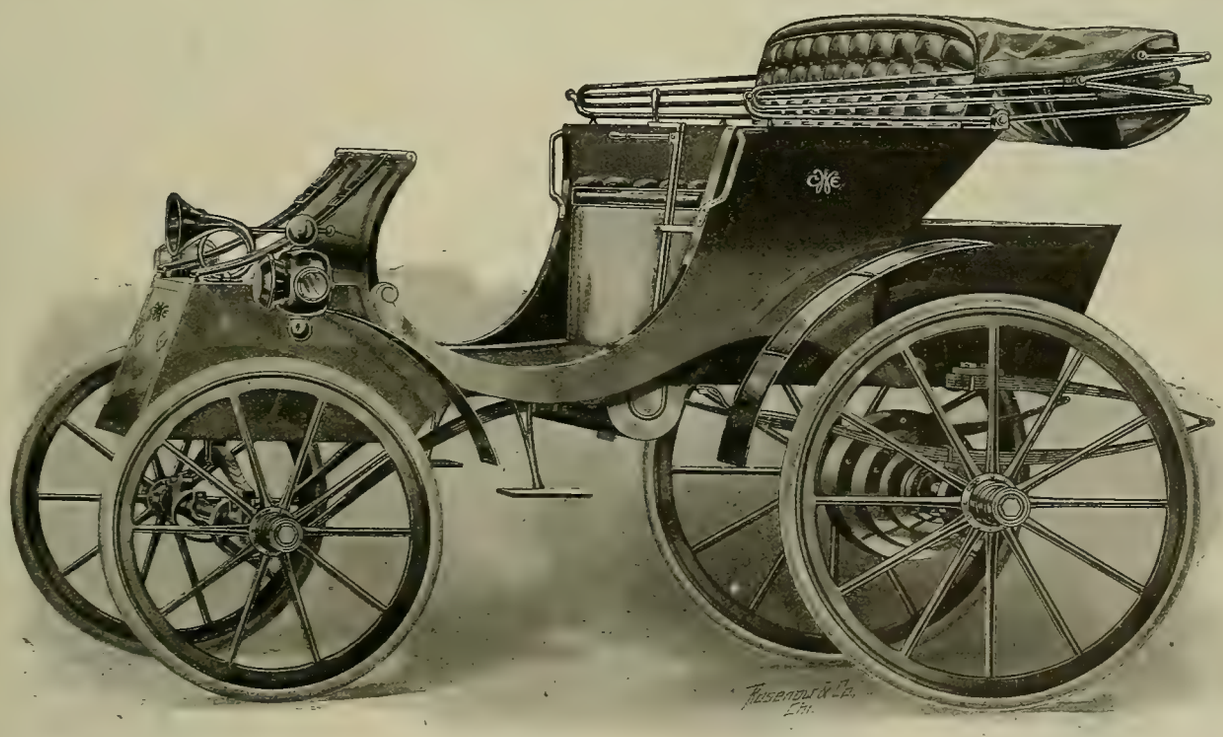
WE all believe that ELECTRICITY is the great power that DRIVES the wheels of PROGRESS—perhaps the wheels of Time; but we all know that Electricity drives the wheels of an Automobile more successfully than any other power that can be applied to them; but it did not feel at home in a "horseless carriage." It wanted the REAL THING—an AUTOMOBILE—in which to exhibit its best prowess, and

HERE IT IS

With every improvement in electrical, mechanical and carriage construction that science, long experience and absolute necessity have suggested, and the electricians of the world need no longer hesitate to own the foster child of their profession. Its entire conception and construction, mechanically and electrically, is as much of a departure from methods heretofore adopted as is its general design, and its operation is as pleasing to the purchaser as is the completeness of its appearance to the eye. All moving parts thoroughly protected in dust and waterproof casings. One electric and two friction brakes on every vehicle, giving as much comfort in hill coasting as in riding



CLINTON E. WOODS AUTOMOBILES.



on level roads. Forty miles on one charge of the batteries and an *absolute guarantee* of the vehicle in every particular. PRICES REDUCED. A GOOD THING for electric light and power companies to interest themselves in the sale of. THINK IT OVER. Responsible agents wanted everywhere. Address all communications to

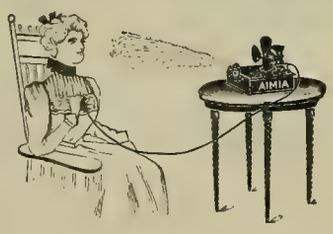
MY GOODS ARE WELL RECOMMENDED

BY EVERY PURCHASER,

THEREFORE YOUR TRADE WILL BENEFIT ALSO.



"AIMIA" VITALIZED AIR CIRCULATOR.

The "Aimia" Vitalized Air Circulator is an ideal one for the sick room, in winter or summer. It can be placed on a table and the invalid can start or stop the fan by pressing the button. It is noiseless and its refreshing coolness is of the greatet value.

A BLESSING for the bed room, serving room, office, store, telephone closet, dining table, etc. It may be used to deodorize toilet rooms by placing any desired deodorizer in front of the fan. The Dry Batteries (contained in the hardwood box) will run the fan many months without renewal, with the intermittent use it receives.

The battery can be renewed at a cost of only 50 cents.

Price, including a Bottle of Smelling Salts, Complete, $3.50.

"ODDO" MOTORS.

These Motors are the most perfectly constructed, carefully designed and best finished electric motors at the price, which are now in the market.

Construction allows all the magnetism generated to be turned into POWER, and this, in conjunction with the length of the arms of the armature (the magnetism going to extreme ends) brings into play the greatest of all applications of power, LEVERAGE.

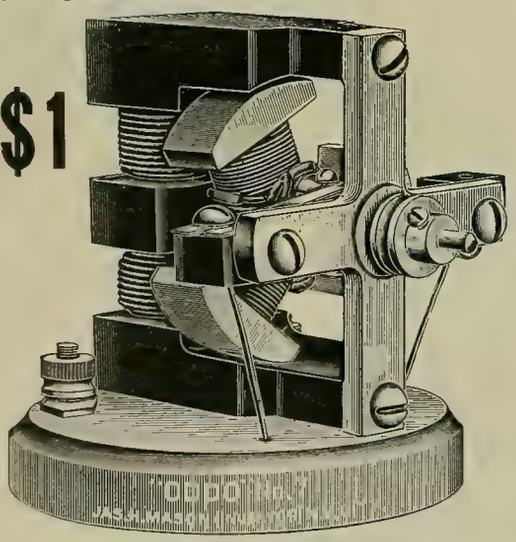
Being designed so that nothing is wasted, the combination of MECHANICAL AND ELECTRICAL LEVERAGE enables Mason's "Oddo" Motors to surpass any motors of equal size and weight, in power and neatness, beauty and efficiency.

They are finished in gold and black.

They can be operated by any good battery.

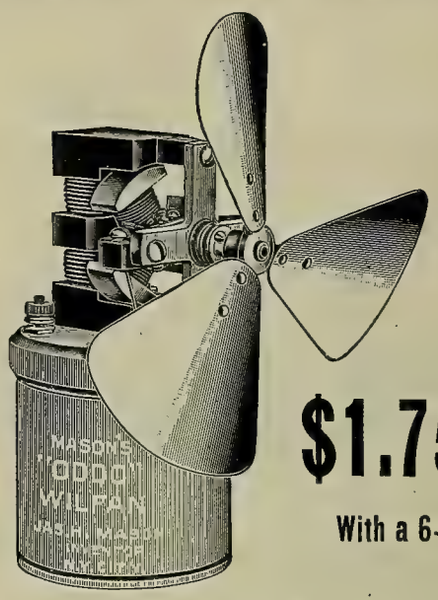
They are great savers of current.

$1



CUT IS FULL SIZE OF MOTOR.

This Motor has great power, is well made and nicely finished. A motor to operate sewing machines, $5.



$1.75

With a 6-inch Fan.

The stand is hollow and the space is intended to contain sand, bird gravel or any weighty substance. TO REDUCE COST OF MAILING CHARGES, the receptacle is always shipped empty, as purchaser can readily obtain the necessary weight.

This Outfit will run well for 25 hours with electric current from one cell of battery, such as I supply for $1 each.

Two cells will revolve fan over 2,000 times a minute.

A Dry battery of one or two CELLS will LAST for MONTHS when fan is only occasionally used for a minute or two.

A bottle of perfume or smelling salts placed in front of the revolving fan will refresh the air in parlors, bedrooms, etc., and sick-rooms can be deodorized and disinfected by substituting any good disinfectant, etc. (See vitalized air circulator.)

OUTFIT W. F.

CONSISTS OF

1 "WILFAN"	$1.75
1 Battery Type M	1.00
1 Double flexible conductor 7 feet long, which connects motor to battery	.50
5 Charges "Redalite"	.25
4 Extra Zincs, at 7 cents	.28
Boxing	.15
Total	$3.93

Each charge of "Redalite" will operate fan at fast speed for over 20 hours. Each zinc will last not less than 20 hours' work, so that COST OF A BREEZE with outfit W. F. is as follows:

Charge "Redalite"	5 cents
Zincs consumed	7 cents
Sulphuric acid less than	2 cents
Cost of over 20 hours' work (should get 30 hours)	14 cents.

Write for Trade Discounts, or I will Send Goods at the Right Prices, If Left to Me.

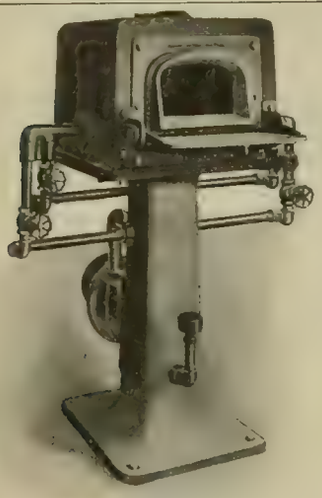
★ THE DESIGN & PLATES FOR COVER OF THIS ISSUE EXECUTED BY U.S. ★★★★



MAGNETS ARE GOOD

If they are properly heated, but did you ever think of the thousands of magnets that are ruined every day by being tempered in an open fire? The proper method of heating magnets is with a Stewart Gas Blast Furnace. You take no chances with it of getting the required temperature. You cannot go wrong. Every piece can be thoroughly heated. If you want to build up a big business on magnets by making them good and making lots of them, you must have a Stewart Gas Blast Furnace. There are several styles. You can be suited. Your magnets and tools of all kinds will cost you less to heat, and they will be heated right. No more guesswork. No use to put the blame on the steel man; the fault is in the heating. Increase your capacity. More pieces can be heated in one day with one of our furnaces and heated right than can be heated by the old method in three days. The furnace illustrated here costs but $85.00. We have others. Catalogue for the asking. We send furnaces on thirty days' trial. Shall we send you one?

4	35-light Gibbs, M. P., slow speed, comp., brand new.
1	50-light Hawkeye.
1	50-light Nowotny, self-oiler.
1	50-light Card, multipolar, self-oiler, slow speed, 1150 R. P. M.
1	50-light Crocker-Wheeler, slow speed, self-oiler.
2	55-light Gibbs, M. P., compound, brand new, moderate speed.
4	55-light Gibbs, M. P., compound, brand new, slow speed, 1100 R. P. M.
1	55-light Siemens & Halske, type B., M. P., slow speed, self-oiler, brand new.
1	60-light Thomson-Houston.
1	60-light Westinghouse.
1	80-light Siemens & Halske, type L. H., self-oiler, brand new.
2	80-light Siemens & Halske, ironclad type, M. P., self-oilers, brand new.
1	100-light Bain, compound, self-oiler.
1	100-light J. & C., self-oiler.
4	110-light Gibbs, M. P., compound, self-oilers, slow speed, brand new, 1000 R. P. M.
1	110-light Siemens & Halske, M. P., Churchward type, compound, extra slow speed, brand new, 650 R. P. M.
3	150-light Gibbs, M. P., compound, self-oilers, speed 1650.
1	150-light Gibbs, M. P., shunt, self-oiler, slow speed, 825 R. P. M.
1	160-light Card, self-oiler.
2	180-light Siemens & Halske, M. P., self-oilers, brand new.
1	200-light Western Electric, self-oiler, comp.
2	210-light Edison, self-oilers, 12 K. W.
4	210-light Siemens & Halske, 12 K. W.
2	210-light Siemens & Halske, M. P., brand new, type B., self-oilers.
4	210-light Gibbs, M. P., self-oilers, very slow speed, 725 R. P. M., brand new.
1	250-light Westinghouse.

110-Volt Incandescent Dynamos.—Continued.

1	250-light Commercial, comp., self-oiler.
1	250-light Eddy, self-oiler.
1	270-light General Electric, 15 K. W., M. P., direct-connected to Case engine, compound.
2	270-light Westinghouse, M. P., slow speed, 15 K. W.
1	300-light Columbian, multipolar, comp., self-oiler, slow speed.
4	300-light Gibbs, M. P., self-oilers, slow speed, 725 R. P. M., brand new.
1	340-light Eddy, self-oiler, compound.
2	350-light Hawkeye, compound.
1	350-light National, self-oiler, compound.
1	350-light Edison, 20 K. W., self-oiler.
6	350-light Siemens & Halske, type L. H., self-oilers.
1	360-light Duplex, multipolar, self-oiler, compound, slow speed.
3	500-light Siemens & Halske, type L. H., self-oilers, brand new.
4	540-light Edison, 30 K. W., self-oilers, compound.
1	600-light Eickmeyer.
2	700-light Westinghouse, 10 pole, slow speed, 40 K. W., self-oilers, 575 R. P. M., brand new.
2	800-light Edison, 45 K. W., self-oilers.
1	1200-light Siemens & Halske, type L. H., 70 K. W., self-oiler.
1	1350-light Siemens & Halske, Type I, 80 K. W., for direct connection, 8 pole.
3	1500-light Siemens & Halske, type L. H., self-oilers, 100 K. W.
1	1500-light Siemens & Halske, 100 K. W., type I., 6 pole, for direct connection, brand new.

220-Volt Generators.

Rheostat, base-frame and pulley accompany each machine.

1	8½ K. W. Westinghouse, multipolar, self-oiler.
1	9 K. W. Lundell, self-oiler.
1	10 K. W. Lundell, self-oiler, multipolar, slow speed.
1	12 K. W. Edison, self-oiler.
1	15 K. W. Edison, compound, self-oiler.
1	30 K. W. Siemens & Halske, M. P., ironclad type, self-oiler, brand new.
1	45 K. W. Edison, compound, self-oiler, new armature.
1	50 K. W. Siemens & Halske, M. P., Churchward type, self-oiler, brand new, for direct connection. 1 marble panel switchboard for above.
1	100 K. W. Siemens & Halske, M. P., Churchward type, self-oiler, brand new, for direct connection.

500-Volt Generators.

2	15 K. W. Edison, self-oilers.
1	15 K. W. T.-H., self-oiler.
1	35 K. W. Mather, self-oiler.
2	35 K. W. Siemens & Halske, brand new, M. P., Churchward type, self-oilers, very slow speed, 475 R. P. M.
1	45 K. W. Edison, compound, self-oiler.
1	75 K. W. Westinghouse, Kodak set, Westinghouse generator and Westinghouse compound engine, 14 x 24 x 14, all complete, fine.

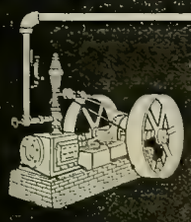
Alternating Generators.

1	350-light Thomson-Houston, A. 18.
1	600-light Thomson-Houston, A. 6.
1	600-light Thomson-Houston, 30 K. W., two-phase.
1	600-light Thomson-Houston, 30 K. W., slotted armature.
2	600-light General Electric, A. 30, toothed armature.
2	650-light Thomson-Houston, A. 35.
2	750-light Westinghouse, 37½ K. W.
1	900-light Warren, 45 K. W., 1100 volts.
1	1000-light Wood, 50 K. W., self-oiler.
1	1000-light Siemens & Halske, 50 K. W., self-oiler, 60 cycle.
1	1200-light National, with exciter.
1	1200-light Siemens & Halske, 60 K. W., Churchward type, brand new, 60 cycle, single-phase, 1100 volts, with exciter.
1	50 K. W. Siemens & Halske, Churchward type, brand new, 60 cycle, two-phase, rotary transformer, 1100 volts, alt. to 250 volts direct, complete, with marble panel switchboard.
1	1200-light Westinghouse, 60 K. W.
1	1200-light Thomson-Houston, 60 K. W.
1	1200-light Warren, 60 K. W., self-oiler.
1	1200-light General Electric, A. 60.
2	1300-light Thomson-Houston, A. 70, 1100 or 2200 volts.
1	1500-light Wood, 75 K. W., self-oiler.
1	1500-light General Electric, monocyclic, 75 K. W., self-oiler, 60 cycle.
1	1800-light National, 90 K. W.
1	4000-light Wood, 200 K. W., self-oiler.

Arc Dynamos.

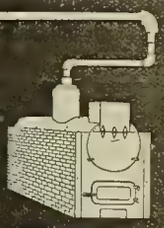
1	20-light 2000 C. P. Western Electric.
1	30-light 1200 C. P. T.-H., K. 12.
1	30-light 2000 C. P. Brush, No. 7.
2	35-light 2000 C. P. T.-H., L. D. 2.
1	35-light 1200 C. P. Wood No. 6.
3	40-light 2000 C. P. Western Electric, self-oilers.
2	45-light 1200 C. P. T.-H., M. 12, ball arm.
2	45-light 1200 C. P. Brush, No. 7.
1	50-light 1200 C. P. T.-H., L. D. 12.
1	50-light 2000 C. P. T.-H., M. D. 2.
2	60-light 2000 C. P. Western Electric, self-oilers.
1	60-light 2000 C. P. Westinghouse.
3	60-light 2000 C. P. Wood, No. 8.
1	65-light 800 C. P. Ball, 4 amp.
1	65-light 2000 C. P. Brush, No. 8.
2	75-light 1200 C. P. Wood, with new arm'e.
2	75-light 1200 C. P. Standard, self-oilers.
2	75-light 2000 C. P. Westing'se, self-oilers.
3	125-light 1200 C. P. Excelsior, latest type.

SEND FOR OUR MONTHLY BARGAIN SHEET WITH NET CASH PRICES ON DYNAMOS, MOTORS, TRANSFORMERS, METERS, STATION INSTRUMENTS, ARC LAMPS and SUPPLIES.



REBUILT MOTIVE POWER

THE LARGEST DEALERS ON EARTH



WE ARE HEADQUARTERS FOR REBUILT MOTIVE POWER. OUR MACHINERY IS ABSOLUTELY WARRANTED IN EVERY WAY. WE COVER ALL SALES BY A BINDING GUARANTEE. OUR STOCK IS THE MOST EXTENSIVE IN THE LAND.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE:

ELECTRICAL MACHINERY.

No. S145—Two T.-H. 500-light, 110-volt, direct connected.
No. S146—One 50-light Edison dynamo.
No. S147—One 25-light C. & C. dynamo.
No. S148—One 250-light Edison dynamo.
No. S149—One 100-light Rockford dynamo.
No. S150—Two 500-light T.-H. dynamos.
No. S151—One 150-light Eddy dynamo.
No. S152—One 100-light, 110-volt, Weston dynamo.
No. S153—One 250-light Hawkeye dynamo.
No. S154—One No. 8 T.-H., 75 K. W., 500-volt.
No. S155—Two type U. S. Westinghouse bipolar, 80 K. W., 350 revolutions, 550-volt.

ALTERNATORS.

No. S156—One 50 K. W., 1,000-volt, Westinghouse, complete with switchboard, exciter, one extra brand new armature for exciter, two field coils.
No. S157—One 500-light National, exciter on shaft.
No. S158—One 500-light T.-H. alternator, 1,000-volt.
No. S159—One 600-light T.-H., 2,040-volt.
No. S160—Two 25 K. W. Westinghouse alternators, 1,150-volt, 16,000 alternations, switchboard and instruments.

ARC DYNAMOS.

No. S161—25-light, 2,000 c. p. low tension, one extra armature for same
No. S162—Three 50-light, 2,000 c. p., T.-H.
No. S163—One No. 8, 60-light, arc, 2,000 c. p., Wood.
No. S164—One 80-light Western Electric dynamo.
No. S165—20-light, 2,000 c. p. Sperry, switchboard and instruments.

MOTORS.

No. S166—One 20 H. P., 500-volt, Ft. Wayne.
No. S167—One 3 H. P., 500-volt, T.-H.

ELECTRICAL SUPPLIES.

In connection with our purchase of the Omaha Exposition and the dismantling of buildings, we secure large quantities of Electrical apparatus and supplies. It is good material, and we ship nothing that is not practical for further use.

WIRE OF ALL KINDS.

Following is our list of good copper wire on hand:

RUBBER COVERED.

Gauge No.	Quantity feet.	Price per 1000 ft.
6	10,000	$ 27.00
4	10,000	37.00
000	8,000	125.00
0000	6,000	150.00

WEATHER-PROOF COPPER WIRE.

Gauge No.	Quantity feet.	Price per pound.
6	3,000	16c
1	2,000	15½c

COMBINATION RECEPTACLES.

1,500 Combination Receptacles, consisting of fuse rosette and socket, to be used the same as in ordinary fuse rosette, only has the sockets for inserting lamps.
Each $0.10

INCANDESCENT LAMPS.

The following lamps are warranted in good condition:

		Each.
6,000	16-candlepower Edison	10c
7,000	8-candlepower Edison	9c
1,000	4-candlepower Miniature	9c

KEYLESS SOCKETS.

A large quantity of Edison Porcelain Weatherproof Keyless Sockets. Second-hand, in good condition.
Price, each $0.08

PORCELAIN KNOBS.

Second-hand, but as good as new.
Prices, per thousand, No. 2..... $6.50
Prices, per thousand, No. 4..... 5.00
Prices, per thousand, No. 5..... 4.00
Prices, per thousand, No. 6..... 4.00
Also arc globes, incandescent lamp clusters, transformers, pony relays, rheostats, cut-outs, fuse boxes, carbons, switches, etc., etc.

ENGINES.

No. S81—One 3 H. P. Rochester Automatic.
No. S82—Seven 3 H. P.
No. S83—One 3 H. P. Marine.
No. S84—One 5 H. P.
No. S85—One 6 H. P.
No. S86—One 7 H. P.
No. S87—Three 8 H. P.
No. S88—One 8 H. P. Farquhar Portable.
No. S89—One 8 H. P. Davis & Rankin.
No. S90—One 10 H. P. Portable.
No. S91—One 10 H. P. Traction.
No. S92—One 10 H. P. Niles Horizontal.
No. S93—Four 10 H. P. Slide Valve.
No. S94—Four 10 H. P. Center Crank.
No. S95—One 10 H. P. Horizontal Davis & Rankin.
No. S96—One 10 H. P. Chartier.
No. S97—One 12 H. P. Slide Valve.
No. S98—One 12 H. P. Reversible.
No. S99—One 12 H. P. Traction.
No. S100—One 13 H. P. Center Crank.
No. S101—One 15 H. P. Compound.
No. S102—One 15 H. P. Slide Valve.
No. S103—One 16 H. P. Slide Valve.
No. S104—One 16 H. P. Stationary.
No. S105—One 20 H. P. Atlas.
No. S106—One 20 H. P. Portable.
No. S107—One 20 H. P. Slide Valve.
No. S108—One 20 H. P. Milburn.
No. S109—One 25 H. P. Westinghouse.
No. S110—One 25 H. P. Atlas.
No. S111—One 25 H. P. Slide Valve.
No. S112—One 25 H. P. Portable.
No. S113—One 30 H. P. Slide Valve.
No. S114—One 35 H. P. Automatic.
No. S115—One 40 H. P. Center Crank.
No. S116—One 40 H. P. E. P. Allis, Corliss.
No. S118—One 45 H. P. Rice Automatic.
No. S120—One 60 H. P. Westinghouse Standard Automatic No. 2026.
No. S121—One 68 H. P. Atlas.
No. S123—One 80 H. P. A. B. Farquhar Engine. Stroke, 34 in.; shaft, 6 in.; length, 6 ft.; D. W., 24 in., 7 diam.; bed style.
No. S124—One 80 H. P. Westinghouse Automatic.
No. S125—One 100 H. P. American Ball Automatic.

BOILERS.

No. S1—One 10x36 Horizontal Tubular, ½ front.
No. S2—Two 16x72 Horizontal Tubular.
No. S3—Three 21x44 Horizontal Tubular.
No. S4—One 24x48 Horizontal Tubular.
No. S5—One 26x44 Horizontal Tubular, 2 flue.
No. S6—Four 28x48 Horizontal Tubular.
No. S7—One 34x10 Horizontal Tubular.
No. S8—Three 36x10 Horizontal Tubular.
No. S9—Two 40x12 Horizontal Tubular.
No. S10—One 44x14 Horizontal Tubular, 30 3½-inch flues.
No. S11—One 44x14 Horizontal Tubular, 42 3-inch flues.
No. S12—Three 44x16 Horizontal Tubular.
No. S13—One 44x16 Horizontal Tubular, 28 4-inch flues.
No. S14—One 48x12 Horizontal Tubular.
No. S15—Two 48x14 Horizontal Tubular.
No. S16—One 48x14 Horizontal Tubular, Atlas D. R.
No. S17—Two 48x16 Horizontal Tubular, 40 3½-inch flues.
No. S18—Two 50x14 Horizontal Tubular, 40 3½-inch flues.
No. S19—One 54x14 Horizontal Tubular, 42 3½-inch flues.
No. S20—One 56x18 Horizontal Tubular.
No. S21—Two 60x14 Horizontal Tubular, O'Brien make.
No. S22—Two 60x14 Horizontal Tubular, 64 3½-inch flues.
No. S23—Two 60x16 Horizontal Tubular, 44 4-inch flues.
No. S24—One 60x16 Horizontal Tubular, 32 3-inch flues.
No. S25—Two 60x16 Horizontal Tubular, 63 2½-inch flues.
No. S26—Two 60x16 Horizontal Tubular, 56 3½-inch flues.
No. S27—One 66x14 Horizontal Tubular.

THE ABOVE IS ONLY A SMALL PART OF OUR LARGE STOCK OF REBUILT MACHINERY. OUR **CATALOGUE NUMBER 156** CONTAINS A COMPLETE LIST.

SEND FOR IT.

Chicago House Wrecking Co.

WEST 35TH AND IRON STS.

CHICAGO.

READY FOR NEW YEAR'S CALLS.

THE FOLLOWING IS PART OF OUR STOCK. **SEND FOR LATEST CATALOG.**

Direct-Current Dynamos. 110 Volts.

(Direct-Connected.)

2 100 K. W. Westinghouse, 8-pole, 225 R. P. M., direct-connected to McIntosh & Seymour compound engines.

Belted Dynamos. 110 Volts.

2 150 K. W. Edison bipolar.
4 60 K. W. Edison bipolar.
2 45 K. W. Edison bipolar.
3 30 K. W. Edison bipolar.
4 25 K. W. Edison bipolar.
2 20 K. W. Edison bipolar.
1 100 K. W. M. P., 4, Westinghouse.
1 45 K. W. M. P., 4 Westinghouse.
1 30 H. P. Westinghouse.
1 13½ K. W. M. P. Amer. Ball.
2 10 K. W. Edison bipolar.
1 500-ampere Onondaga.
1 25 K. W. Electro Dynamic.
1 45 K. W. General Electric, M. P., 850 R. P. M.

Arc Dynamos.

2 165-light, multi-circuit Brush, 1200 C. P.
2 125-light, latest type Fort Wayne, 2000 C. P.
2 125-light, brand new Excelsior, 2000 C. P.
2 125-light, multi-circuit Brush, 2000 C. P.
2 80-light, single-circuit Brush, 2000 C. P.
4 No. 8, 65-light, 2000 C. P., Brush.
10 50-light, 2000 C. P., T.-H., with ring armatures.

Alternators.

1 325 K. W. Siemens & Halske, 2000 volts, 7200 alternations, single-phase, 115 R. P. M.
1 300 K. W. Fort Wayne, 2000 volts, 7200 alternations, single-phase.
1 240 K. W. Westinghouse, single-phase, 1100 volts, 16000 alternations.
1 240 K. W. Stanley, two-phase, 380 R. P. M., with engines direct-connected.
2 300 K. W. Westinghouse, single-phase, toothed armatures.
1 150 K. W. Westinghouse, two-phase, 1100 volts, 600 R. P. M., 7200 alternations.
2 A-120 General Electric, single-phase, 1000 volts, 16000 alternations.
2 90 K. W. General Electric, single-phase, 1000 volts, 16000 alternations.
2 120 Westinghouse, single-phase, 1100 volts, 16000 alternations.
1 110 K. W. Fort Wayne, 2200 volts, 16000 alternations.
3 60 K. W. General Electric, single-phase, 1050 volts, 16000 alternations.
1 60 K. W. Stanley, 2000-1000 volts, two-phase, 7200 alternations.
1 75 K. W. Stanley, 2000-1000 volts, two-phase, 16000 alternations.
1 45 K. W. Westinghouse, 2200 volts, 16000 alternations.

Direct-Current Motors and Generators. 220 Volts.

(Direct-Connected.)

1 75 K. W. General Electric, direct-connected to Ideal engine.

(Belt-Driven.)

1 75 K. W. Siemens & Halske bipolar.
1 70 K. W. M. P. Siemens & Halske. New.
1 15 H. P. Excelsior bipolar.
1 10 H. P. Eddy bipolar.
1 5 H. P. Eddy bipolar.

Direct-Current. 500 Volts.

2 60 K. W. Edison.
1 50 H. P. M. P., General Electric.
1 30 K. W. C. & C. bipolar.
1 25 H. P. Eddy, M. P.
1 15 H. P. Eddy.
1 10 H. P. Eddy.
1 2 H. P. Cent. Elect. Co.

Railway Motors.

G. E. 800 S. R. G., 30.
G. E. 1000 W. P., 30.
G. E. 1200, W. P., 50.
Westinghouse 3.
Westinghouse 12A.
Westinghouse 38B.
K, K2 and K12 G. E. Controllers.
Westinghouse 38 and 49 Controllers, and a constantly changing stock of everything pertaining to street car equipment.

5 200 K. W. Railway Units, each consisting of a 200 K. W. Edison Generator belted to an 18½x18 Ideal Automatic Engine.

Railway Generators. 500 Volts.

1 500 K. W. M. P., 4, Gen. Electric.
2 111 K. W. M. P., 4, Westinghouse.
2 100 K. W. M. P., 4, Gen. Electric.
5 200 K. W. Edison bipolar.
2 150 K. W. Edison bipolar.
2 100 K. W. Edison bipolar
4 60 K. W. Edison bipolar.
1 100 K. W. Ft. Wayne.

Engines.

1 26 and 48x60 Cross Compound Geo. H. Corliss.
40x72 Corliss.
18x42 Allis.
16x25x15 Armington & Sims.
18½x18 Ideal.
16x16 Erie Ball.
14x13 Armington & Sims.
14x13 Watertown.
13x12 N. Y. Safety Power.
10x12 Watertown.

Boilers.

2 375 H. P. Sterling boilers.
2 175 H. P. Sterling Boilers.
2 200 H. P. National Water Tube.
2 42-inch by 16-foot Return Tubulars.
Boilers of various styles and sizes at low rates.

Street Cars.

Opened and closed, of all sizes, and for all gauges. Let us know your wants.

Rossiter, Mac Govern & Co.

Principal Offices, 141 BROADWAY, NEW YORK. **Factory, BROOKLYN, NEW YORK.**

625 "USED" OUTRIGGERS.

Complete with Windlass as shown in Cut.

Also 200 Miles No. 6 "Used" W. P. Copper Wire; 100 Miles No. 8 "Used" W. P. Copper Wire. 2,500 Arc Lamp Hoods, as shown in Cut.

This wire has all been thoroughly overhauled, the bad places in the insulation cut out and soldered and taped connections made where necessary. Write for prices if interested.

Seventh and Clark Avenue, ST. LOUIS.

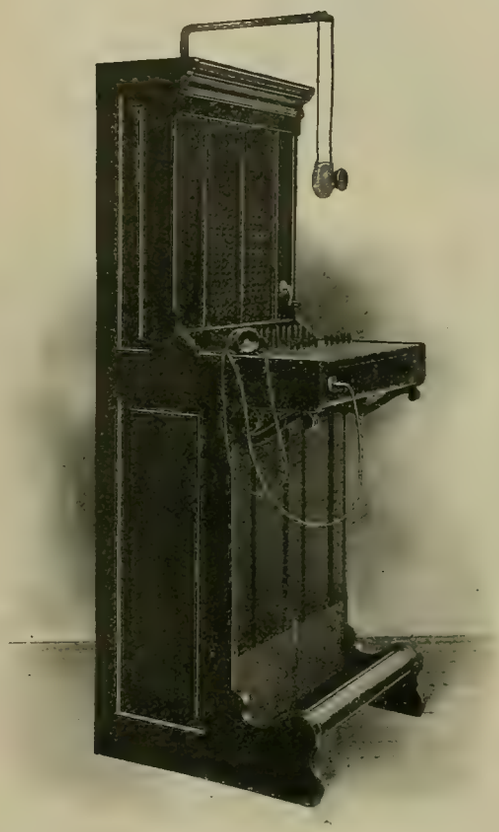
EVERYTHING ELECTRICAL.

KELLOGG SWITCH

MANUFAC

TELEPHONES, SWITCHBOARDS

FOR SMALL OR



Twenty Reasons Why the "KELLOGG EXPRESS" is the Best on the Market:

1. It has the simplest and most perfectly designed mechanically self-restoring drop ever produced.
2. It has an absolutely reliable night alarm.
3. The drops are of the well-known tubular type.
4. The drop and jack are rigidly connected together by a metallic mounting plate.
5. All parts are easy of access, and any single drop and jack can be removed without the use of a soldering iron.
6. The drop is entirely cut out of the talking circuit during conversation.

7. The drops and jacks are mounted five per strip, insuring rigidity.
8. The fronts of the drop and jack strips are of hard rubber, reinforced by heavy brass.
9. Clearing out drops are of the tubular type, high wound, and bridged across the cord circuit.
10. All drops and jacks are mounted in an iron frame.
11. The combined ringing and listening keys are the simplest ever manufactured, and have platinum pointed springs.
12. The plugs and cords stand wear.
13. The cabinet work is first class and of quarter-sawed oak.
14. The key shelf is hinged, and all panels are removable.
15. It is wired on the full metallic plan, and consequently is readily adaptable to common return or grounded circuits.
16. The operator's transmitter and receiver are adapted for long distance work.
17. All wiring is done with the best grade tinned copper wire, silk and cotton insulated, manufactured by ourselves.
18. All labor is done by skilled workmen, under the supervision of experts.
19. All material is the best obtainable.
20. All parts of the switchboard are absolutely guaranteed.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S. Chicago, Ill.

Standard Electrical Dictionary.

BY PROF. T. O'CONOR SLOANE.

Author of "Arithmetic of Electricity," "Electricity Simplified," "Electric Toy Making," Etc.

682 Pages, 393 Illustrations. Handsomely bound in cloth, 8vo, $3.

An Entirely New Edition, Brought Up to Date and Greatly Enlarged.

COMPLETE—CONCISE—CONVENIENT.

In publishing the "Standard Electrical Dictionary," the author has adhered to what the work purports to be, exhausting the subject of electrical terms, giving each title the clearness of explanation necessary to make the understanding of it complete without unnecessary elaboration. In this work, every electrical word, term, or phrase will be found intelligently defined.

A practical handbook of reference, containing definitions of about 5,000 distinct words, terms and phrases.

The work is absolutely indispensable to all in any way interested in electrical science, from the higher electrical expert to the everyday electrical workman. In fact, it should be in the possession of all who desire to keep abreast with the progress of this branch of science.

PART VII.

HISTORY AND BIBLIOGRAPHY OF ELECTRICITY.

(CONTINUED.)

Sturgeon, Wm. Scientific Researches, Experimental and Theoretical, in Electricity, Magnetism, Galvanism, Electro-Magnetism and Electro-Chemistry. 4to, cloth. Bury, 1850.....$15.00

Thompson, Silvanus P. Michael Faraday. His Life and Work. 12mo, cloth. Illustrations and Portrait. (Century Science Series.) New York, 1898.....$1.25

Uppenborn, F. History of the Transformer. Translated from the German. 12mo, paper. London, 1889.....$0.75

INDUCTION AND INDUCTION COILS.

Allsop, F. C. Induction Coils and Coil-Making. A Treatise on the Construction and Working of Shock, Medical and Spark Coils. With 118 illustrations. 12mo, cloth.....$1.25

Bonney, G. E. Induction Coils. A Practical Manual for Amateur Coil-Makers. 101 illustrations. 12mo, cloth.....$1.00

Induction Coils. How Made and How Used. Third American from Ninth English edition. 16mo, boards. New York, 1892. (Van Nostrand Science Series, No. 53).....$0.50

Norrie, H. S. Ruhmkorff Induction Coils, Their Construction, Operation, and Application. With Chapters on Batteries, Tesla Coils and Roentgen Radiography. 180 pages. Profusely illustrated.....$0.50

Page, C. G. History of Induction; the American Claim to the Induction Coil and Its Electro-Static Developments. In 3 parts. 8vo, paper. Washington, 1867. Rare.....$10.00

Trevert, Edward. How to Make and Use Induction Coils. 24mo, cloth.....$0.50

Wright, Lewis. The Induction Coil in Practical Work. Including Roentgen X-Rays. 12mo, cloth. New York, 1897.....$1.25

LIGHTNING AND LIGHTNING CONDUCTORS.

Anderson, R. Lightning Conductors; Their History, Nature, and Mode of Application. Third edition, revised and enlarged. 8vo, cloth.....$5.00

De Fonvielle, W. Thunder and Lightning. Translated from the French by T. L. Phipson. Illustrated. 12mo, cloth.....$1.00

Harris, W. S. On the Nature of Thunderstorms, and on the Means of Protecting Buildings and Shipping Against Lightning. 8vo, cloth. Illustrated. London, 1843. (Scarce.).....$5.00

Lightning Rod Conference. Report of the Delegates from the following Societies: The Meteorological Society, Royal Institute of British Architects, Society of Telegraph-Engineers and Electricians, and the Physical Society. With code of rules for the erection of Lightning Conductors, and various appendices. Edited by G. J. Symons, F. R. S. 8vo, cloth. Illustrated.....$3.00

Lodge, Oliver J. Lightning Conductors and Lightning Guards. A Treatise on the Protection of Buildings, of Telegraph Instruments and Submarine Cables, and of Electric Installations generally, from Damage by Atmospheric Discharges. 17 plates and numerous illustrations. 12mo, cloth.....$4.00

Parnell, A. Action of Lightning, and the means of defending Life and Property From Its Effects. 12mo. cloth. Illustrated.....$3.00

Spang, H. W. Practical Treatise on Lightning Protection. Giving complete and explicit instructions for the protection of buildings and explaining the defects of the lightning conductors now erected. 12mo, cloth. Illustrated.....$0.75

MEASUREMENTS, MEASURING INSTRUMENTS AND TESTING.

Anthony, William A. Lecture notes on the theory of electrical measurements. Prepared for the third year classes of the Cooper Union Night School of Science. 12mo, cloth. New York, 1898....$1.00

Badt, F. B., and Carhart, Prof. H. S. Derivation of Practical Electrical Units. 12mo, cloth.....$0.75

This is a very handsome book of sixty pages, printed on fine, heavy paper, with neat cloth binding. It contains Portraits and Biographies of Ohm, Watt, Faraday, Joule, Gauss, Weber, Sir William Siemens, Dr. Werner von Siemens, Volta, Ampere, Daniell and von Jacobi, together with a carefully prepared table of Practical Electrical Units, with their relative values. In no other single volume can this rare collection of portraits be found.

Carhart, Prof. H. S., and Patterson, Prof. G. W. Electrical Measurements. A Laboratory Manual. 8vo, cloth. Illustrated.....$2.00

Crapper, F. H. Practical Electrical Measurements. An Introductory Course in Practical Physics for Students and Young Engineers. 12mo, cloth. New York, 1897.....$0.75

Day, R. E. Exercises in Electrical and Magnetic Measurements with answers. Sixth edition. 12mo, cloth. London, 1893.....$1.00

Everett, J. D. Illustrations of the C. G. S. System of Units, with tables of Physical Constants. Fourth edition. 12mo, cloth. London, 1891..$1.25

This work was published in 1879 under the title of "Units and Physical Constants."

Fisher, H. K. C., and Darby, J. C. H. Students' Guide to Submarine Cable Testing. 8vo, cloth. Illustrated. London, 1897.....$2.50

Fisher, W. C. Potentiometer and Its Adjuncts. A universal system of Electrical Measurement. 8vo, cloth. New York, 1897. (Electrician Series.)..$2.25

The extended use of the Potentiometer System of Electrical Measurement will, it is hoped, be sufficient excuse for the publication of this work, which, while dealing with the main instrument, its construction, use and capabilities, would necessarily be incomplete without similar treatment of the various apparatus which, as adjuncts, extend the range and usefulness of the whole system.

Flather, J. J. Dynamometers, and The Measurement of Power. 12mo, cloth. New York, 1893.....$2.00

A Treatise on the Construction and Application of Dynamometers. Comprising Determination of Driving Power, Friction Brakes, Absorption and Transmission Dynamometers. Power to Drive Lathe. Measurement of Water Power.

Fleming, J. A. Electrical Laboratory Notes and Forms. Elementary and Advanced Series. 8vo, cloth. London, 1895.....$8.00

Gray, Andrew. Absolute Measurements in Electricity and Magnetism. Designed to give, as far as is possible within moderate limits, a clear account of the system of absolute units of measurement now adopted. Second edition, revised and greatly enlarged. Illustrated. Vol. I. 12mo, cloth.....$3.25

Vol. II, in two parts. Illustrated. 12mo, cloth.....$6.25

Gray, Andrew. Absolute Measurements in Electricity and Magnetism. Abridged edition for the use of students. 12mo, cloth.....$1.25

Gunn, Robert. The Arithmetic of Magnetism and Electricity; with numerous examples and exercises. Second edition. 16mo, cloth.....$1.00

Haskins, C. H. The Galvanometer and Its Uses. A Manual for Electricians and Students. Fourth edition, revised. 12mo, morocco. Illustrated....$1.50

Hering, Carl. Table of Equivalents of Units of Measurements. 12mo, paper.....$0.50

Hobbes, W. R. P. The Arithmetic of Electrical Measurements. With numerous examples fully worked. New edition. 12mo. cloth.....$0.50

Hoskiaer, Col. V. A Guide for the Electric Testing of Telegraph Cables. Third edition. 12mo, cloth.....$1.50

Houston, Prof. E. J. Electrical Measurements and Other Advanced Primers of Electricity. 169 illustrations. 12mo, cloth.....$1.00

Kempe, H. R. A Hand-book of Electrical Testing. Fifth edition. 200 illustrations. 8vo, cloth..$7.25

Kennelly, A. E., and Wilkinson, H. D. Practical Notes for Electrical Students. Vol. 1, Laws, Units and Simple Measuring Instruments. 8vo, cloth. London, 1890.....$2.50

Kohlrausch, Dr. F. Introduction to Physical Measurements with Appendices on Absolute Electrical Measurement, etc. Third edition, translated from the Seventh German edition, by T. H. Waller and H. R. Proctor. 8vo, cloth.....$4.00

Lockwood, T. D. Electrical Measurement and the Galvanometer; Its Construction and Use. Second edition. 12mo, cloth. Illustrated.....$1.50

Naber, H. A. Standard Methods in Physics and Electricity Criticised, and a Test for Electric Meters Proposed. 8vo, paper. Illustrated..$2.00

Niblett, J. T., and Ewen, J. T. Practical Instruments for the Measurement of Electricity. (In the press).....

Nichols, Edward L. The Galvanometer. A Series of Lectures. 8vo, paper.....$1.00

Nipher, Prof. F. E. Theory of Magnetic Measurements. With an appendix on the method of Least Squares. 12mo, cloth.....$1.00

Parker, H. C. Systematic Treatise on Electrical Measurements. Treats more particularly of methods used in laboratory, telegraph and cable testing. 120 pages. 100 illustrations. 8vo, cloth. New York, 1897.....$1.00

Price, Wm. A. A Treatise on the Measurement of Electrical Resistance. 8vo, cloth. New York, 1894.....$3.50

Reports of the Committee on Electrical Standards, appointed by the British Association. Revised by Sir W. Thomson and Prof. J. Clerk Maxwell. 8vo, cloth. London, 1873.....$3.75

Swineburne, Jas. The Measurement of Electric Currents.—Electrical Measuring Instruments. Meters for Electrical Energy. By C. H. Wordingham. Edited, with preface by T. Commerford Martin. Folding plate and numerous illustrations. 16mo, cloth.....$0.50

(Van Nostrand's Science Series, No. 109.)

Trevert, Edward. Electrical Measurements for Amateurs. 16mo, cloth. Illustrated.....$1.00

Contents: Electrical Units. The Measure of Resistance. Current Measurement. Potential Measurement.

Webb, H. L. A Practical Guide to the Testing of Insulated Wires and Cables. Illustrated. 12mo, cloth.....$1.00

Wormell, R. Electrical Units, with a Chapter on the Different Forms of Dynamos. 12mo, paper..$0.40

Yeaman, Charles H. Electrical Measurements and Instruments. A practical handbook of testing for the electrical engineer. (In press.)

MISCELLANEOUS.

Atkinson, Philip. Elements of Static Electricity, with full description of the Holtz and Topler machines and their mode of operating. Second edition. 65 illustrations. 12mo, cloth.....$1.50

Armstrong, Lord. Electric Movements in Air and Water, with Theoretical Inferences. With autotype plates. Imperial quarto. London, 1897.....$12.00

Aveling, Edward. Mechanics and Experimental Sciences. Magnetism and Electricity. 12mo, cloth.....$2.40

Bonney, G. E. Electrical Experiments. A Manual of Instructive Amusement. 144 illustrations. 12mo, cloth.....$0.75

Carhart's Physics for University Students. Part I. Mechanics, Sound and Light..$1.50

Part II. Heat, Electricity and Magnetism...$1.50

Carhart's & Chute's Elements of Physics. 382 pages. 298 illustrations.....$1.50

Chambers, Alfred B. Lee's American Automobile Annual. 274 pages. 105 illustrations. Many full page half-tones.....$1.50

All the Systems Clearly and Impartially Described and Illustrated. Rules and regulations concerning operation of automobiles.

Connor, D. E. Treatise on Electro-Magnetism. 12mo, cloth. Illustrated.....$0.50

Croswell, S. G. The Law Relating to Electricity, including telegraphs, telephones, electric lighting and electric railways. 8vo, law sheep. Boston, 1895.....$6.00

Diagrams of Electrical Connections, with Explanatory Text.....$0.50

Giving Direct Current Machine Windings, Arc Dynamo Connections, Description of New Brush Arc Light Machine, Series Distribution, Parallel and Three-Wire Distribution, Single Phase Alternators. Three-Phase Transmission, etc.

Du Moncel, Count. Electro-Magnets. The Determination of the Elements of Their Construction. 16mo, fancy boards. (Van Nostrand's Science Series, No. 64).....$0.50

Electric Illumination. Electrical Units, Measurements of Electrical Intensity. Voltaic Arc. Mechanical Production of Electrical Currents. Theory of Dynamo-Electric Generators. Magneto and Dynamo-Electric Generators, Conductors, Carbons, Arc Lamps, Jablochkoff Candle, Incandescent Arc Lamps. Incandescent Lamps. Chiefly Compiled from Engineering. By James Dredge, S. P. Thompson, Conrad W. Cooke, M. F. O'Reilly and H. Vivarez, with Abstracts of the specifications deposited at the Patent Office between 1837 and 1872, having reference to Electric Lighting. Prepared by W. Lloyd Wise. 886 pages, and 800 illustrations. Thick 4to, cloth.

Vol. 2.....$7.50

Vol. 1.....$15.00

(To be Continued.)

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

State your Head and send for 124 page pamphlet.
JAMES LEFFEL & CO., Springfield, Ohio, U. S. A.

DIXON'S BELT DRESSING

AND LEATHER PRESERVATIVE
Is guaranteed to prevent slipping and preserve the leather.

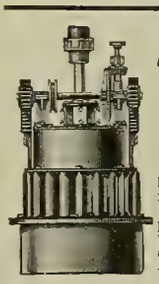
JOSEPH DIXON CRUCIBLE CO., - JERSEY CITY, N. J.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.
Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. THE BURT MFG. CO.,
AKRON, OHIO, U. S. A.
Largest Manufacturers of Oil Filters in the World.

RIGHT FROM THE START.

CLEVELAND, O., July 27, 1900.

The Burt Mfg. Co.,
Akron, Ohio:

Gentlemen:—In reply to your favor of the 25th inst., we beg to advise that immediately on receipt of the exhaust head shipped us recently, we put it into place, and it has given us entire satisfaction right from the start.

Yours respectfully,
THE ACME MACHINERY CO.,
D. R. DAVIES, Sec'y and Treas.

There's a simplicity, a certain satisfaction, that makes the

BURT EXHAUST HEAD

the best, most practical, most durable exhaust head on the market.

Can't we send one on approval at our expense?

THE BURT MFG. CO.,
AKRON, OHIO, U. S. A.
Largest Manufacturers of Oil Filters in the World.

L. L. CLINE ADV. AGT.

Clinton E. Woods Automobiles

Embrace entirely new ideas and designs based on an experience covering years in the construction of electric vehicles, and are **AUTOMOBILES**, not "horseless carriages." Send for catalogue and full particulars.

Woods, Waring & Company,

GENERAL OFFICES:

Suite 415-416 Steinway Hall, CHICAGO, ILL., U. S. A.

De Dion-Bouton "Motorette" Co.

ONE OF OUR LATEST MODELS IS THE

DE DION SURREY

We are the Sole Agents and Licensed Manufacturers in the United States for DE DION-BOUTON & CO., Puteaux, France. We build COUPES, HANSOMS, SURREYS, MOTORETTES, QUADRICYCLES and TRICYCLES.

A full line of the world-renowned De Dion Gasoline Motors is always in stock, and may be had from 1 3-4 H.P. to 5 H. P.

We carry a stock of supplies.

GENERAL OFFICES AND FACTORY: Church Lane and 37th St., Brooklyn, N. Y.

BRANCHES:

57 West 66th St., New York City. 306 North Broad St., Philadelphia, Pa.
Highland and Centre Aves., Pittsburg, Pa. 872 Park Ave., Baltimore. 24 Washington Square, Worcester, Mass.
196 West Exchange St., Providence, R. I. 33 Stanhope St., Boston, Mass.

THE McMULLIN Isolated Electric Lighting and Vehicle Charging Plant.

BECAUSE

The McMullin Hydro-Carbon (Gasoline) Engine

Has TWO CYLINDERS, one on either side of the crank shaft, and therefore perfectly balanced both in weight and in power, we warrant it to run a DYNAMO as steadily as a steam engine.

We furnish electric light or power plants complete, from two horse-power up. Two, four, six and fifteen horse-power plants always on hand. They are

Simple, Reliable, Durable, Economical,

Are easily operated, and they meet all requirements of the Board of Underwriters.

McMullin Engines Run Well Because They Are Honestly Made.

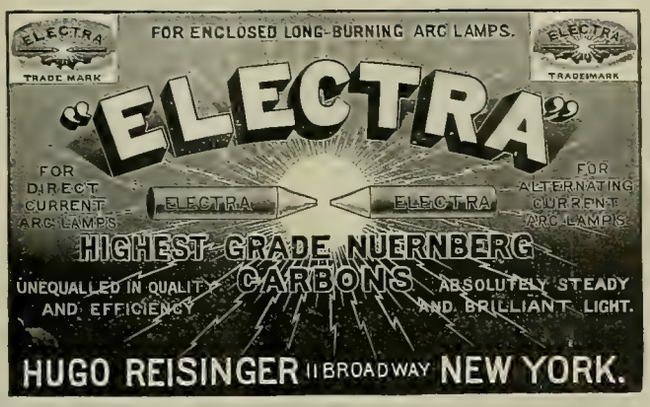
AGENTS WANTED. Write for Catalogue.

The McMullin Motive-Power and Construction Co.,

404-405 Royal Insurance Building,
CHICAGO, U. S. A.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

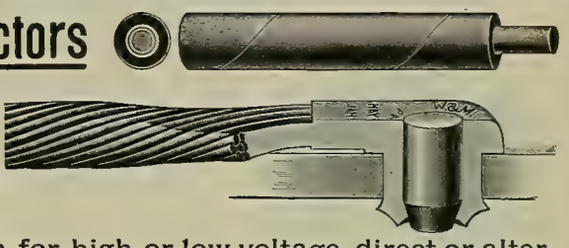
All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

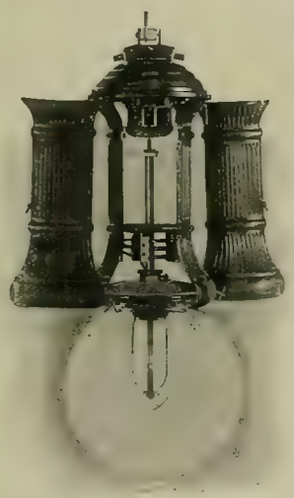
ARC LAMPS, KNIFE SWITCHES, GLOBES, FLUSH PUSH, AND SNAP SWITCHES, SHADES, CARBONS, RUBBER COVERED WIRES, CORDS AND CABLES, ELECTRIC LIGHTING SUPPLIES OF ALL KINDS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.



PERFECTION IN ARC LIGHTING

ATTAINED WHERE

"THE BELDEN SYSTEM" IS USED.

Among the many features which have made the Belden Arc Lamp so superior to any other, the following are particularly noteworthy:

It is long burning, simple, durable, mechanically and electrically correct. Trims easier than an open arc. Doesn't flicker. Needs no alignment, etc., etc.

A TRIAL ORDER will readily convince you of its superior qualities. Let us send you our bulletins.

OKONITE IT NEVER DISAPPOINTS

THE HYLO BABY FILAMENT LAMP

Has two light giving filaments, one large and one small, the large one giving out sixteen candles and the smaller, or Baby Filament, giving one candle of illumination. The change from the high to the low candlepower is brought about by turning the lamp in the socket. The mechanism which makes the change is part of the lamp itself, and is very simple.

It
- **Can be turned up and down—a simple twist of the wrist does it.**
- **Saves five-sixths of the light bill when turned down.**
- **Goes into any socket like a common lamp.**
- **Takes up no more room than a common lamp.**
- **Is made to fit the Edison, T.-H. and Westinghouse socket.**

Among the places where the Hylo may be used to advantage are theaters, lodge rooms, hospital wards, fireproof vaults, hotel halls and rooms, telephone booths, night lamps for office buildings, stores and factories.

State voltage and base in ordering.

Will mail sample on receipt of 75c. The trade supplied from stock.

SELLING AGENTS,

CENTRAL ELECTRIC COMPANY,

CHICAGO, ILLINOIS.

OKONITE IT NEVER DISAPPOINTS

A Substantial Christmas Present

which he never had before, but last January he

ADOPTED THE HOLLY SYSTEM,

utilized his exhaust steam (heretofore wasted) by selling it at three times its cost for general heating purposes, and thus secured his electric current at the station free of cost.

RESULT: $10,000.00 Extra Profit.

Our pamphlet explains our plan. Send for it.

A NEW CENTURY PLANT.

A new century plant can hardly afford to install cheap arc lamps. The Adams-Bagnall is a 20th century lamp. We recommend it—not because we sell it. We sell it because we can recommend it.

It is a simple and practical arc lamp.
We solicit a trial order.

Smith's Incandescent Lamp Adjusting and Controlling Devices.

Patented Oct. 16, 1900.

Now Ready for the Trade.

Simplest, neatest and handiest device for controlling lamp on end drop cord ever invented. It enables you to throw the light just where you want it. Adjusts your lamp up or down or throws reflection to side of room or at any angle. Weighs less than five ounces. Will hold on any size cord. Can be used where others would be impracticable. Made in various styles. Finished in brass, bronze, nickel, copper or black. Price of adjuster like cut, 75 cents. Mailed on receipt of price. Agents wanted everywhere. Send sample order. It's just what you have been looking for.

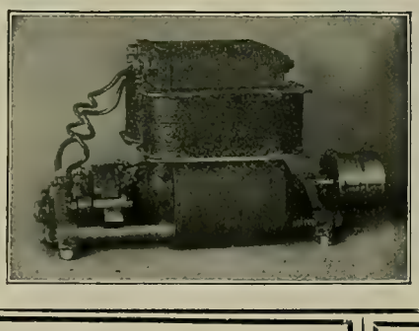
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

Write for Dynamo Circular No. 16.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. ***We guarantee it and if not satisfactory money will be refunded.***

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

XXVIII.—Harmonic Systems of Selective Signaling. XXIX.—Wire for Telephone Use. XXX.—Pole Line Construction. XXXI.—Overhead Cable Construction. XXXII.—Underground Cable Construction. XXXIII.—Testing. XXXIV. — Automatic Exchanges. XXXV. — Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

THE WARNER GENERATOR

The Greatest Invention of the Age.

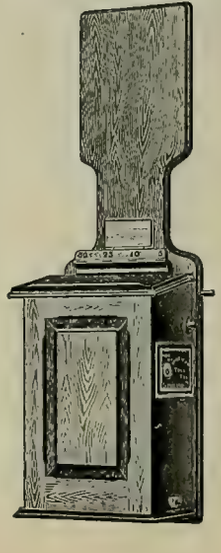
Start the Century right with the best system known.

All up-to-date telephone companies are using our ringer. As a reliable, safe and economical method of ringing, it is far superior to any other system. We have something interesting for you. Write to-day for our illustrated catalog and price-list.

We guarantee the best results with the least labor and expense.

WARNER ELECTRIC CO.,

MUNCIE, IND.



Sweet Simplicity.

What could be more simple in construction than the

American Toll Telephone Company's Automatic Telephone Pay Stations?

LOCAL AND LONG DISTANCE.

These machines are entirely mechanical, as we eliminate electricity from all machines of our manufacture.

ELECTRICAL PAY STATIONS HAVE NEVER HERETOFORE BEEN A SUCCESS.

Manufactured by

THE AMERICAN TOLL TELEPHONE COMPANY,

50 Sheriff St., Cleveland, O.

NATIONAL APPARATUS

Metallic Circuit Multiple Switchboards.

Positive Double Supervisory Signals. Central Energy. Simple and Mechanically Perfect. All Circuits Perfectly Balanced Electrically. Cost of Operation and Maintenance Reduced to a Minimum.

The Method of Operating that we have adopted has been determined upon, by long years of experience and practical operation by the very best telephone engineers, to be unexcelled.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."
160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.
Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

In a Street Railway Power Plant

A STORAGE BATTERY WILL TAKE THE PLACE OF all that generating machinery which is made necessary by the loads in excess of the average output. It will act absolutely instantaneously in regulating a violently fluctuating load. **Chloride Accumulators** have stood the test of years of service under variable conditions. Continued purchases by their largest users is the best evidence of their reliability, efficiency and economy.

Investigation is invited. Engineering advice at the service of those interested. Bulletins illustrating and describing various Chloride Accumulator installations upon request.

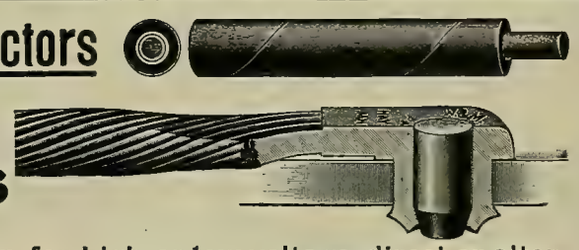
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

OKONITE IT NEVER DISAPPOINTS

THE HYLO BABY FILAMENT LAMP

Has two light giving filaments, one large and one small, the large one giving out sixteen candles and the smaller, or Baby Filament, giving one candle of illumination. The change from the high to the low candlepower is brought about by turning the lamp in the socket. The mechanism which makes the change is part of the lamp itself, and is very simple.

It
- Can be turned up and down—a simple twist of the wrist does it.
- Saves five-sixths of the light bill when turned down.
- Goes into any socket like a common lamp.
- Takes up no more room than a common lamp.
- Is made to fit the Edison, T.-H. and Westinghouse socket.

Among the places where the Hylo may be used to advantage are theaters, lodge rooms, hospital wards, fireproof vaults, hotel halls and rooms, telephone booths, night lamps for office buildings, stores and factories.

State voltage and base in ordering.

Will mail sample on receipt of 75c. The trade supplied from stock.

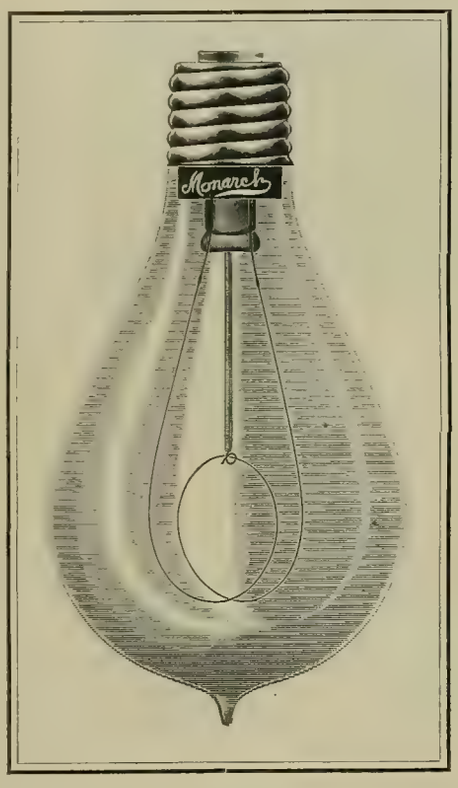
INCANDESCENT LAMPS.



MONARCH

Lamps are the most "up-to-date," Mechanically and Electrically perfect Lamp on the market to-day.

We Guarantee them Absolutely as for Efficiency, Sustained Candle-power, Current Consumption and Life.

WESTERN ELECTRICAL SUPPLY CO.,

EVERYTHING ELECTRICAL,

St. Louis, U. S. A.

FIFTY MILLION DOLLARS SAVED

Figure it out for yourself and remember that

"FIGURES DON'T LIE" ABOUT ECONOMY LAMPS

250 Other Lamps, at 17c	$42.50
250 "Economy" Lamps, at 13c.	32.50
SAVING	$10.00
Rebate on 250 Burned-out Lamps, at 3c.	7.50
Net saving, each bbl	$17.50

WORTH Saving, Isn't it?

Yes, they are renewed lamps and the saving effected is so great that the conservative buyer is naturally suspicious that we are not "Giving it to him straight"; therefore,

WE SEND ALL LAMPS ON SUSPICION.

Our manufacturing facilities are unexcelled. Cellulose Filaments are used in all Economy lamps and every lamp is chemically treated for vacuum. Economy lamps are equal to any high grade lamp in efficiency, maintenance of C. P. and life. We invite comparative tests.

TRY A FEW.

We are in the market for an unlimited number of burned-out lamps, particularly 10, 16 and 32 C. P. lamps T.-H. base. We pay highest prices for all lamps with platinum in-leading wires. Send us a list of your burned-out lamps and specify of what make.

THE ECONOMY ELECTRIC CO.,

WARREN, OHIO.

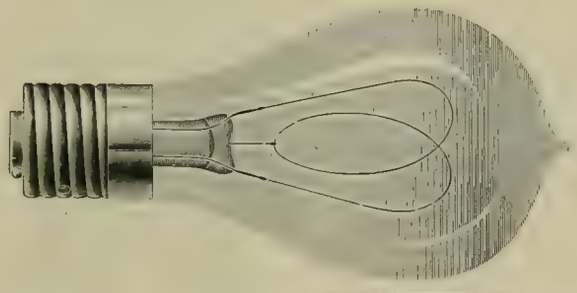
MANUFACTURERS ECONOMY INCANDESCENT LAMPS.

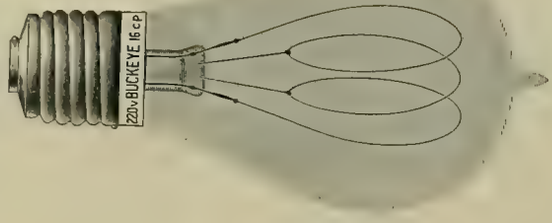
The "BUCKEYE"

A STANDARD Incandescent Lamp that has been upon the market for more than ten years and has always maintained its reputation for excellence.

The special cellulose filament used in this lamp is of our own manufacture. This filament does not greatly increase in brilliancy at the outset and then rapidly deteriorate, but it *maintains its candle power and efficiency* for an unusual length of time. This evenness of illumination will appeal especially to central station managers and to all consumers upon the meter basis.

Our Standard 3.5 Watt Filament is guaranteed to deliver an average 16 candle power illumination for an average burning period of 600 hours when operated within 2% of normal voltage.





. . A . .

220-Volt Lamp

That Meets ALL Requirements.

For the better accommodation of our Western trade we carry

50,000 LAMPS IN STOCK AT CHICAGO.

THE BUCKEYE ELECTRIC CO.,
FACTORY, CLEVELAND, O.
CHICAGO OFFICE, 1537 MONADNOCK BLDG.

THE "JANDUS"

STANDARD ENCLOSED ARC LAMP

MANUFACTURED FOR ALL SYSTEMS.

For the past six years the record of this lamp is, that for repairs the cost is less than can be shown by any other similar type of lamp. The Standard Lamp has the single solenoid. Not a rod, wheel or bit of complicated mechanism.

A factory expert never required. At our Chicago stock room lamp repairs are promptly made. A full line of parts, globes and carbons are carried. Catalogues and prices on application.

THE McMULLIN Isolated Electric Lighting and Vehicle Charging Plant.

BECAUSE

The McMullin Hydro-Carbon (Gasoline) Engine

Has TWO CYLINDERS, one on either side of the crank shaft, and therefore perfectly balanced both in weight and in power, we warrant it to run a DYNAMO as steadily as a steam engine.

We furnish electric light or power plants complete, from two horse-power up. Two, four, six and fifteen horse-power plants always on hand. They are

Simple, Reliable, Durable, Economical,

Are easily operated, and they meet all requirements of the Board of Underwriters.

McMullin Engines Run Well Because They Are Honestly Made.

97-99 Fulton Street, New York.

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN

are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

BELDEN-LARWILL ELECTRIC & MFG. CO.,

Smith's Incandescent Lamp Adjusting and Controlling Devices.
Patented Oct. 16, 1900.
Now Ready for the Trade.
Simplest, neatest and handiest device for controlling lamp on end drop cord ever invented. It enables you to throw the light just where you want it. Adjusts your lamp up or down or throws reflection to side of room or at any angle. Weighs less than five ounces. Will hold on any size cord. Can be used where others would be impracticable. Made in various styles. Finished in brass, bronze, nickel, copper or black. Price of adjuster like cut, 75 cents. Mailed on receipt of price. Agents wanted everywhere. Send sample order. It's just what you have been looking for.

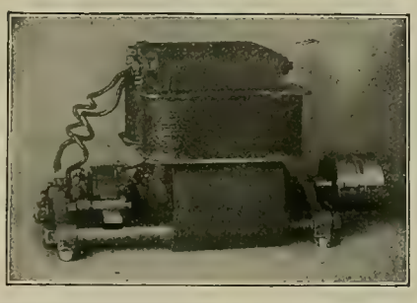
NEW FRANKLIN MODEL DYNAMO.


Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.
The change can be made from one winding to the other whenever desired.
Write for Dynamo Circular No. 16.

CREAM FLUX
AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.
Contains no acid or any element injurious to electrical connections.
ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.
YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*
THIS IS WHAT ONE USER HAS TO SAY OF IT:
"AFTER having tried the various soldering salts on the market, and after giving your **Cream Flux** severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,

CHAPTER I —History and Principles of the Magneto Telephone. II.—History and Principles of the Battery Transmitter. III.—The Telephone Receiver. IV.—Carbon Transmitters. V. —Induction Coils. VI.—Batteries. VII.—Calling Apparatus. VIII.—The Automatic Shunt. IX.—The Hook Switch, and Circuits of a Telephone. X.—Commercial Calling Apparatus. XI.—The Telephone Relay or Repeater. XII.—Self-Induction and Capacity. XIII.—Telephone Lines. XIV.—Simple Switchboards for Small Exchanges. XV.—Listening and Ringing Apparatus for Switchboards. XVI.—Self-Restoring Switchboard Drops. XVII.—Complete Switchboards for Small Exchanges. XVIII.—Lamp Signal Switchboards. XIX.—The Multiple Switchboard. XX.—Transfer Systems. XXI.—Common-Battery Systems. XXII.—House Systems. XXIII.—Protective Devices. XXIV.—Distributing Boards. XXV.—Party Lines Non-Selective. XXVI.—Party Lines. Step by Step Selective Signaling. XXVII.—Selective Signaling by Strength and Polarity. XXVIII.—Harmonic Systems of Selective Signaling. XXIX.—Wire for Telephone Use. XXX.—Pole Line Construction. XXXI.—Overhead Cable Construction. XXXII.—Underground Cable Construction. XXXIII.—Testing. XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

BRIDGING TELEPHONE

ON FAIRLY WELL CONSTRUCTED LINES WILL RING FROM 25 TO 35 TELEPHONES.

NOTICE THE GOOD POINTS:

The heaviest telephone generator made.
Wide cut gear.
Heavy cast bearings.
Silk wound armature.
Platinum contact hook switch.
Receiver has no exposed metal parts.
Finest adjustable arm in use.
Transmitter has heavy cast brass front.
Ringers 1200 or 1600 ohms' resistance.
Magnetos can be removed from backboards without cutting wires.
All connections soldered.
Two batteries.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

Herrick, A. B. Modern Switchboards. 221 pages. Illustrated. Philadelphia, 1898.....$3.00

Hertz, Heinrich. Miscellaneous Papers. With introduction by Prof. P. Lenard. Authorized translation by D. C. Jones, and G. A. Schott. Portrait. 8vo, cloth. London, 1896.....$3 25

The present volume consists mainly of the earlier investigations which Heinrich Hertz carried out before his great electrical researches. Hitherto they have been difficult of access, being scattered amongst various journals. The papers are for the most part arranged in the order of their publication.

Hopkins, Geo. M. Experimental Science, Elementary, Practical and Experimental Physics. 650 illustrations. Seventeenth edition. 8vo, cloth. New York, 1895.....$4.00

The leading principles of physics are illustrated by simple and inexpensive experiments, and most of the engravings are now for the first time employed in book illustrations.

Houston, E. J., and Kennelly, A. E. Electric Heating. (Elementary Electro-Technical Series.) 16mo, cloth. Illustrated.....$1.00

Houston, E. J., and Kennelly, A. E. The Interpretation of Mathematical Formulae.....$1.25

Houston, E. J. The Electric Transmission of Intelligence. 88 illustrations. 12mo, cloth....$1.00

Electricians will find these primers of marked interest from their lucid explanations of principles and the general public will find in them an easily read and agreeable introduction to a fascinating subject.

Jehl, Francis. Manufacture of Carbons.....$4.00

Journal of the Institution of Electrical Engineers. Published in parts. 8vo, paper. 1 to 118 now ready. Price varies. Price for complete sets on application.

Joyce, Samuel. Examples in Electrical Engineering. For the use of Engineers and Technical Students. With 40 diagrams and upwards of 50 problems fully worked out, and 150 with answers. 8vo, cloth. New York, 1897.....$1.50

Keasbey, E. Q. The Law of Electric Wires in Streets and Highways. 2d edition. 358 pages.....$4.00

Kent, Wm., M. E. The Mechanical Engineer's Pocket-Book. Fourth edition. A Reference Book of Rules, Tables, Data and Formulae, for the Use of Engineers, Mechanics and Students. 12mo, mor. N. Y., 1899.....$5.00

Lardner, D. Hand-Book of Electricity, Magnetism and Acoustics. New edition. By G. C. Foster. 400 illustrations. 12mo, cloth.....$2.00

Le Van, W. B. The Steam Engine and the Indicator; their Origin and Progressive Development, including the most recent examples of Steam and Gas Motors, together with the Indicator, its Principles, its Utility and its Application. Illustrated by 205 Engravings, chiefly of Indicator Cards. 8vo, cloth. Philadelphia, 1892.....$4.00

Le Van, Wm. B. The Practical Management of Engines and Boilers. 40 illustrations. 268 pages.....$2.00

Lieckfeld, G. Practical Hand-book on Gas Engines. With Instructions for Care and Working of the Same. Translated with permission of the author by Geo. Richmond. To which has been added full directions for the running of Oil Engines. 12mo, cloth. Illustrated.....$1.00

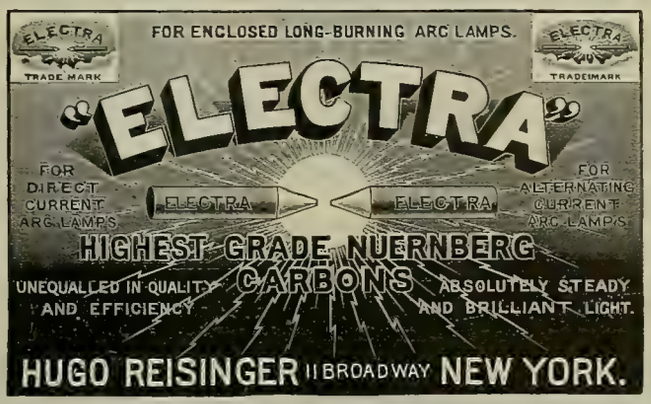
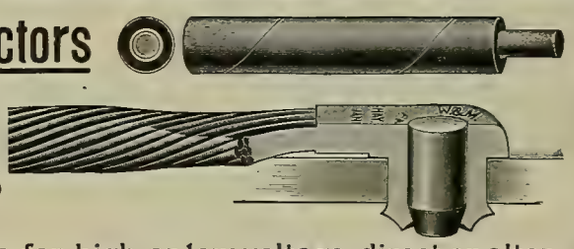
CARBONS CARBONS CARBONS

The "Electra" Carbons are the recognized standard all the world over.



There are no Carbons better than the "Electra" and none "just as good."

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

Worth Having!

STEVENS' MECHANICAL CATECHISM

PRACTICAL KNOWLEDGE
FOR
Stationary and Marine Engineers, Firemen, Electricians, Motormen, Ice Machine Men and Mechanics in General.

New and Original. All Modern Machinery fully described and explained. Technical Points made Clear by Word and Drawing. Questions and Answers for Civil Service Examinations, etc.

SUBJECTS TREATED:

WATER, STEAM, COMBUSTION, SMOKE PREVENTION, BOILERS, BOILER CONSTRUCTION, TESTING AND MANAGEMENT, SAFETY VALVES, INJECTORS, PUMPS AND GOVERNORS, STEAM GAUGES, LUBRICATORS, ENGINES, COMMON SLIDE VALVE, TANDEM COMPOUND, CROSS COMPOUND, RECEIVER ENGINES, HOT AIR AND COMPRESSED AIR ENGINES, TRACTION ENGINES, ELECTRIC ENGINES, AUTOMATIC AND CORLISS ENGINES, CONDENSERS, JET AND SURFACE, ECCENTRIC, BALANCED SLIDE VALVE, LINK MOTION, HORSE POWERS IN DETAIL, INDICATOR, REFRIGERATION, ABSORPTION AND COMPRESSION METHODS, BRINE AND DIRECT EXPANSION SYSTEMS, PUMPS, VALVES, TESTS, TABLES, AMMONIA, AMMONIA FITTINGS, LIQUID AIR, MACHINE SHOP PRACTICE, STANDARD NUMBERS AND RULES, PULLEY SPEED CALCULATION, SQUARE ROOT, LEVERAGE, ELECTRICITY, DYNAMOS, ACCUMULATOR, RHEOSTAT, TRANSFORMER, VARIETIES OF DYNAMOS, PARALLEL AND SERIES WIRING, THREE-WIRE SYSTEM, MANAGEMENT AND CARE OF ELECTRIC PLANT, REPAIRS, ELECTRICAL MEASUREMENTS, MOTORS, STATIONARY, TROLLEY AND THIRD RAIL SYSTEMS, CONTROLLER, ELECTRIC LOCOMOTIVE, ELECTRIC HEATING AND COOKING, HOUSE WIRING, DIFFERENTIAL GEAR, FRICTION CLUTCH, COMPOUND CYLINDERS, REVERSING GEAR, THE STACKER. ALSO, THE ELEMENTS OF ALGEBRA MADE EASY.

336 Pages. 240 Illustrations.

PRICE, $1.00. Sent anywhere prepaid on receipt of price.

JUST ISSUED.

MODERN ELECTRIC RAILWAY MOTORS.

BY GEO. T. HANCHETT, M. E.

FIRST PRACTICAL WORK ON RAILWAY MOTORS.

CONTENTS.—Chapter I.—Forms of Field Magnets. II.—Armature Winding Diagrams. III.—Field Coil Construction and Arrangement. IV.—Armature Construction. V.—Commutator and Brush Holder Construction. VI.—Motor Casings. VII.—Motor Suspensions. VIII.—Bearings and Gears. IX.—Lubrication. X.—General Dimensions and Data. XI.—Management and Repair. XII.—Railway Motor Design.

200 Pages. 157 Illustrations and Table. Price $2.00.

THIS is a book unique in its treatment of electric railway equipment. The first ten chapters are devoted to minute description of the details of electric railway motors that are in use to-day. Each organ of an electric railway motor is taken up in turn, described and illustrated by examples of present and past practice, and its operation explained in the light of practical experience. In short, the review of current practice is of such a nature as to bring out the reason why the electric railway motor is built as it is to-day. For example, field magnets of different types of motors are illustrated and compared, and their features of merit and faults pointed out. Armatures, armature windings, brush holders, suspensions and other details are similarly treated, each detail, however minute, being exhaustively considered. The last two chapters are devoted, one to the management and repair of electric railway motors, and the other to railway motor design, a complete design being worked out as an example. A table gives authoritative data of all types of railway motors in common use, both in America and Europe. **Sent postpaid on receipt of price.**

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG., CHICAGO.

THE GORDON PRIMARY CELL.

The most improved, efficient, long lived and economic primary cell of the new century.

Extensively used for telephone, telegraph, fire and police alarm service, railroad signal work, gas engine ignition and automobiles.

Manufactured in ten different styles.

Smith's Incandescent Lamp Adjusting and Controlling Devices.

Patented Oct. 16, 1900.

Now Ready for the Trade.

Simplest, neatest and handiest device for controlling lamp on end drop cord ever invented. It enables you to throw the light just where you want it. Adjusts your lamp up or down or throws reflection to side of room or at any angle. Weighs less than five ounces. Will hold on any size cord. Can be used where others would be impracticable. Made in various styles. Finished in brass, bronze, nickel, copper or black. Price of adjuster like cut, 75 cents. Mailed on receipt of price. Agents wanted everywhere. Send sample order. It's just what you have been looking for. **THEO. SMITH, Mfr.**

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

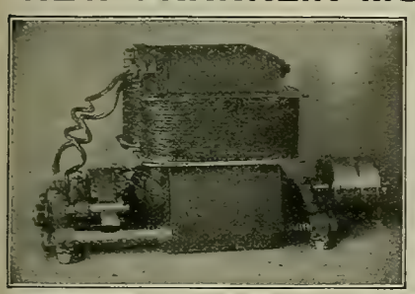
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

Just Published.

PRACTICAL Guide for Firemen,

By W. H. WAKEMAN.

Price 75 Cents.

80 pages, 14 illustrations, bound in cloth.

An elementary treatise relating to the care and management of Steam Boilers, Pumps, Injectors, etc., and Steam Plants generally. Containing complete instructions, and many valuable suggestions for the safe, practical, and economical management of the Steam Plant.

Especially intended for those who seek promotion, and aspire to be something more than a "Coal hustler," and for the benefit of Firemen and Engineers who do not "know it all" and who are willing to profit by the suggestions, etc., of "one who has been there."

In writing this book it has been the aim of the author to give the duties of the fireman, or the one in charge of a steam plant, in as simple and concise a manner as the subject and the English language will admit of; and to furnish all the information required to enable them to take charge of and operate a steam plant successfully and economically.

This wire has all been thoroughly overhauled, the bad places in the insulation cut out and soldered and taped connections made where necessary. Write for prices if interested.

W. N. MATTHEWS & BRO., 320 N. 6th St., ST. LOUIS.

NEW BOOKS.

AUTHORITIES ON SUBJECTS MENTIONED.

The Pocket Electrical Dictionary. Containing all of the words and definitions in the science. A new work. Indispensable to the electrician, student and professor. Over 11,000 words and about 15,000 definitions. By *Edwin J. Houston*, A. M., Ph. D. (Princeton). 1 volume, 32mo, cloth, **$2.50**; leather, **$3.00.**

Electricity Made Easy. Profusely illustrated. A hand-book for busy people. By *Edwin J. Houston*, A. M., Ph. D., and *Arthur E. Kennelly*, Sc. D. 1 volume, 12mo, cloth, **$1.50.**

Dynamo-Electric Machinery. By *Silvanus P. Thompson*, D. Sc., B. A., F. R. S. Sixth edition, revised and enlarged. Profusely illustrated with new engravings. 19 folding plates. 2 volumes, 8vo, cloth, gilt, **$6.00.**
The rapid advance of electrical science made it absolutely necessary to revise the last edition, and this is now a new work. It is indispensable to the electrical expert, professor and student of electrotechnics. Students and professors highly appreciate the publication of this extensive work in two volumes.

Polyphase Electric Currents and Alternate Current Motors.
By *Silvanus P. Thompson*, D. Sc., B. A., F. R. S. 1 volume, 8vo, cloth, gilt, **$3.50.**
The most important work on the subject. A companion book to "Dynamo-Electric Machinery." One of the text-books in schools of technology and colleges. Beautifully illustrated with fine engravings. Folding plates. Invaluable to the expert electrician.

Algebra Made Easy. By *Edwin J. Houston*, Ph. D., and *A. E. Kennelly*, Sc. D.
This little work is of special value to readers of Prof. Thompson's Dynamo-Electric Machinery and Polyphase Electric Currents, as the work has been written to explain in a clear and simple manner the equations contained in those works. 1 volume, 16mo, cloth, **75** cents.

The Interpretation of Mathematical Formulae. By *Edwin J. Houston*, Ph. D., and *A. E. Kennelly*, Sc. D. 1 volume, 12mo., cloth, **$1 25.**
A most valuable aid to students and electrical workers.

A B C of Electricity. Now approaching its 65th thousand. By *William H. Meadowcroft.* 1 volume, 12mo, cloth, **50** cents. Fully illustrated.
This excellent primary book has taken the first place in elementary scientific works. It has received the endorsement of Thomas A. Edison. It is for every person desiring a knowledge of electricity, and is written in simple style so that a child can understand the work. It is what its title indicates, the first flight of steps in electricity.

Scholars' A B C of Electricity. By *William H. Meadowcroft.* 1 volume, 12mo, illustrated, cloth, **50** cents.
The author of this work has designed it for the use of teachers and scholars. A large number of simple experiments have been added, with notes relative to the work. It is the primary book for school use.

The X Ray; or Photography of the Invisible and Its Value in Surgery. By *William J. Morton*, M. D. Written in collaboration with *Edwin W. Hammer*, 1 volume, 12mo, cloth and silver, **75** cents; paper, **50** cents.
The work explains in clear and simple style how these extraordinary pictures are taken through solids. Full description is given of the apparatus used, and the text is profusely illustrated with half-tone illustrations giving facsimile copies of the pictures taken from the negatives of the author. The subjects are varied.

The A B C of the X Ray. By *William H. Meadowcroft.* 1 volume, 12mo, cloth and gold, **75** cents.
The first primary work on the subject. A book for the people. The author of "A B C of Electricity" showed clearly in that work his ability to explain a technical subject for the laymen who know nothing of scientific terms. He has written this work about the X Ray in his usual clear and simple style, and a wide circulation of this useful book is assured. The text of the author is beautifully embellished with fine engravings, and nothing is omitted that will give the public a clear knowledge of this remarkable discovery of Prof. Röntgen. The public would do well to secure both these important works.

Sent Prepaid on Receipt of Price.

ELECTRICIAN PUBLISHING CO., 510 Marquette Bldg., CHICAGO.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill.

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

THE WARNER GENERATOR

The Greatest Invention of the Age.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator.—CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers, Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

ANNOUNCEMENT.

We beg to advise those interested in the purchase of ALTERNATING CURRENT MACHINERY that we are now prepared to receive orders for Alternating Current Generators and Motors of any size. Our machines will not be experimental, inasmuch as we have purchased the designs of the Oerlikon Co., of Zurich, Switzerland. This company was the pioneer in the development of Alternating Current Machinery abroad, and is to-day a leader in the field. We shall use the same care in the construction of our Alternating Current Machinery as we have in the Direct Current line, which we have been building for some years and which is to-day recognized as being of the highest possible grade.

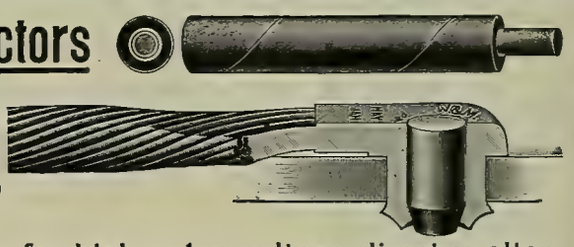
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

CEILING DIEHL FANS

STANDARD OF THE WORLD.

We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have absolutely demonstrated the superiority of Diehl fans, and the large and constantly increasing demand for them throughout this and other countries is one of the best recommendations for their adoption that we can offer.

Diehl fans are copied, but never equaled. They are without question the most perfect fans on the market. Electrically and mechanically perfect, attractive in appearance, splendidly finished, highly efficient, noiseless in operation, free from repairs—are some of their important features. Fourteen years' experience in the manufacture of ceiling fans assures perfection in all respects.

OUR CEILING AND ELECTROLIER FAN PATENTS SUSTAINED BY U. S. COURT DECISION.

Use or sale of infringements stopped by injunctions March 8th and December 5th, 1900.

We furnish two types of ceiling fans, two or four blades. We carry the largest line of designs and finishes to meet all possible requirements.

Cut illustrates ceiling fan No. 13 with switch. It has a very ornamental corona and basket, also switch controlling fan when operated on 110 or 220 volt circuits.

All standard fans wound for direct arc circuits of any amperage at same price as 110 volt. All ceiling fans have blades with 60-inch sweep.

Investigate the merits of Diehl fans before placing your orders.

97-99 Fulton Street, New York.

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

PACKARD LAMPS.

Think of it! The lamp is the point of consumption of the whole energy of your lighting circuit!
You may save a little—you may save a great deal by installing Packards.
Be it little or big, it is worth saving.
You can put in Packard lamps for just a trifle more on the first cost.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

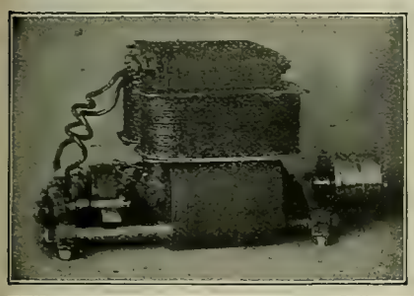
GASOLINE MOTORS AND SPARKING PLUGS.

NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

ELECTROLYSIS CONQUERED.

NEW PRICE FOR 1901.

ASPHALT PAPER CONDUIT

GUARANTEED TO STAND 50 VOLTS.

UNDERGROUND AND INTERIOR.

An absolute Non-Conductor. Guarantees perfect insulation. No bonding of cables in its use. Life of cable longer, construction cheaper and more rapid, using only ordinary labor. The better service obtained through it justifies its use. **Guaranteed Absolutely Electrolysis Proof.** Made in 7 foot lengths, 3 in. internal diameter. Weight, 2 lb. to foot. Made in desired sizes from 2 to 8 inches. Price, F. O. B. destination, cheaper than any conduit on market.

For prompt delivery for 1901, contracts should be placed at once.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

FORT WAYNE ELECTRIC WORKS.

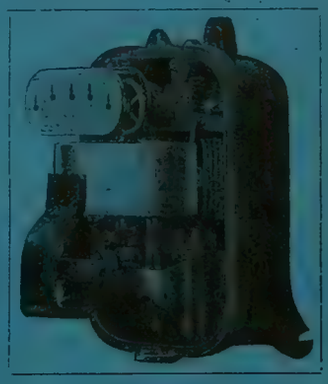
(INCORPORATED.)

SOMETHING NEW

Our TYPE K Integrating Wattmeter

Weighs less than 13 pounds and can be installed in a space 6¾ inches by 8¾ inches.

SOME INTERESTING POINTS.



This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.
It can be quickly Adjusted for Either HIGH OR LOW FREQUENCY.
No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.
CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.
ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

Write for Bulletin 1012.

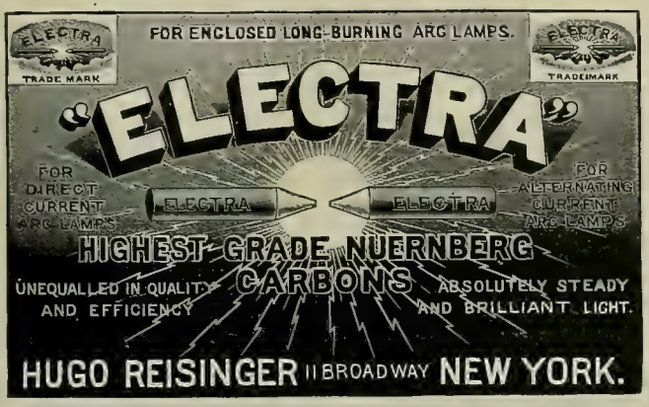
The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

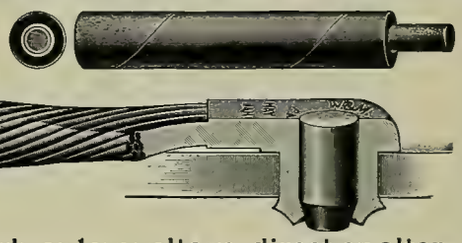
All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

OKONITE IT NEVER DISAPPOINTS

IN CHICAGO stock,

D. & W. Fuse Co.'s Combination Cut-Outs.

A FUSE, SNEAK-COIL AND ARRESTER COMBINED IN ONE. MOUNTED ON PORCELAIN. ACCURATE, POSITIVE AND LOW-PRICED.

WRITE FOR DESCRIPTIVE BULLETINS.

Central Electric Company,
SELLING AGENTS,
264, 266, 268, 270 Fifth Ave., CHICAGO.

STORAGE BATTERIES
FOR
CENTRAL STATIONS, STREET RAILWAYS AND ISOLATED PLANTS.

No Cast Plates. No Perforations. No Applied Paste. No Infringement.
HIGH EFFICIENCY. GREAT CAPACITY.
Superior Electrical Chemical Formation.

HELIOS-UPTON COMPANY,
PHILADELPHIA, PA.
CHICAGO, ILL.
PEABODY, MASS.

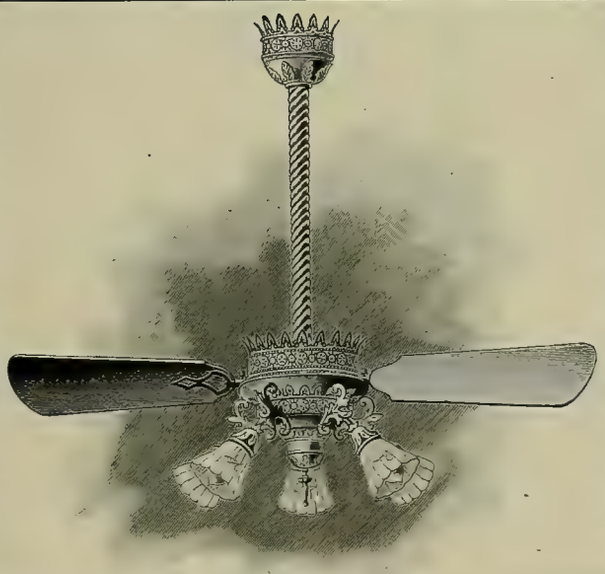
DIEHL DIEHL DIEHL DIEHL

ELECTROLIER-CEILING FANS.

Specially suitable for the finest restaurants, cafes, club houses, and all other places where only the best fans are desired.

The handsomest fan ever offered to the public. During the winter blades can be removed, making an ornamental and serviceable lighting fixture. Can be run successfully with motors on arc circuits and lights on alternating system, as the two currents are kept entirely separate throughout and are thoroughly insulated.

We carry the largest line of fans ever offered—all finishes, special designs, two or four blades. Our fans meet *all* requirements.



PATENTS SUSTAINED

March 8th and December 5th, 1900.

Our Ceiling and Electrolier fan patents have been sustained by U. S. court decision. The use or sale of infringements stopped by injunctions.

DIEHL FANS

are STANDARD OF THE WORLD. Mechanically and electrically perfect. Neat, attractive, noiseless, highly efficient. We are the pioneers in the manufacture of ceiling fans.

DIEHL MANUFACTURING CO.,

SHOW ROOMS { NEW YORK, 561-563 Broadway. CHICAGO, 192-194 Van Buren St. BOSTON, 128-132 Essex St. PHILADELPHIA, W. Irwin Cheyney & Co.

MAIN OFFICE AND WORKS:
ELIZABETHPORT, N. J.

DIEHL DIEHL DIEHL DIEHL

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

BELDEN-LARWILL ELECTRIC & MFG. CO.,
Fort Wayne, Ind.

AGENTS: M. B. Austin & Co., 58 W. Van Buren St., Chicago. C. E. Wilson, 1000 Betz Bldg., Philadelphia, Pa. R. N. Stewart & Co., Denver, Colo.

We are now in a position to establish desirable agencies in all principal cities in this and foreign countries.

The Fibre-Graphite Commutator Brush.

(U. S. and Foreign Patents.)

No Sparking Under Varying Load.
No Wear on Commutator.
No Shifting of Quadrant.
80 per cent. Pure Graphite.

FIBRE-GRAPHITE COMMUTATOR BRUSH — NOISELESS — SELF-LUBRICATING

BOOK CATALOGUE.

PART X.

PRINCIPLES AND THEORY OF ELECTRICITY AND MAGNETISM.

(CONTINUED.)

Henderson, John. Practical Electricity and Magnetism. With 159 illustrations and diagrams. 8vo, cloth. New York, 1898.....$2.00

Hertz, H. Electric Waves; being Researches on the Propagation of Electric Action, with Finite Velocity through space. Authorized translation by D. E. Jones, with preface by Lord Kelvin. Illustrated. 8vo, cloth.....$2.50

Jenkins, Fleeming. Electricity and Magnetism, with an Appendix on the Telephone and Microphone. Ninth edition. 12mo, cloth.....$1.25

Kingdon, J. A. Applied Magnetism. An Introduction to the Design of Electro-magnetic Apparatus. 8vo,cloth $3.00

Lloyd, H. A Treatise on Magnetism, General and Terrestrial. 8vo, cloth.....$3.75

Maxwell, J. Clerk. A Treatise on Electricity and Magnetism. Revised and edited by Prof. J. J. Thomson. 2 volumes. 8vo. Third edition. $8.00

Notes on Recent Researches in Electricity and Magnetism, Intended as a Sequel to the above by J. J. Thomson. (See Thomson, J. J.)

Moreman, T. A Treatise on Electricity and Magnetism, General Phenomena and Theory. Translated by E. Atkinson, Ph. D., F. C. S. 2 volumes. 8vo, cloth. London, 1888. (Scarce.).....$15.00

Nipher, F. E. Electricity and Magnetism. A mathematical treatise with profuse numerical examples for advanced undergraduate students. 8vo, cloth. 143 illustrations $3.25

Noad, H. M. A Manual of Electricity, including Galvanism, Magnetism, Diamagnetism, Electro-Dynamics. Magneto-electricity and the Electric Telegraph. 500 wood engravings. 8vo, cloth. London, 1859. .....$8.00

Noad, H. M. Lectures on Electricity. 8vo, cloth. Illustrated. London, 1855.....$4.00

Sanderson, F. W. Electricity and Magnetism for Beginners. With illustrations and answers to exercises. 16mo, cloth. New York, 1897.....$0.75

Sloane, T. O'Connor. Electricity Simplified. The Practice and Theory of Electricity, including a Popular Review of the Theory of Electricity, with Analogies and Examples of its Practical Application in everyday life. Illustrated. 12mo, cloth. $1.00

Sprague, John T. Electricity; Its Theory, Sources and Applications. Third edition, revised and extended with numerous illustrations and tables. 12mo, cloth $6.00

Thompson, Silvanus P. The Electro-magnet and Electro-magnetic Mechanism. Second edition, revised. 213 illustrations. 8vo, cloth.....$6.00

Thompson, Silvanus P. Lectures on the Electro-Magnet. 8vo, cloth. Illustrated. New York, 1891. .....$1.00

Thomson, J. J. Notes on Recent Researches in Electricity and Magnetism. Intended as a Sequel to Prof. Clerk Maxwell's Treatise on Electricity and Magnetism. 8vo, cloth.....$4.50

Thomson, J. J. Elements of the Mathematical Theory of Electricity and Magnetism. 12mo, cloth. $2.60

Thomson, Sir Wm. Mathematical and Physical Papers. Vol. 3, Electricity, Heat, Electro-Magnetism, with supplementary articles written for the present volume and hitherto unpublished. 8vo, cloth $5.50

Thomson, Sir Wm. Reprint of Papers on Electro-Statics and Magnetism. 2d edition. 8vo, cloth. $5.00

Tyndall, John. Notes of a Course of Nine Lectures on Electrical Phenomena and Theories. 12mo, cloth. London, 1870.....$0.50

Tyndall, John. Light and Electricity. 16mo, cloth $1.25

Tyndall, John. Lessons in Electricity at the Royal Institution, 1875-6. 12mo, cloth.....$1.00

Tyndall, John. Researches on Diamagnetism and Magne-Crystalline Action, including the Question of Diamagnetic Polarity. 12mo, cloth.....$1.50

Watson, H. W., and Burbury, S. H. The Mathematical Theory of Electricity and Magnetism. 2 volumes. 8vo, cloth. Oxford, 1885-89. Volume 1. Electrostatics $2.75
Volume II. Magnetism and Electrodynamics. $2.60

Webster, A. G. Theory of Electricity and Magnetism. Being Lectures on Mathematical Physics. 8vo, cloth. Illustrated. New York, 1897.....$3.50

THE TELEGRAPH, TELEGRAPH CODES.

Abernathy, J. P. The Modern Service of Commercial and Railway Telegraphy, in Theory and Practice, including the Railway Station and Express Service. Arranged in Questions and Answers. 12mo, cloth. Illustrated. Eighth edition. Revised and Enlarged $2.00

Anglo American Telegraph Code; to cheapen telegraphy, and to furnish a complete cipher, adapted to use in general correspondence, including business, social and other subjects of correspondence. Fourth edition. 8vo, cloth..$2.50

Benest, Capt. H. Coast Telegraph Communication. Being a Paper read before the Balloon Society, March, 1892. Maps and Plates. 4to, paper. $0.80

Bright, Charles. A Treatise on Submarine Telegraph Cables; their History, Construction and Working. Founded in part on Wunschendorff's Traité de Telegraphie Sous-Marine. Super Royal. 8vo, cloth. Illustrated. London, 1898. .....$25.00

Besides being a resume of the science and practice of Submarine Telegraphy, both from an Electrical and Engineering aspect, the book—with all the recent improvements in the direction of high speed (machine) transmission, simplex and duplex—also contains a complete history of this particular application of science from its birth, practically speaking in 1850, up to 1895, with a short sketch of what preceded in land telegraphy and a prelude concerning all early efforts connected with signaling of any description. It may be added that the historical section of this work approaches the subject from a financial and political, as well as from a technical point of view.

Cary, George H. A Hand-Book of the Modern Electric Telegraphy. Illustrated .....In press

Clausen-Thue, W. The A B C Universal Commercial Electric Telegraphic Code; specially adapted for the use of Financiers, Merchants, Shipowners, Brokers, Agents, etc. 4th edition. 8vo, cloth... .....$7.50

Clausen-Thue, W. The A1 Universal Commercial Electric Telegraphic Code. Over 1240 pages and nearly 90,000 variations. 8vo, cloth.....$12.50

Connolly, Wm. Elementary Papers on Technical Telegraphy. 12mo, cloth.....$0.60

Cooke, Sir W. F. Extracts from the Private Letters of the late Sir William Fothergill Cooke, relating to his invention of the electric telegraph. Also a memoir by Latimer Clark, with portrait. 8vo, cloth $1.25

Culley, R. S. Hand-Book of Practical Telegraphy. Eighth edition, enlarged. 8vo, cloth. Many plates. $5.50

Dodge, G. M. The Telegraph Instructor. 250 pages.....$1.00

Just the book for those wishing to learn all about the art of telegraphy.

Douglas, J. C. A Manual of Telegraph Construction. The Mechanical Elements of Electric Telegraph Engineering. Third edition. Numerous diagrams. 12mo, cloth. Reprinting.....

Fahie, J. J. A History of Electric Telegraphy to the year 1837; chiefly compiled from original sources and hitherto unpublished documents. 12mo, cloth. Illustrated.....$3.00

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. ***We guarantee it and if not satisfactory money will be refunded.***

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your **Cream Flux** severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

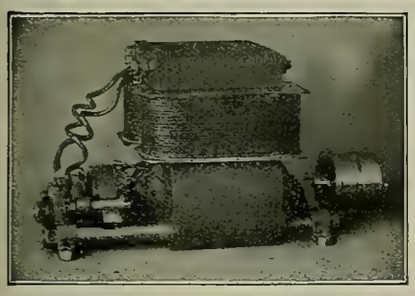
GASOLINE MOTORS AND SPARKING PLUGS.

NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

WANTED.

A steady position as engineer or electrician by a first-class, all around man. Have had over seventeen years' practical experience in running electric-light and waterworks plants in Chicago and other cities. Am thoroughly familiar with both direct and alternating-current machines, also high-speed and Corliss engines. Economic manager. Thirty-four years old and strictly temperate. Address "ENGINEER," 1810 Milwaukee Avenue, Chicago.

WANTED.

For an electric light and ice plant, an experienced engineer capable and willing to make his own repairs. Must have from $1,500 to $2,500 to invest. Will pay a good salary to the right man. Address "G." care Western Electrician, 510 Marquette Bldg., Chicago.

FOR SALE.

HIGH-SPEED AUTOMATIC ENGINES.

We make a specialty of this class of machinery. Our stock changes so rapidly that we deem it useless to give list here. We handle everything in the line of Steam Power Equipment. All of it is thoroughly repaired and refinished. Write for particulars. **CAMP ENGINEERING CO., 18 S. Canal St., Chicago, Ill.**

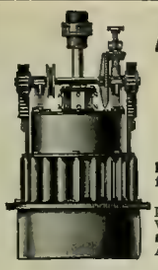
The drops being fastened to the back-board, the case may be removed without disconnecting wires.

NEW YORK N.Y.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.

Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

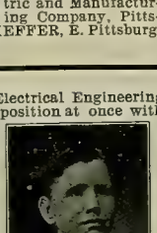
Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, **as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use.** STATE REQUIREMENTS AND SEND FOR CATALOGUE.

S. MORGAN SMITH CO., York, Pa.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.



I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.

ANDREW A. STEWART,

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

ELECTRICIAN PUBLISHING CO.,

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

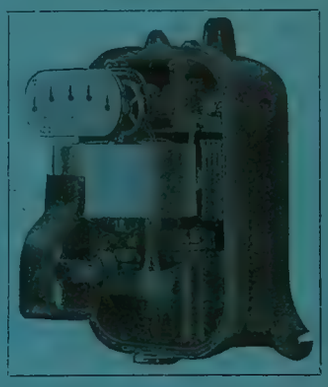
SOMETHING NEW

Our TYPE K
Integrating Wattmeter

Weighs less than 13 pounds and can be installed in a space 6¾ inches by 8¾ inches.

SOME INTERESTING POINTS.



This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.
It can be quickly Adjusted for Either HIGH OR LOW FREQUENCY.
No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.
CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.
ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

Write for Bulletin 1012.

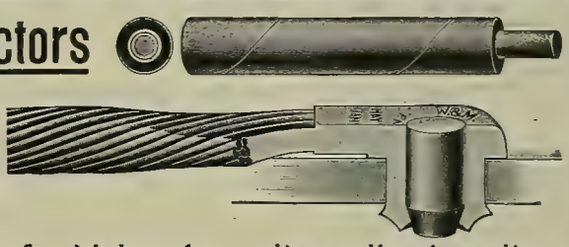
"CROWN" Insulated Conductors

AND

Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

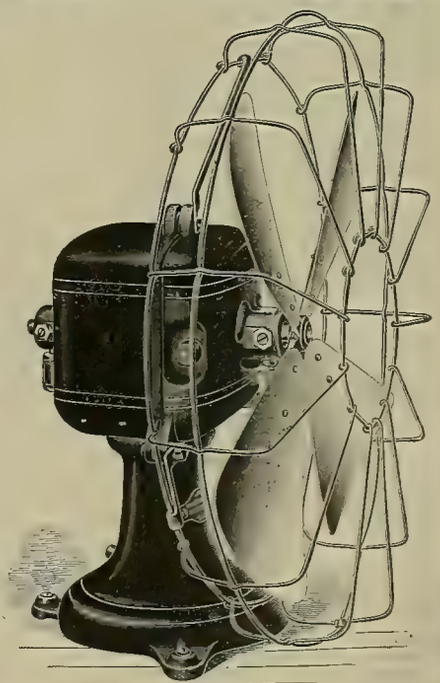
Infringements stopped by Injunctions.

Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of infringements stopped by injunction March 8th and December 5th, 1900.

DIEHL DESK FAN MOTORS.

The enviable reputation we have established in the manufacture of high grade ceiling fans has been fully maintained in our production of *DESK FANS*. They are acknowledged by users to be the best ever produced. Following are some of the important features they possess:

Silk insulation on armature wires,
Hard-drawn copper commutator bars,
Self-aligning bronze bearings,
Improved self-oiling oil cup,
Unbreakable three-speed switch base,
Very strong guards—no solder used,
Body of fan richly enameled and embellished with fine gold stripes.
Absolutely the highest efficient fans on the market.



Endorsed and approved by thousands of users throughout the world. 14 years in the manufacture of fans assures perfection in all respects.

97-99 Fulton Street, New York.

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. ***We guarantee it and if not satisfactory money will be refunded.***

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

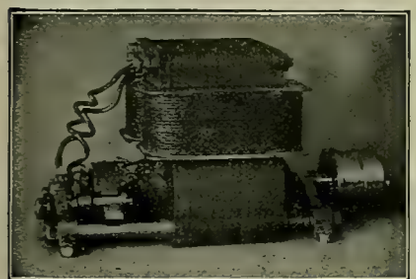
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

G. I. INCANDESCENT LAMPS.

5 MINUTES PLEASE!

1. EUREKA PACKING, with a RED DIAMOND LABEL, more power, lasts longer, costs less than any other good packing.
2. HINE ELIMINATOR gives dry steam to engine, keeps oil out of the boiler.
3. IMPROVED ROBERTSON-THOMPSON INDICATOR—a grand adjunct and at very moderate cost.
4. TIC-A-TOC GREASE CUP. Send for circular. A very successful novelty.
5. ROBERTSON FEED-WATER HEATER heats water to about boiling point with exhaust steam.

JAS. L. ROBERTSON & SONS,
198 Fulton St., New York. Branches: Boston—Philadelphia.

WANTED.

An all-around telephone man in Western town of 8,000; must be perfectly familiar with switchboard and telephone work, also outside construction. Growing system, built one year, 150 miles toll line, one exchange, 400 subscribers and three small exchanges; located in splendid independent field. Prefer young man, who must be strictly temperate and furnish good references as to industry, ability and habits, stating salary expected. Could make place for one lady operator if any object. Would sell interest in the business to the right man and give him entire charge, but don't care for that. Address W. W., care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Experienced armature winder to reconstruct surface-wound, alternating armatures into toothed-type armatures. State experience and salary wanted. Address CONSOLIDATED, care Western Electrician, 510 Marquette Building, Chicago.

WANTED.

Steam engineer and electrician to take charge of electric light plant. Must be a good, all-around man. Address GEO. W. SHRECK, York, Neb

WANTED.

Position as manager or superintendent of independent telephone exchange. Ten years' experience with Bell Company in above positions. Am with Bell Company now. Can furnish first-class references. Address "BELL," care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED TO BUY.

We are in the market for good second-hand high-speed Automatic and Corliss engines. We want several such at once. Write us, giving full particulars.

CAMP ENGINEERING CO.,

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

ELECTRICIAN PUBLISHING CO.,

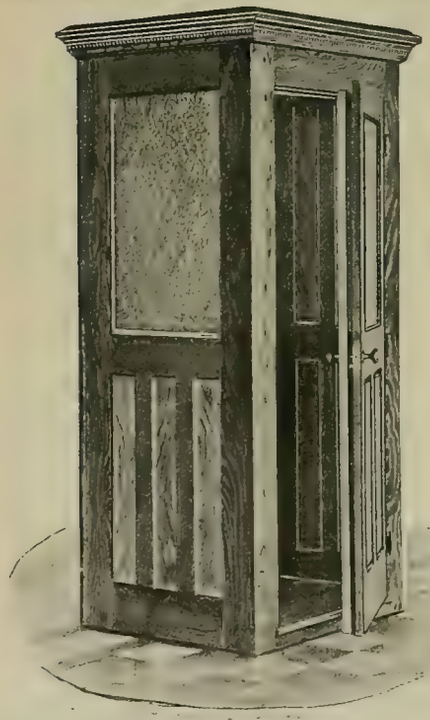
NOT EVERY MANUFACTURER SELLS SUCH A
SOUND PROOF BOOTH



AS THIS FOR
$40.00.

This is our price, crated, F. O. B. cars, Toledo, and if you buy it and set it up and don't like it you can send it back inside of five days after arrival at your station, if not injured, and we will stand freight one way. Can you suggest any fairer proposition?

It has two separate doors (not ONE door double thickness), two walls and ceilings, two floors with felt insulation, and double strength plain glass front and one side. Chipped glass costs but 70 cents, ground glass $1.00, more. If you want glass in front only, deduct $2.50. Made of oak with fine cabinet finish. Extra for quartered oak, cherry, or mahogany finish,

$4.00.

Can you afford to go without it? Figuring 6 per cent. interest and 10 per cent. depreciation (too high), it will cost $6.40 per year, or 54 cents per month, to own one booth. Can't you increase your toll line receipts all of 54 cents? Would your hotel 'phones pay better tolls if you installed booths and pay stations? Would an outfit in your Postoffice pay?

Our full line, catalogue on request, runs from $22.50 to $180.00, but our banner bargain is No. 6 as above. **Read our offer again.**

Hughes, Norman. The Magneto Hand Telephone. Its Construction, Fitting Up, and Adaptability to Every Day Use. 12mo, cloth.....$1.00

Hyde, W. H., and McManman, J. A. Telephone Inspector's Handbook. Telephone Troubles and How to Find Them. 64 pages. Many illustrations. Price $0.25

The only book enabling telephone men to instantly overcome telephone troubles.

Miller, Kempster B. American Telephone Practice. 518 large octavo pages. 379 illustrations. .$3.00

This book treats of the subject in a simple and comprehensive manner from the practical standpoint, and almost entirely without the use of mathematics. All matters of principle and practice are clearly and fully considered, enabling the reader to obtain an understanding, not only of the rudiments of telephony, but also of the most intricate circuits of modern exchanges. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company are fully described, and a large amount of space given to the products of the various independent companies, the systems of nearly all of the more prominent companies being fully explained. Much space is devoted to overhead and underground construction work, the methods of erecting poles, stringing wires and cables, the laying of conduits and drawing in of cables being fully covered in detail. The final chapter gives a concise description of the apparatus and methods used in making all of the tests required in commercial telephone work, such as the measurement of resistance, insulation and capacity, and the location of faults on lines and cables.

Patented Telephony. 102 pages. Illustrated. Price $1.50

A review of patents pertaining to telephones and telephonic apparatus, describing fully the more important details.

Poole, J. The Practical Telephone Hand-Book and Guide to the Telephonic Exchange. Second edition, revised and enlarged. 12mo, cloth, with 288 illustrations $1.50

Prescott, G. B. The Electric Telephone. Second edition, revised and enlarged. 795 pages. 8vo, cloth $6.00

Thompson, Silvanus P. Phillip Reis; inventor of the Telephone; a Biographical Sketch with Documentary Testimony. Translations of the Original Papers of the Inventor and Contemporary Publications. 8vo, cloth. 3 plates and 48 engravings. .$3.00

Webb, H. L. Telephone Hand-Book. 12mo, cloth. 133 illustrations. Chicago, 1900.....$1.00

Extract from Preface.

"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the Telephone Hand-Book is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

Contents.

Chapter 1. The Invention of the Telephone. 2. Sound Waves. Articulate Speech. 3. Electric Telephony. The Bell Telephone. 4. The Microphone. 5. Current Induction. Electromagnetic Induction. 6. The Induction Coil; Its Use in the Telephone Transmitter. 7. The Complete Telephone Circuit. 8. Magnet Telephones. 9. The Bell Telephone Receiver. 10. Other Forms of Magnet Telephones. 11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone. 12. The Siemens, Kotyra, Neumayer and Bottcher Receivers. 13. Carbon Transmitters. 14. The Blake Transmitter. 15. The Long-Distance Transmitter. 16. The Solid-back Transmitter. 17. The Berliner Transmitter. 18. The Crottriss Transmitter. 19. Various European Transmitters. 20. The Efficiency of Carbon Transmitters. 21. Batteries for Telephone Work. 22. Open Circuit Batteries. 23. Closed Circuit Batteries. 24. The Practical Management of Batteries. 25. Magneto-Bells. 26. Automatic Switches. 27. Telephone Line Construction. 28. Metallic Circuits. 29. Underground Wires. 30. Lightning Arresters. 31. Inside Wiring. 32. Installation of Telephone Instruments. 33. Inspection and Maintenance. 34. The Condenser; Its Use in Telephony. 35. Electromagnetic Retardation. 36. Exchange Working. 37. Small Exchanges. 38. Party Lines; The Bridging Bell. 39. Long-Distance Telephony. 40. Duplex

TRANSFORMERS.

Adams, George. Transformer Design. A Treatise on Their Design, Construction and Use. With 64 diagrams. 12mo, cloth. London, 1897.....$1.50

Bedell, Frederick. The Principles of the Transformer. 8vo, cloth. New York, 1896.....$3.25

This book contains an extensive treatment of the laws and principles governing the operation of the transformer. A feature of the work is the unity and sequence of treatment, the method of treatment being such as to make it valuable to the practicing engineer as a work of reference and to the student as a text-book. The book contains chapters on Transformer Systems of Distribution. The Design and Construction of Transformers, Constant Current and Constant Potential Transformers. The Simple Theory and the General Theory of Transformers, Effects of Hysteresis and Foucault Currents, Transformer Diagrams and Transformer Testing. Graphical Methods are freely employed. The volume contains about 400 pages with over 200 illustrations.

Fleming, J. A. The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents. 500 pages; fully illustrated and with copious index. Fifth issue. 8vo, cloth. .$5.00

Ford's Test of Modern American Transformers. .$0.25

Haskins, C. H. Transformers. Their Theory, Construction and Application, Simplified. 38 illustrations. 12mo, cloth.....$1.25

Kapp, Gisbert. Transformers for Single and Multiphase Currents. A Treatise on Their Theory, Construction, and Use. Translated from the German by the author. With 133 illustrations. 12mo, cloth. London, 1896. (Specialist's Series.).....$1.75

Kapp, Gisbert. Dynamos, Alternators and Transformers. 138 illustrations. 12mo, cloth.....$4.00

Uppenborn, F. History of the Transformer, Translated from the German. 12mo, paper.....$0.75

Weekes, R. W. The design of Alternate Current Transformers. Illustrated. 12mo, cloth.....$1.00

WIRING HANDBOOKS AND TABLES.

Allsop, F. C. Practical Electric Light Fitting. A Treatise on the Wiring and Fitting-up of Buildings, Deriving Current from Central Station Mains, and the Laying Down of Private Installations, including the latest edition of the Phoenix Fire Office Rules. 324 illustrations. 12mo, cloth.....$1.50

Atwood, L. C. Practical Dynamo Building. With Detail Drawings and Instructions for Winding. Giving correct sizes of Wire, Dimensions of Iron, etc. Also Diagram for House Wiring. Illustrations and plates. 4to, cloth.....$3.00

Badt, F. B. Incandescent Wiring Hand-Book, with 42 illustrations and five tables. Fourth edition. 12mo, cloth. Chicago, 1900.....$1.00

A timely book, containing full instructions for Incandescent Wiring, and complete information concerning methods of Running Wires, Location of Safety Devices and Switches, Splices, Insulation and Testing for Faults. Wire Gauges, General Electrical Data, Calculating Size of Wires, Wiring of Fixtures, Elevators, Buildings, Isolated and Central Station Plants.

Contents.

Introductory. The Multiple Arc System. The Three-Wire System. Methods of Running Wires. Cleat Work. Molding Work. Concealed Work.—a. When the Building is Being Constructed.—b. In a Completed Building. Location of Safety Devices and Switches. The Tree System. The Closet System. Safety Devices. Switches, Splices. Safety Rules. Insulation and Testing for Faults. Wiring of Fixtures. Wiring of Elevators. Wire Gauges. General Electric Data. Coulomb. Ampere. Volt. Ohm. Conductors and Insulators. Ohm's Law. Conductivity. Divided Circuits. Work. Energy. Calculating Sizes of Wires. Plans and Symbols. Drop of Potential and Loss of Energy. Practical Rules for Determining Sizes of Wires. Safe Carrying Capacity. The Three-Wire System. Explanation of Tables: Table No. 1—Gauges in Circular Mils. Table No. 2—Electric Light Conductors. Table No. 3—50-Volt Lamps. Table No. 4—75-Volt Lamps. Table No. 5—110-Volt Lamps.

Boult, W. S. The Comprehensive International Wire Table. Oblong, cloth.....$2.00

Cushing, H. C., Jr. Standard Wiring for Electric Light and Power. A Compilation of formulae, rules and requirements from the most modern practice, and in accordance with the rules and requirements of the Boston Fire Underwriters' Union, the New England Insurance Exchange, and as recommended by the Underwriters' International Electric Association. 12mo, leather.....$1.00

Emmett, Wm. M. Alternating Current Wiring and Distribution. 16mo, cloth. Illustrated.....$1.00

Grier, Thos. G. Wiring Tables, and How to Use Them. 104 pages. Many tables and illustrations. $1.00

A most timely book on wiring and one of the most reliable.

Hering, Carl. Universal Wiring Computer for determining the size of Wires for Incandescent Electric Lamps, Leads and for distribution in general, without calculation, formula or knowledge of Mathematics, with some notes on wiring and a set of auxiliary tables. 12mo, cloth.....$1.00

Kimber, George H. Electric Wiring Specifications for Incandescent Lighting. 59 pages. 8vo, flexible cover $1.00

Robb, Russell. Electric Wiring for the Use of Architects, Underwriters, and the Owners of Buildings. Small 4to, cloth. Illustrated. New York, 1896 .....$2.50

X RAYS.

Barker, Geo. F. Röntgen Rays. Memoirs by Röntgen, Stokes and J. J. Thomson. Translated and edited by Prof. Geo. F. Barker. 12mo, cloth. New York, 1899 .....$0.60

Bottone, S. R. Radiography and the "X" Rays in Practice and Theory, with constructional and manipulatory details. 12mo, cloth. With 47 illustrations. London, 1898 .....$1.00

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross-arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have **four** factories with **new** and late machinery, and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

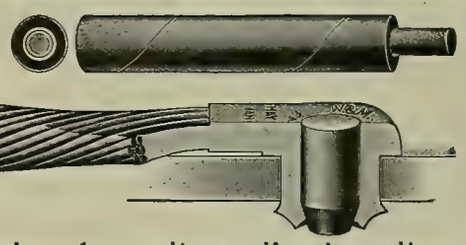
CARBONS CARBONS CARBONS

The "Electra" Carbons are the recognized standard all the world over.

There are no Carbons better than the "Electra" and none "just as good."

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

DIEHL ELECTRIC FAN

patents sustained March 8th and December 5th, 1900. Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of infringements stopped by injunctions.

BRACKET FAN MOTORS.

Adapted for use in many places where it would be impracticable to use the desk pattern. They possess all the good features of our desk fan motors. Endorsed and approved by thousands of users throughout the world. Thoroughly efficient, highly durable. Made with universal joint which admits of turning of fan in any direction, up, down or sidewise. Furnished with starting and regulating switch, three variations of speed.

OUR CEILING FANS

have no equal. Adopted by most of the central stations throughout the world on account of their high efficiency, durability and freedom from repairs. We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have demonstrated the superiority of our products and the great demand for them throughout the world is one of the best recommendations that we can offer for their adoption. Catalogues on application.

WHY CONTINUE TO BE TIED DOWN

to the old fogy idea that the exhaust steam from an engine has no commercial value? This is a mistaken idea. Every dollar's worth of exhaust steam can be sold for three times the cost by installing the HOLLY SYSTEM of underground steam mains. This is the original and only system that has made a mechanical and financial success of the distribution of steam for heating purposes. If you are contemplating the installation of a heating plant, investigate the HOLLY SYSTEM before making an investment. Write for our new pamphlet.

CHICAGO OFFICE, 1201-2 Marquette Bldg

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN are the first points considered by prospective arc lamp buyers. The Belden Arc Lamp excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why The Belden should receive your careful consideration before placing your next order.

BELDEN-LARWILL ELECTRIC & MFG. CO.,
Fort Wayne, Ind.

AGENTS: M. B. AUSTIN & Co., 58 W. Van Buren St., Chicago. C. E. WILSON, 1000 Betz Bldg., Philadelphia, Pa. R. N. STEWART & Co., Denver, Colo.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

FOR SALE BY ALL SUPPLY HOUSES OR

CREAM FLUX CO., Sole Manufacturers, 100 Washington St., CHICAGO.

THOMSON'S

New Double Focus Tubes have been designed for use with heavy transformer sets, giving more than 12-inch spark, and are equipped with our new adjuster, by means of which the proper degree of vacuum can be maintained.

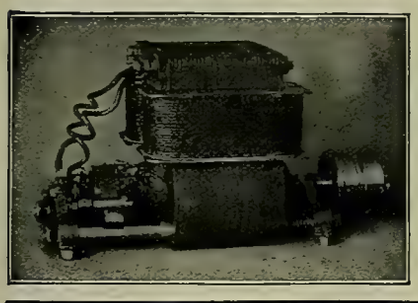
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill.

ELECTRICAL COURSES:

ELECTRICAL ENGINEERING,
ELECTRICAL,
ELECTRIC POWER AND LIGHTING,
ELECTRIC RAILWAYS,
ELECTRIC LIGHTING,
ELECTRIC CAR RUNNING,

TELEPHONY.

Also courses in Steam, Mechanical, Civil and Mining Engineering, Architecture, Drawing and Designing, Chemistry, English and Commercial Branches.

When writing state subject in which interested.

International Correspondence Schools,
Box 1002, Scranton, Pa.

NOT EVERY MANUFACTURER SELLS SUCH A

SOUND PROOF BOOTH

AS THIS FOR

$40.00.

This is our price, crated, F. O. B. cars, Toledo, and if you buy it and set it up and don't like it you can send it back inside of five days after arrival at your station, if not injured, and we will stand freight one way. Can you suggest any fairer proposition?

It has two separate doors (not ONE door double thickness), two walls and ceilings, two floors with felt insulation, and double strength plain glass front and one side. Chipped glass costs but 70 cents, ground glass $1.00, more. If you want glass in front only, deduct $2.50. Made of oak with fine cabinet finish. Extra for quartered oak, cherry, or mahogany finish,

$4.00.

Can you afford to go without it? Figuring 6 per cent. interest and 10 per cent. depreciation (too high), it will cost $6.40 per year, or 54 cents per month, to own one booth. Can't you increase your toll line receipts all of 54 cents? Would your hotel 'phones pay better tolls if you installed booths and pay stations? Would an outfit in your Postoffice pay?

Our full line, catalogue on request, runs from $22.50 to $180.00, but our banner bargain is No. 6 as above. **Read our offer again.**

Career and Character of Abraham Lincoln.

An address by Joseph Choate, Ambassador to Great Britain, on the career and character of Abraham Lincoln—his early life—his early struggles with the world—his character as developed in the later years of his life and his administration, which placed his name so high on the world's roll of honor and fame, has been published by the Chicago, Milwaukee & St. Paul Railway and may be had by sending six (6) cents in postage to F. A. Miller, General Passenger Agent, Chicago, Ill.

GRAPHITE FOR RESISTANCE...
Made in almost any form required and of 1 ohm or 1,000,000 ohms as desired. We also make graphite boxes and crucibles resisting heats of 4,000 degrees. . . . . .
JOSEPH DIXON CRUCIBLE CO., - JERSEY CITY, N. J.

WATER WHEELS
For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.
Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing.*
Tests show over 81 per cent. average efficiency with half to full water.
State your Head and send for 124 page pamphlet.

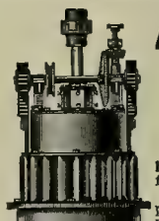
Telephone Troubles and How to Find Them.
A complete hand-book for telephone inspectors, by Wm. H. Hyde and J. A. McManman, edited by Prof. C. H. Haskins.
SIXTH EDITION. 53 PAGES. PRICE, 25 CENTS.
The large number of telephone exchange managers and employes will find this book a great help in locating telephone troubles and remedies therefor. Sent prepaid on receipt of price, by the
Electrician Publishing Co., 510 Marquette Building, CHICAGO.



M'CORMICK TURBINE.
On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.
Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.
Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. Western Electrical Supply Co.,

ST. LOUIS, U. S. A.

The Carrying Capacity Normally Loaded all the Time

of any Railway feeder is seldom utilized to the point of its maximum economy excepting a fraction of the 24 hours. To give a satisfactory service sufficient copper must be erected, for the most part to be idle, but to supply the demand at its peak. **Fewer Feeders, and these** supplying a Chloride Accumulator sub-station, the latter charging when the load is below average and discharging when the load is above average, is the most economical and practical arrangement for roads having lines extending considerable distances beyond their power station.

Many such Chloride Accumulator installations have been made. We will be pleased to advise you of results attained and saving effected and of the probability of our being able to assist your situation similarly.

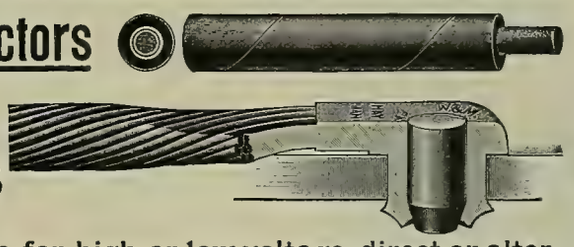
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS.

We make very low prices for repairs of batteries manufactured by the **Electric Storage Battery Company.** Send us dimensions of plates required and the number and **we will make you a quotation that will save you money.** We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

HELIOS-UPTON COMPANY,

PHILADELPHIA, PA. CHICAGO, ILL. PEABODY, MASS.

CEILING DIEHL FANS

STANDARD OF THE WORLD.

We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have absolutely demonstrated the superiority of Diehl fans, and the large and constantly increasing demand for them throughout this and other countries is one of the best recommendations for their adoption that we can offer.

Diehl fans are copied, but never equaled. They are without question the most perfect fans on the market. Electrically and mechanically perfect, attractive in appearance, splendidly finished, highly efficient, noiseless in operation, free from repairs—are some of their important features. Fourteen years' experience in the manufacture of ceiling fans assures perfection in all respects.

OUR CEILING AND ELECTROLIER FAN PATENTS SUSTAINED BY U. S. COURT DECISION.

Use or sale of infringements stopped by injunctions March 8th and December 5th, 1900.

We furnish two types of ceiling fans, two or four blades. We carry the largest line of designs and finishes to meet all possible requirements.

Cut illustrates ceiling fan No. 13 with switch. It has a very ornamental corona and basket, also switch controlling fan when operated on 110 or 220 volt circuits.

All standard fans wound for direct arc circuits of any amperage at same price as 110 volt. All ceiling fans have blades with 60-inch sweep.

Investigate the merits of Diehl fans before placing your orders.

INDEPENDENTS!

THE

BERLINER DECISION

In Favor of the Independents

DEMONSTRATES CONCLUSIVELY

That Our Faith in the Stability of the

INDEPENDENT TELEPHONE BUSINESS

IN GENERAL, AND THE

"CENTRAL ENERGY" SYSTEM

IN PARTICULAR,

Has Not Been Misplaced.

THE STROMBERG-CARLSON TELEPHONE MFG. CO.,

70-82 W. Jackson Boulevard, CHICAGO, U. S. A.

CONGRATULATIONS ON THE BERLINER TRANSMITTER DECISION

THINGS TO BE PROUD OF:

We have confidently believed that the Berliner decision would go against the Bell people, and as an evidence of our convictions we invested a large amount of capital in our manufacturing plant and in an extensive series of patents of OUR OWN. Our factory is illustrated below. COME AND SEE THE PATENTS.

Our business more than trebled itself in two years in spite of the handicap of the then impending Berliner decision, and during that time we have built switchboards ranging in size from the largest in the world (not excepting any, whether Independent or Bell) down to those for the smallest villages. ALL OF THESE, WITHOUT EXCEPTION, ARE IN SUCCESSFUL OPERATION.

There are good reasons for our success, and they may all be summed up in the words, GOOD DESIGN, CONSCIENTIOUS WORKMANSHIP, CONTINUED EFFICIENCY, backed by ABSOLUTE PATENT PROTECTION, together with honest dealings.

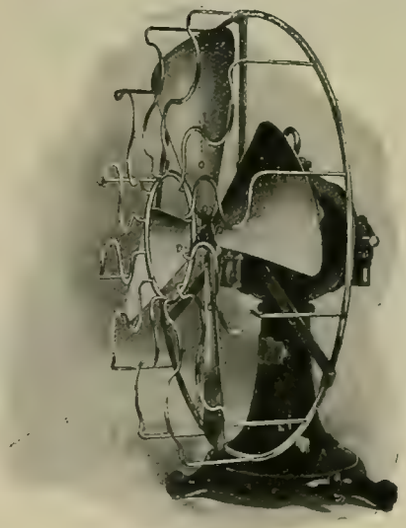
LUNDELL FANS



THE STANDARD.
THOUSANDS IN USE.

The Lundell Fans are still the favorites, owing to their superiority of design and workmanship. Dealers who handle them will find quick sales and satisfied customers. The Lundell Fans are economical in current consumption, easy in operation and graceful in appearance. They are made in a variety of sizes and styles and are adapted to all locations and to meet all requirements. Orders should be placed at once, as there will be a great demand for them this season.

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN

are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

RICHMONDT CONDUIT

THE MOST PERFECT WIRE CONDUIT TUBING.

The outside is Electro-Galvanized, so that it can be effectually and permanently grounded.

The inside is reamed to a perfectly true and uniform size and is then pickled, galvanized and enameled, making a smooth, tough and non-corrosive surface.

The couplings and threads of pipe are galvanized, thus insuring a continuous joint.

Selected pipe only is used. The process has the approval not only of the underwriters, but of every contractor and user who is familiar with it.

WE SELL IT. WE SELL IT. WE SELL IT.

ELECTRIC APPLIANCE COMPANY, CHICAGO,

92 and 94 West Van Buren St. Electrical Supplies.

DEWAR BULBS FOR LIQUID AIR

Are now supplied with special silvered coating preventing Heat Radiation. Liquid Air has been kept 29 days in such a bulb. Made in all sizes up to 10 inches.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

ELECTRICIAN PUBLISHING CO.,
510 MARQUETTE BUILDING, CHICAGO.

"The Recognized Authority on Wiring and Construction."

The universally adopted National Electrical Code explained and illustrated in this year's edition of the hand-book.

STANDARD WIRING

For Electric Light and Power.

By H. C. CUSHING, Jr., A. I. E. E., Electrical Engineer and Inspector.

ADOPTED

By the Fire Underwriters of the United States.
By Cornell University, Stanford University and other Technical Colleges and Schools.
By over 27,000 Electrical Engineers, Central Station Managers and Wiremen.

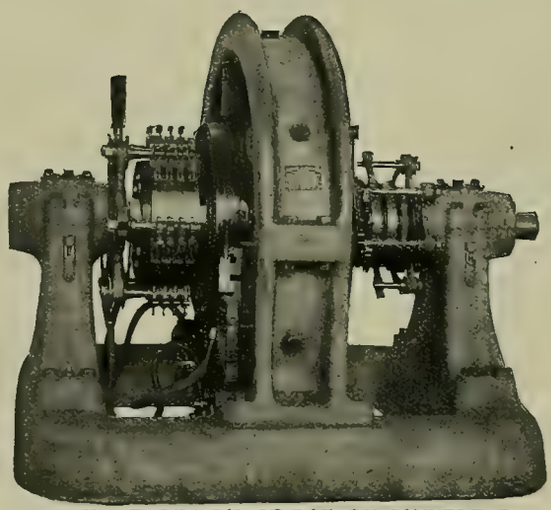
ARC LAMPS, KNIFE SWITCHES, GLOBES, FLUSH PUSH, AND SNAP SWITCHES, SHADES, CARBONS, RUBBER COVERED WIRES, CORDS AND CABLES, ELECTRIC LIGHTING SUPPLIES OF ALL KINDS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

THE GENERAL ELECTRIC COMPANY'S ROTARY CONVERTERS.

For Railway Power or Lighting Work.



200 Kw. THREE-PHASE ROTARY CONVERTER.

Sizes from 50 to 1,000 Kw. For all voltages.

GENERAL OFFICE, SCHENECTADY, N. Y.

Chicago Office, Monadnock Building. Sales Offices in all Large Cities.

There is No Higher-Class India-Rubber Insulation For Wires and Cables than

HABIRSHAW.

Authorized Manufacturers of the

ATTIX FLEXIBLE TUBE WIRE.

The India-Rubber and Gutta-Percha Insulating Co.,

MAIN OFFICE, Glenwood Works,

J. W. GODFREY, Manager Sales, 15 Cortlandt Street, NEW YORK.

YONKERS, N. Y.

(10928)

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade-mark "ELECTRA."

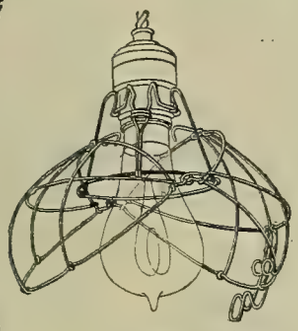
Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

DUPLEX LAMP GUARDS

OKONITE IT NEVER DISAPPOINTS

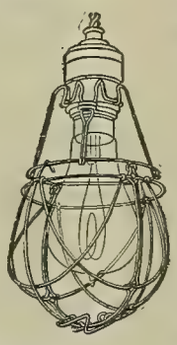
Give Necessary Protection.



From its peculiar shape will enclose either a ***16 c. p. or a 32 c. p.*** incandescent lamp.

Will clamp any standard socket without the use of a shade holder.

The use of Duplex Guards prevents needless breaking of lamps.



CENTRAL ELECTRIC COMPANY, SALES AGENTS,
264-266-268-270 Fifth Avenue, CHICAGO.

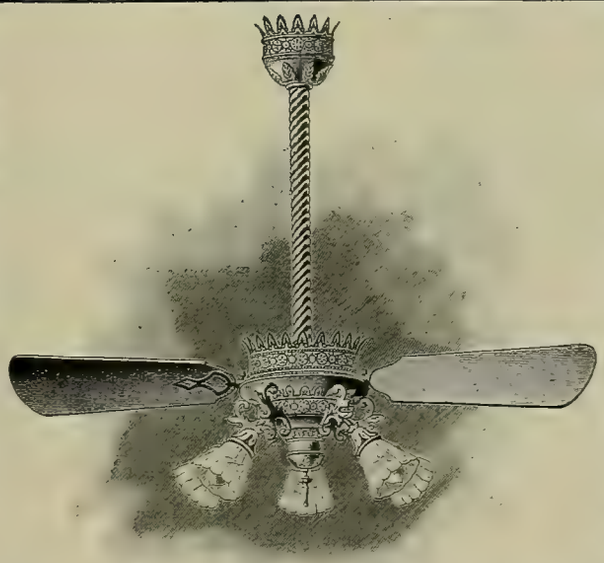
DIEHL DIEHL DIEHL DIEHL

ELECTROLIER CEILING FANS.

Specially suitable for the finest restaurants, cafes, club houses, and all other places where only the best fans are desired.

The handsomest fan ever offered to the public. During the winter blades can be removed, making an ornamental and serviceable lighting fixture. Can be run successfully with motors on arc circuits and lights on alternating system, as the two currents are kept entirely separate throughout and are thoroughly insulated.

We carry the largest line of fans ever offered—all finishes, special designs, two or four blades. Our fans meet *all* requirements.



PATENTS SUSTAINED

March 8th and December 5th, 1900.

Our Ceiling and Electrolier fan patents have been sustained by U. S. court decision. The use or sale of infringements stopped by injunctions.

DIEHL FANS

are **STANDARD OF THE WORLD.** Mechanically and electrically perfect. Neat, attractive, noiseless, highly efficient. We are the pioneers in the manufacture of ceiling fans.

DIEHL MANUFACTURING CO.,

SHOW ROOMS { NEW YORK, 561-563 Broadway. CHICAGO, 192-194 Van Buren St. BOSTON, 128-132 Essex St. PHILADELPHIA, W. Irwin Cheyney & Co.

DIEHL DIEHL DIEHL DIEHL

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS.

We make very low prices for repairs of batteries manufactured by the **Electric Storage Battery Company.** Send us dimensions of plates required and the number and **we will make you a quotation that will save you money.** We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

IS HOW TO PAY DIVIDENDS.

The quickest and best way is to install the HOLLY SYSTEM of underground steam mains, which will enable an electric company to sell their exhaust steam, which they are now throwing away, for three times the cost of production. We are the originators of the underground system of steam distribution, and have installed nearly 200 of these plants in different cities of this country. We are in a position to do the best work and guarantee results, both mechanically and financially. Write for our new pamphlet, which describes our system fully.

AMERICAN DISTRICT STEAM CO.,

Mention Western Electrician. LOCKPORT, N. Y.

PUBLISHER'S ANNOUNCEMENT.

NEW CENSUS ATLASES

CORRECTED TO DATE.

We shall publish during the next few months the undermentioned Atlases, all based on the latest census statistics. As the demand for these books will be very great, we suggest to all intending purchasers to place orders NOW, thus securing one of the early copies. Our reputation as the leading map makers is, of course, a guarantee that these books are the best at their respective prices, and we shall be pleased to send descriptive circular to further demonstrate their value.

RAND, McNALLY & CO.

POCKET ATLAS OF THE WORLD. 460 pages of handsomely colored maps of every State, Territory and Foreign Country, with pertinent descriptions and population of every incorporated city in the United States. Size, closed, 3½ x 5¾ inches. Very convenient for desk or travelers' use. This book is made for sale in quantities for advertising purposes. Rates on application. Strong cardboard cover. It will be a daily reminder to your patrons.

DOLLAR ATLAS OF THE WORLD. Contents same as above, but, whereas, maps in Pocket Atlas are split in center to reduce size of book, those in Dollar Atlas are complete on one page. The paper also is of a superior quality and the binding is artistic red cloth with ornate stamp. Price, postpaid, One Dollar. Size, closed, 6¼ x 7¼ inches.

TWENTIETH CENTURY ATLAS. Nothing but maps, 160 pages, 11 x 14 inches in size, showing maps of each State and Territory, Canadian Province, Foreign Countries and important American Cities. State maps show Counties, Railroads and Physical Features. On the margin of each map is an index, based on latest census figures, giving names of important towns, etc., in order of their respective sizes. He who wishes a handy-sized reference atlas will be well pleased with this book. Handsome red Buckram binding, post or express paid, ***$3.00.***

UNIVERSAL ATLAS OF THE WORLD. Contains all the maps of The Twentieth Century Atlas, with about 300 pages of descriptive, historical, geographical and statistical matter relating to the various maps. The indexes not only embrace all places in which census was taken, but many localities that are not mentioned in government reports. It is the popular home atlas and will surely give satisfaction. 460 pages, super-calendered paper; 330 illustrations. Red Buckram binding, ***$6.00;*** half leather, ***$7.50;*** elegant Morocco grain red leather, ***$10.00.*** Sent prepaid on receipt of price.

THE INDEXED ATLAS OF THE WORLD. *2 Volumes.* The best World Atlas ever published. It has been the acknowledged peer in its line ever since its first appearance. The new edition will include upward of 60 new physical maps covering every State, Territory and Continent—an entirely new feature. This addition to the previous voluminous book makes it a complete political and physical atlas. The pages of this atlas are the largest shown in any book of its kind, thus making it possible to give perfect and legible engraving. Prices: Buckram binding, ***$20.00;*** half leather, ***$25.00;*** full leather, ***$30.00.***

Incandescent Electric Light Manipulator Co.,
116 Bedford St., Boston, Mass.

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN

are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

Mention this paper.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill.

ELECTRICAL COURSES:

ELECTRICAL ENGINEERING,
ELECTRICAL,
ELECTRIC POWER AND LIGHTING,
ELECTRIC RAILWAYS,
ELECTRIC LIGHTING,
ELECTRIC CAR RUNNING,

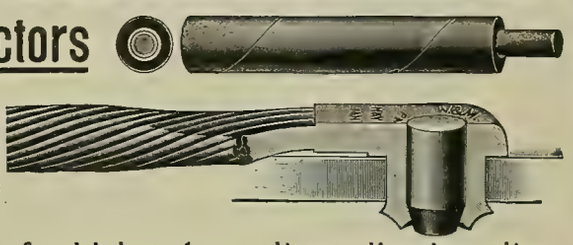
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

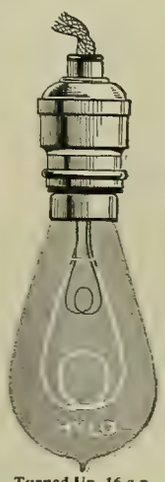
OKONITE IT NEVER DISAPPOINTS

THE HYLO BABY FILAMENT LAMP.



Turned Up, 16 c.p.

THE HYLO LAMP can be turned up and down from 1 to 16 c. p. It has two light-giving filaments—a big one like a common lamp, giving 16 candlepower, and a Baby Filament giving one candlepower. Unscrewing the lamp slightly from the socket turns out the Big Filament and lights the Baby.

The mechanism which makes the change is a part of the lamp itself and is so extremely simple that derangement is nearly impossible.

1. **Can be turned up and down—a simple twist of the wrist does it.**
2. **Saves five-sixths of the light bill when turned down.**
3. **Goes into any socket like a common lamp.**
4. **Takes up no more room than a common lamp.**
5. **Can be used with any kind of shade or reflector.**
6. **May be moved from one socket to another.**
7. **Lasts from two to five times as long as a common lamp.**
8. **Eliminates danger of fire.**
9. **You don't pay for too much light.**
10. **Made with either of three bases—Edison, T.-H. or S.-M. (Westinghouse).**

Turned Down, 1 c. p

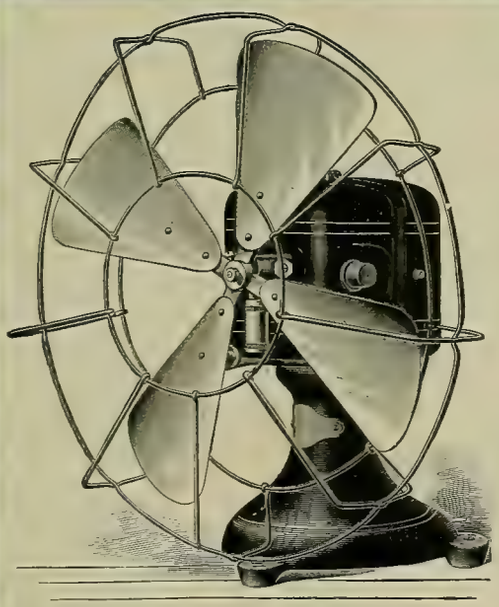
OKONITE IT NEVER DISAPPOINTS

USE OR SALE OF

Infringements stopped by Injunctions.

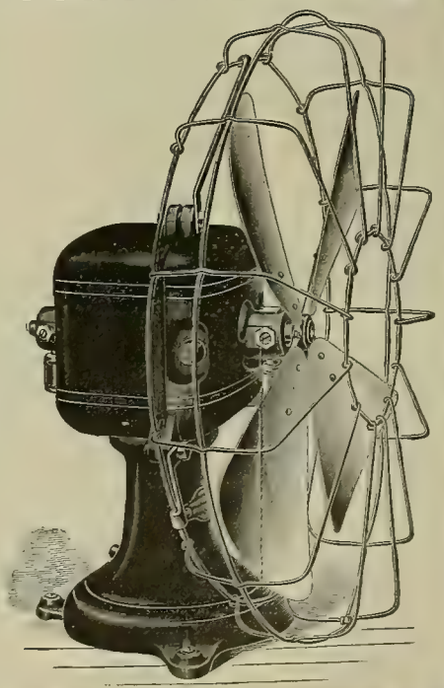
Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of Infringements stopped by injunction March 8th and December 5th, 1900.

DIEHL DESK FAN MOTORS.



The enviable reputation we have established in the manufacture of high grade ceiling fans has been fully maintained in our production of ***DESK FANS.*** They are acknowledged by users to be the best ever produced. Following are some of the important features they possess:

Silk insulation on armature wires,
Hard-drawn copper commutator bars,
Self-aligning bronze bearings,
Improved self-oiling oil cup,
Unbreakable three-speed switch base,
Very strong guards—no solder used,
Body of fan richly enameled and embellished with fine gold stripes.
Absolutely the highest efficient fans on the market.



Endorsed and approved by thousands of users throughout the world. 14 years in the manufacture of fans assures perfection in all respects.

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN

are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours. No alignment necessary. Trims easier than an open arc lamp. Allows easy access to every part of lamp. Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

ONE OF THE MOST IMPORTANT FEATURES OF OUR SYSTEM

THE UNION AUXILIARY BOARD.

By means of this Auxiliary Board it is possible to give **immediate answers to all calls.**

Heretofore in Multiple Switchboard practice it was possible to answer calls only from the operator's section on which they came in, so that a sudden heavy demand on any operator from a number of her subscribers at one time necessarily caused delay until she could serve them all. It is not so with our system. Two "overflow" operators are stationed at the Auxiliary Board,which contains multiples of all the lines in the Exchange, and if any calls remain unanswered by the regular operators for any cause, they are immediately taken up from this board. The Auxiliary Board is also used at night, when one operator can, without changing position, take care of all the business of the Exchange—a condition heretofore unknown in Multiple Switchboard Exchanges.

REMEMBER:—We are Telephone Contractors as well as Manufacturers, and stand ready to build your Switchboards and all your lines; in fact, we contract to build Complete Telephone Systems. As to date we have built as many as twenty-one Exchanges and 500 miles of line, we think we know something about the "Telephone Contracting Business."

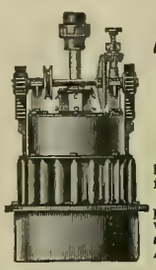
AND LEATHER PRESERVATIVE

Is guaranteed to prevent slipping and preserve the leather. It will pay you to send for circulars and testimonials.

JOSEPH DIXON CRUCIBLE CO., - JERSEY CITY, N. J.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.

Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

EDISON TELEPHONE LAMPS

Are the Standard for Visual Signals.

Their value has been verified by more than three years of extended service.

They are preferred because of

Certainty of service of each individual lamp—every lamp being perfect.
Extreme length of life.
Strong and durable mechanical construction.
Thorough uniformity of all lamps, insuring certainty of contact in sockets and freedom from misfit.
Maximum of maintained light for a minimum of power consumption.

Orders for any quantity promptly filled.
All lamps supplied closely rated and carefully selected.

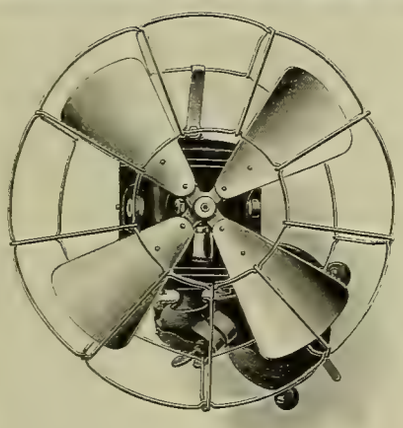
PROMPT SHIPMENTS MADE.

264-266-268-270 FIFTH AVENUE, CHICAGO.



DIEHL ELECTRIC FAN patents sustained March 8th and December 5th, 1900. Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of infringements stopped by injunctions.

BRACKET FAN MOTORS. Adapted for use in many places where it would be impracticable to use the desk pattern. They possess all the good features of our desk fan motors. Endorsed and approved by thousands of users throughout the world. Thoroughly efficient, highly durable. Made with universal joint which admits of turning of fan in any direction, up, down or sidewise. Furnished with starting and regulating switch, three variations of speed.

OUR CEILING FANS have no equal. Adopted by most of the central stations throughout the world on account of their high efficiency, durability and freedom from repairs. We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have demonstrated the superiority of our products and the great demand for them throughout the world is one of the best recommendations that we can offer for their adoption. Catalogues on application.

CARBONS CARBONS CARBONS

The "Electra" Carbons are the recognized standard all the world over.

There are no Carbons better than the "Electra" and none "just as good."

POCKET INSTRUMENTS.

Made in the following Ranges:

VOLTMETERS.

	List.
0 to 3 volts,	$10 00
0 to 5 volts,	11 00
0 to 10 volts,	13 50
0 to 15 volts,	16 50

AMMETERS.

0 to 150 milli-amperes,	$10 00
0 to 1 amp.,	11 00
0 to 2 amp.,	13 50
0 to 5 amp.,	16 50

INDISPENSABLE

Apparatus for telephone men is here illustrated. The pocket meters are not only convenient, because of their compact construction, but of extreme accuracy, being built on the same principle as standard portable instruments with permanent magnets and jewel bearings. They are hand calibrated throughout. The testing set (Wheatstone bridge) is guaranteed accurate within 1-5 of 1 per cent., and is invaluable for general testing work. We have several other devices widely used by progressive telephone men, all of which are shown in our latest catalogue. Send for copy of it.

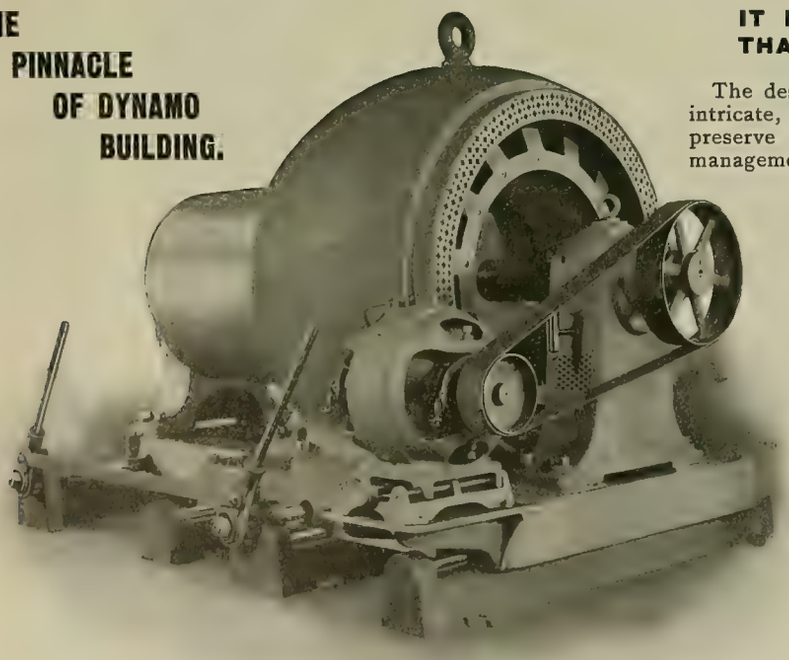
THE IMPROVED WARREN ALTERNATOR.

THE PINNACLE OF DYNAMO BUILDING.



IT IS EASIER TO INVENT COMPLICATIONS THAN TO PRESERVE PRACTICAL SIMPLICITY.

The designers of the Warren Alternator have studiously avoided intricate, delicate and costly parts, endeavoring in every way to preserve simplicity, reliability, durability, efficiency and ease of management.

The absence of moving wire, collector rings, commutator and brushes makes the Warren peculiarly well fitted for the exacting conditions of long, continuous service. No attention required except the occasional refilling of oil reservoirs.

253 BROADWAY, NEW YORK.

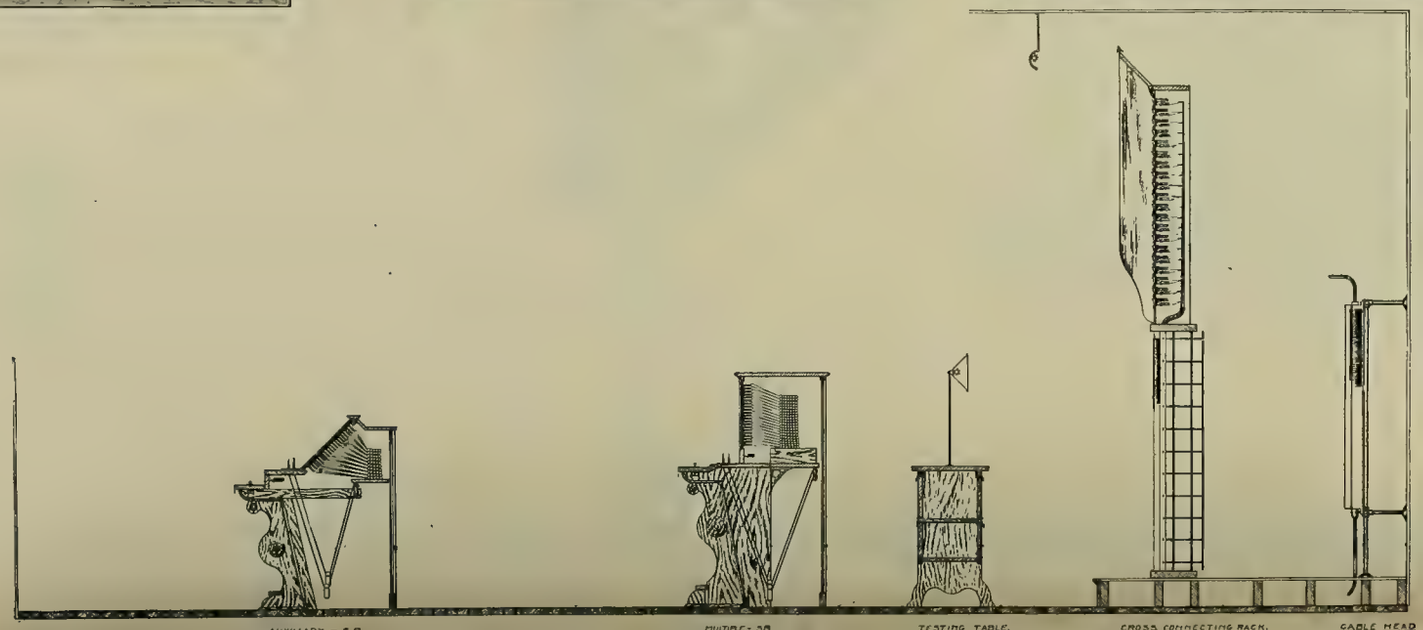
Central Electric Company,

264-266-268-270 FIFTH AVENUE,

Western Agents. CHICAGO.

IN THE "WESTERN ELECTRICIAN" OF MARCH 9, 1901, WAS DESCRIBED THE UNION SWITCHBOARD CO.'S SYSTEM, AND WE SHOWED YOU PHOTOGRAPHS OF OUR 21 EXCHANGES.

WE NOW SHOW YOU, BELOW, SOME OF THE MOST VALUABLE AND NOVEL FEATURES OF ONE OF OUR MODEL EXCHANGES.



This cut shows in diagram the arrangement of the switchboard elements in the exchange of the Mutual Telephone Company, Erie, Pa. The board and its operation are entirely new and worthy of a careful consideration. Briefly, the operation of the system is this:—

A call is indicated on the drop frame, shown at the right, by the uncovering of a white number. The operator on whose section the call comes in, but seated before the multiple board shown at the left of center, is immediately notified of the fact by the lighting of a pilot lamp on the multiple board before her. She sees the number on the rack and plugs in on the corresponding jack on the multiple board, to answer. This act not only extinguishes the pilot lamp on the multiple board, BUT CHANGES THE COLOR OF THE DROP ON THE RACK TO RED; likewise, the act of plugging in on the multiple board, on the line called for, causes that number to show red on the rack. In the showing of the red numbers lies the "busy" signal, which is visual. All numbers showing red indicate "line in use," and the first care of the operator when a number is called for is to notice if that number shows red. Thus a quick glance of the eye is the only motion required on the part of the operator to make the "busy test." When a connection is taken down the numbers disappear entirely and the drops are ready for another call.

What is the AUXILIARY BOARD? This is something (original with us) by means of which IMMEDIATE ANSWERS TO ALL CALLS can be given. We will describe this in the near future on these pages.

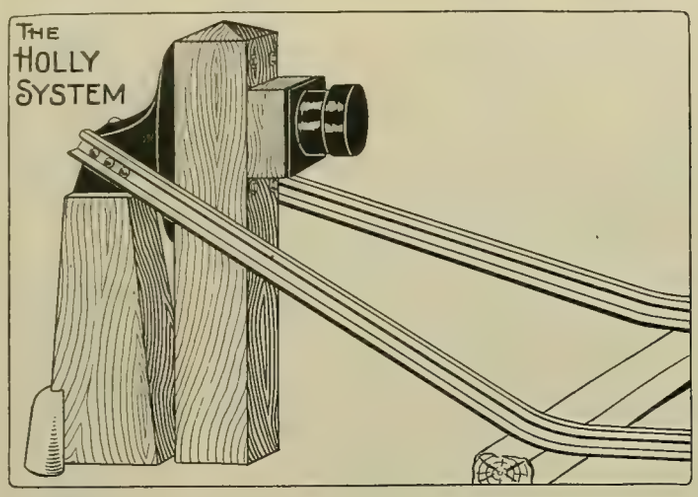
NOW, WHY SHOULD YOU USE OUR APPARATUS?

We have something new, but have no experiment to try on you; our apparatus has been in successful operation at the Erie (Pa.) exchange since October, 1900. : : We have no line signals on our switchboard; therefore, they do not have to be crowded in small compass and consequently do not easily get out of order, but are easily repaired. : : There are no make and break contacts in the line circuits excepting at the jacks; no relays, no transformers, no condensers, no boosters. : : All the apparatus works with positive action; there are no fine adjustments. : : The "busy test" is the quickest—no motion of the hand is required. : : All line signals are in plain view of all the operators. : : Facility for making tests and repairs. : : Freedom from interference to business. : : Minimum number of operators to give first-class service. : : Comparatively small original cost. : : Economy of operation. : : Immunity from switchboard trouble. : : Extreme simplicity of circuits. : : Self-restoring drops. : : Lack of complication. : : Swiftness of service. : : Flexibility of system.

REMEMBER: WE ARE TELEPHONE CONTRACTORS as well as MANUFACTURERS, and stand ready to build your SWITCHBOARDS and ALL YOUR LINES; IN FACT, WE CONTRACT to build COMPLETE TELEPHONE SYSTEMS. As to date WE HAVE BUILT as many as TWENTY-ONE EXCHANGES and HUNDREDS OF MILES OF LINE, WE THINK WE KNOW SOMETHING ABOUT THE "TELEPHONE CONTRACTING BUSINESS."

THE UNION SWITCHBOARD CO.,

ERIE, PA.



A Sure Stop.

If you are contemplating the installation of an underground heating plant, stop and investigate the HOLLY SYSTEM, the original and only successful system of underground steam distribution which has proved a mechanical and financial success.

We were the first to install the underground heating plants, and as we have had over fifteen years of experience, we can guarantee results.

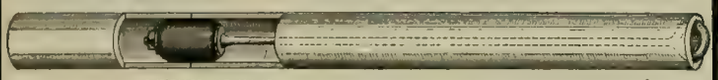
Electric Companies who are operating our system report that they are paying all their fuel and station expenses and interest on the investment for steam mains from the sale of their exhaust steam. Write for our new pamphlet.

AMERICAN DISTRICT STEAM CO.,
LOCKPORT, N. Y.

Mention Western Electrician.

STONE CONDUIT.

15 to 20 per cent. Less than Tile Construction.



PATENTS PENDING.

Outside diameter, 4½ inches. Length, 6 feet. Bore, 3, 3½ and 3¾ inches.
Pipe are easily sawed to any desired length or angle.

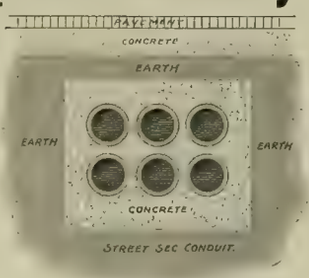
No Inspection of Pipe Required. All Pipe Are Perfect. We Stand Loss by Breakage.

PORTLAND CEMENT and CRUSHED STONE are the only materials entering into the construction of our

Underground Subway System.

INDESTRUCTIBLE.

A SOLID BLOCK OF STONE WITHOUT JOINTS, AND A GOOD NON-CONDUCTOR.



EVERLASTING.

CONSTRUCTION IS VERY RAPID, USING ONLY ORDINARY LABOR IN THE ENTIRE WORK.

WATER AND GAS PROOF. It is the strongest of CONDUIT STRUCTURES, as the concrete unites with the exterior of the pipe. Pipe are manufactured by a new process of subjecting the material to an IMMENSE PRESSURE from the INTERIOR of the pipe, which gives a bore of PERFECT DIAMETER and POLISHED SMOOTHNESS, the whole having a uniform strength and density. Such pipe when laid in concrete with our RUBBER MANDREL, under EXPANSION, have perfect ALIGNMENT without chance of error in construction.

WE BUILD COMPLETE UNDERGROUND SUBWAY SYSTEMS.

AMERICAN STONE CONDUIT CO.,
WEST 18TH AND SOUTH LINCOLN STS.,
Write for Sample or Other Information. **CHICAGO, ILL., U. S. A.**

"ELECTROLYSIS PROOF"

HIGH VOLTAGE SPECIALTY. **ASPHALT PAPER CONDUIT** GUARANTEED TO STAND 50,000 VOLTS.

Made in 7-foot lengths. Bore, 3 and 3¼ inches. Weight, 2 lbs. to foot.
Made in sizes from 1½ to 8 inches.

AN ABSOLUTE NON-CONDUCTOR.

GUARANTEES PERFECT INSULATION.

INDESTRUCTIBLE.

Composed principally of asphalt, it is impervious to moisture; water and dampness cause it to become almost as hard as iron.

BETTER SERVICE

Obtained over wires enclosed in it.

NO SCRATCHING

Of cables in hauling. Entirely free from grit.

Made with male and female joint. Joints are coated with asphalt in laying, making conduit one solid body of asphalt from manhole to manhole. Sawed to any desired length or angle. Laid without concrete protection where the traffic is of the ordinary order. Cheapest of conduits to lay, using only ordinary labor. Cheapest to ship, as it weighs but two pounds to the foot. Guaranteed absolutely ELECTROLYSIS PROOF.

ORDERS SHOULD BE PLACED AT ONCE, TO INSURE DELIVERY FOR THE SEASON.

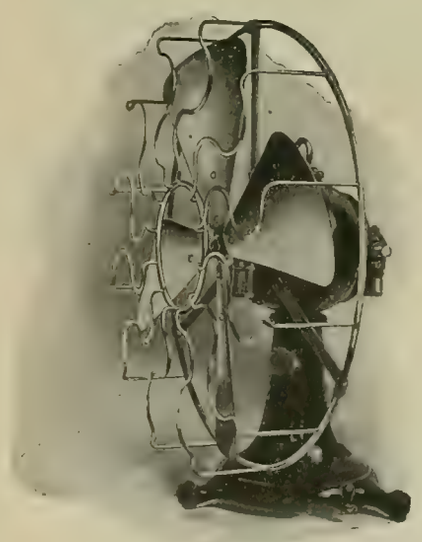
LUNDELL FANS



ARE COPIED BUT NEVER EQUALED.

THE STANDARD. 100,000 IN USE.

The Lundell Fans have always had a higher efficiency and a greater durability than any other fan on the market by reason of superior design and construction. They have a strong torque and give a greater amount of breeze than any other make of fan consuming the same amount of power. Every piece of material is carefully examined and each fan is thoroughly tested before leaving the factory. They are made in different styles and sizes to meet every requirement, and dealers who want quick sales and satisfied customers should handle the Lundell Fans. There is a big demand for Lundell Fans and dealers should send in their orders at once.

Technical Education by Mail

The American School of Correspondence offers instruction in Engineering Courses under a staff of instructors trained in the best technical schools of the country. It is chartered under the educational laws of Massachusetts. It is located in Boston, the home of three of the foremost technical schools of the land. It is not intended to take the place of a residence school, but to enable that class of ambitious people who have no opportunity to attend a residence school to pursue—under the guidance of able instructors—studies during their leisure moments which they feel to be of value in their daily lives. To introduce the high standard of instruction the Trustees have voted to award a limited number of

Free Scholarships
In Electrical, Mechanical and Steam Engineering

Including a Thorough Course in Mechanical Drawing

This offer also affords an excellent opportunity for individual and private instruction in Mathematics, the Natural Sciences and Mechanical Drawing. Prospectus on request.

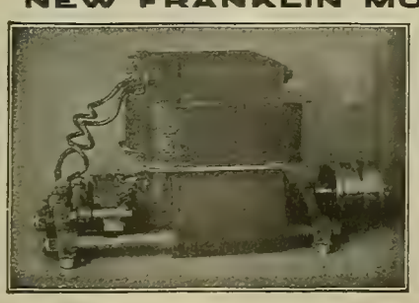
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

This handbook is a complete treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.
This book describes the construction of the various forms of transmitting and receiving devices, the signaling mechanisms, and the switchboard apparatus at the central station. It is written by two well-known electricians, and has the merit of being the latest work on the subject.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 238 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view, it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Sixth edition. 16mo, 50 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Second edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pages. 333 illustrations. Price $4.50.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. The purpose for which this book is written is to furnish information to those who may desire to construct or use telephone apparatus or lines on a small scale. Price $1.00.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp., 168 illustrations. Price $2.00.

TELEPHONE SYSTEMS ON THE CONTINENT OF EUROPE. By Bennett. 436 pages. 169 illustrations. Price $4.50.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pages. 23 illustrations. Price $1.00.

BELL'S ELECTRIC SPEAKING TELEPHONE. Its Invention, Construction, Application, Modification and History. By Prescott. New edition, revised and enlarged. 795 pages. 516 illustrations. Price $4.00.

PHILIPP REIS, INVENTOR OF THE TELEPHONE. A Biographical Sketch with Documentary Testimony. By Thompson. Translation of the original papers of the inventor and contemporary publications. 182 pages. 2 plates and 48 engravings. Price $3.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pages. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Works Published, Sent on Receipt of Price.

THE

TELEPHONE HAND-BOOK

BY HERBERT LAWS WEBB.

Containing a Chapter on "Recent Progress" which brings this practical book UP-TO-DATE.

The General Principles of

Telephony

Are Now Well Established.

The Telephone Hand-Book deals with them.
No matter what kind of Telephones and Switching Apparatus you use, or expect to use,

YOU WILL FIND IT USEFUL.

It is a Practical Book
for the Practical Man
and for the Student.

PRICE $1.00 POSTPAID.

ELECTRICIAN PUBLISHING CO.,

510 Marquette Building, CHICAGO.

Chicago Telephone Co.,

203 Washington St., Chicago.

Some of their recent progressive announcements to the public through the press.

A Telephone

Centers the

Business Aim!

It Accomplishes Results.

Ask about the Auxilliary 'phone we offer for busy business men's use, whereby ingoing calls are free.

CHICAGO TELEPHONE CO.,
Contract Dept., 203 Washington Street.

Some Customers Come in at the Door,

Many come in over the telephone wire. They can't come in unless you let them.

OUR NEW

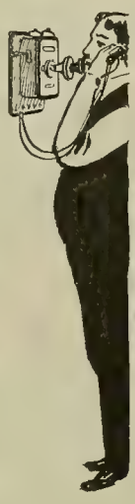
Measured Service

lets them come in without cost to you. Ask us.

BUSINESS and RESIDENCE TELEPHONES

16c PER DAY AND UP.

Chicago Telephone Co., Contract Department, 203 Washington St.



There are many ways of "getting there" but the best and quickest is by

Telephone

Business or Residence
16c Per Day and up.

Ask about the new measured service.

Chicago Telephone Co.,
Contract Department,
203 Washington St.

The man in front of the Telephone

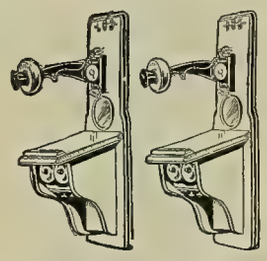
commands a world of business and often sees his business grow beyond the limits of a single 'phone. To such we offer our

AUXILIARY TELEPHONE

That will double his telephone service at a slight cost over his present service—ingoing calls being free. Business men are invited to inquire about this. Address

CHICAGO TELEPHONE CO.,
Contract Dept., 203 Washington Street.

Are You Deaf



to the calls of your fellow business men? If your telephone service is insufficient you will find a remedy in our

Auxiliary Telephone

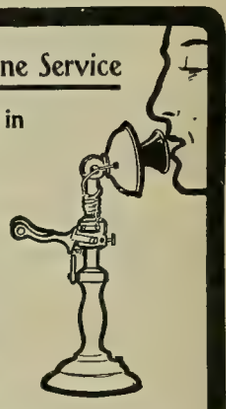
It adds little to your telephone cost, yet doubles the service, ingoing calls being free. Ask about it.

Contract Dept., Chicago Telephone Co., 203 Washington St.

You can double your Telephone Service

without any great increase in cost by installing our

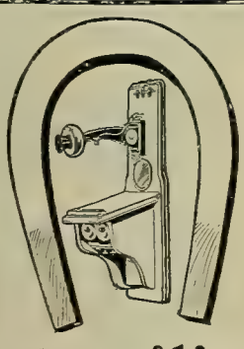
Auxiliary Telephone



ingoing calls being free and delays minimized.

It is a blessing to busy business men. If your are not fully informed regarding charges and service of an auxiliary telephone please call up Contract Department, and we will have a solicitor call and see you.

Chicago Telephone Co., 203 Washington St.



A Good Telephone Service

is a magnet that draws and holds business. If one telephone is inadequate to supply your increasing business needs we offer you relief in our

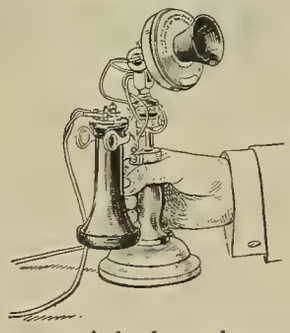
Auxiliary Telephone

that will double your present service without materially increasing the cost, ingoing calls being free. Ask about it.

CHICAGO TELEPHONE CO., Contract Department, 203 Washington St.

Right in Your Hand...

Your affairs are within your grasp if you have a telephone on your desk. You have the commercial world at your elbow—saves time—labor—money—conserves your nervous energy—increases your individual capacity.



Costs but 8c a Day.

Ask about the new measured service —all incoming calls are free.

XXVIII.—Harmonic Systems of Selective Signaling. XXIX.—Wire for Telephone Use. XXX.—Pole Line Construction. XXXI.—Overhead Cable Construction. XXXII.—Underground Cable Construction. XXXIII.—Testing. XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

HEAT YOUR MAGNETS RIGHT.

The right way is by using the **STEWART GAS BLAST FURNACE,** which obviates all danger of improper heating.

With this furnace you take no chances, and you cannot go wrong. Thousands of magnets are ruined by being heated in the open fire. More pieces can be heated in one day with one of our furnaces, and heated right, than can be heated by the old method in three days. Don't blame your steel man, if your magnets aren't good; the fault is in the heating.

The price of furnace illustrated here is $85.00. It was especially designed for heating magnets, tools, dies, punches, etc. We make several sizes, and send our furnaces on thirty days' trial.

Catalog for the asking.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

GRAPHITE FOR RESISTANCE...

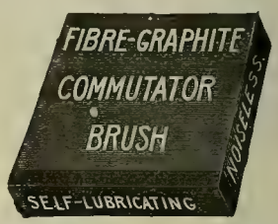
Made in almost any form required and of 1 ohm or 1,000,000 ohms as desired. We also make graphite boxes and crucibles resisting heats of 4,000 degrees.

JOSEPH DIXON CRUCIBLE CO., - JERSEY CITY, N. J.

The Fibre-Graphite Commutator Brush.

(U. S. and Foreign Patents.)

No Sparking Under Varying Load.
No Wear on Commutator.
No Shifting of Quadrant.
80 per cent. Pure Graphite.



For Sample Order, and Prices, write to

Holmes Fibre-Graphite Mfg. Co.,
5155 Wakefield St., Germantown, PHILADELPHIA.

MUNICIPAL OWNERSHIP:

ITS FALLACY.

With legal and editorial opinions, tables and cost of lights as furnished by private companies and municipal plants.

BY M. J. FRANCISCO.

Fourth edition, revised. 100 pages. Price 50c. Full of valuable information for everyone interested in the subject.

ELECTRICIAN PUBLISHING CO., 510 Marquette Building, Chicago.

DOMESTIC
Electrical Work.

Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators and for Gas Lighting from Batteries.

Illustrated with Twenty-two Diagrams.

By WILLIAM A. WITTBECKER.

Price in Paper, 25 Cents.
Price in Cloth, 50 Cents.

THE growing demand for simple electrical apparatus in dwelling houses, offices and work shops and the need of plain instructious whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed.

The information given is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described.

Electrician Publishing Co.,
Suite 510 Marquette Bldg.,
CHICAGO.

ALL EMPLOYES

In the operating department of the "Alton Road" are required to pass mental and physical examinations calculated to secure absolute safety to passengers and freight. Fidelity, promptness, and accuracy are rewarded by the merit system, the result being that one of the safest railways in the world is

"THE ONLY WAY"

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel: Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

FORT WAYNE ELECTRIC WORKS

(INCORPORATED)

"WOOD" ARC LAMP SUSPENSION CUT-OUTS.

A decided improvement on hanger boards.

A positive and absolute cut-out for either series or constant-potential arc lamps.

A beautiful as well as useful device for interior arc lighting.

When ordering be sure to state whether cut-outs are desired for series or constant-potential circuits.

Approved by Fire Underwriters.

114-120 William St., NEWARK, N. J., U. S. A.
Illuminated Dial Station Instruments.
These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Station Ammeter, Style B.
Weston Standard
Portable Direct Reading Voltmeters and Millivoltmeters, Ammeters and Millammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.
Our portable instruments are recognized as standards throughout the civilized world.
Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.
They are the most reliable, absolute standards for Laboratory use.

A RAILWAY FEEDER

is seldom loaded to its fullest carrying capacity except for a small portion of the daily service.

The installation of a **"Chloride Accumulator"** Sub-Station

for roads having lines extending a considerable distance from the Power House permits the use of **FEWER FEEDERS** and these **LOADED TO THEIR NORMAL CAPACITY** all the time.

In this way **MAXIMUM EFFICIENCY** is secured and a material saving in copper effected.

Bulletins illustrating the above mailed upon application.

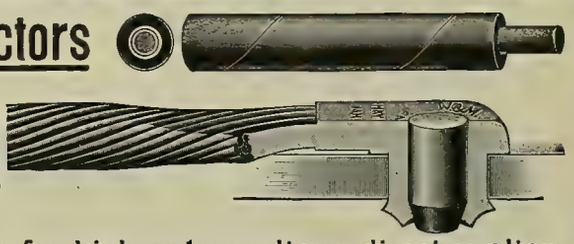
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

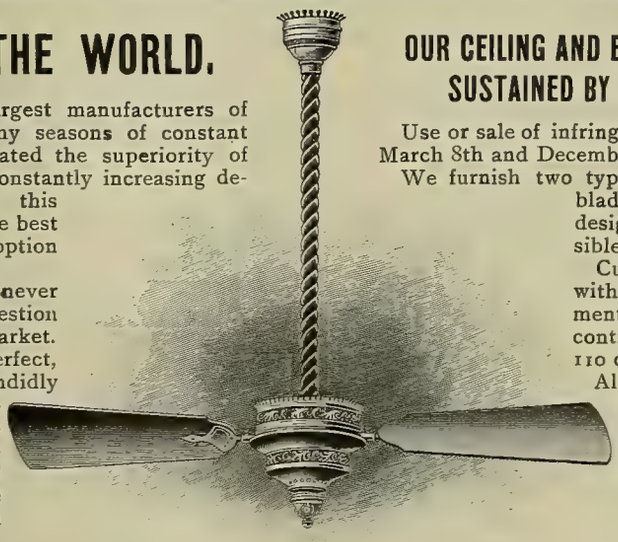
CEILING DIEHL FANS

STANDARD OF THE WORLD.

We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have absolutely demonstrated the superiority of Diehl fans, and the large and constantly increasing demand for them throughout this and other countries is one of the best recommendations for their adoption that we can offer.

Diehl fans are copied, but never equaled. They are without question the most perfect fans on the market. Electrically and mechanically perfect, attractive in appearance, splendidly finished, highly efficient, noiseless in operation, free from repairs—are some of their important features. Fourteen years' experience in the manufacture of ceiling fans assures perfection in all respects.



OUR CEILING AND ELECTROLIER FAN PATENTS SUSTAINED BY U. S. COURT DECISION.

Use or sale of infringements stopped by injunctions March 8th and December 5th, 1900.

We furnish two types of ceiling fans, two or four blades. We carry the largest line of designs and finishes to meet all possible requirements.

Cut illustrates ceiling fan No. 13 with switch. It has a very ornamental corona and basket, also switch controlling fan when operated on 110 or 220 volt circuits.

All standard fans wound for direct arc circuits of any amperage at same price as 110 volt. All ceiling fans have blades with 60-inch sweep.

Investigate the merits of Diehl fans before placing your orders.

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS.

We make very low prices for repairs of batteries manufactured by the Electric Storage Battery Company. Send us dimensions of plates required and the number and **we will make you a quotation that will save you money.** We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

LUNDELL FANS

ARE COPIED BUT NEVER EQUALED.

THE STANDARD. 100,000 IN USE.

Dealers who want quick sales and satisfied customers should handle Lundell Fans. The name **LUNDELL** is a synonym for all that is best in electric fans. See that the name **LUNDELL** is stamped on the base of every fan. The Lundell Fans give more breeze than any other fan consuming the same amount of power. They have the highest efficiency and are the most durable. Every piece of material is carefully examined and every fan is thoroughly tested before leaving the shop. Lundell Fans are made in a variety of styles and sizes to meet all requirements. Orders should be placed at once.

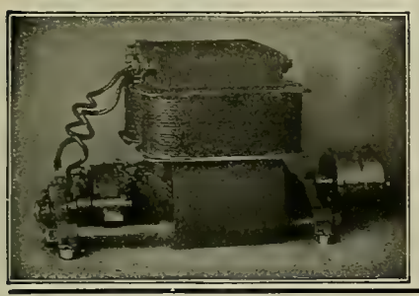
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

Teaching Over 280,000 Students By Mail

THE INTERNATIONAL CORRESPONDENCE SCHOOLS, SCRANTON, PA., is the largest educational institution in the world. It has students in every civilized country. Its enormous growth since beginning in 1891, is the result of its successful method of teaching technical subjects by mail. The International method of helping young people to support themselves while learning to become mechanical or electrical engineers or architects is explained in our latest circular entitled

Salaried Positions for Learners

Mechanical, Electrical, Steam and Civil Engineering; Architecture; Drawing; Chemistry; Telegraphy; Teaching; Stenography; Book-keeping; English Branches. When writing state subject in which interested.

Another Valuable and Important Feature of Our Switchboard System.

THE UNION DROP RACK.

In the Union Switchboard system, the drops or line signals, instead of being placed on the multiple board immediately in front of the operators, are stationed on a large rack, situated on the opposite side of the room, in plain view of all the operators. On this rack are displayed not only calls from subscribers, but the "busy" signal as well. Calls are received in the usual manner by the falling of a drop, but the busy signal consists in "the line in use" showing red; in other words, a white signal on the drop rack indicates a call from a subscriber; a red signal shows that line to be "busy." It will be seen from this that the busy test is made by a glance at the rack, instead of the usual slower motion of the hand. The drops are not crowded, hence there is no necessity for fine adjustment. Repairs and testing can be readily and quickly made.

REMEMBER:--WE ARE TELEPHONE CONTRACTORS as well as MANUFACTURERS, and stand ready to build your SWITCHBOARDS and ALL YOUR LINES; IN FACT, WE CONTRACT to build COMPLETE TELEPHONE SYSTEMS. As to date WE HAVE BUILT as many as TWENTY-ONE EXCHANGES, and 500 MILES OF LINE, WE THINK WE KNOW SOMETHING ABOUT THE "TELEPHONE CONTRACTING BUSINESS."

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. By CLARK CARYL HASKINS. Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.
Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.
The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text book for schools and colleges.

FOR ENGINEERS, DYNAMO MEN, FIREMEN, LINEMEN, WIREMEN AND LEARNERS.

DOMESTIC
Electrical Work.

Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators and for Gas Lighting from Batteries.

Illustrated with Twenty-two Diagrams.

By WILLIAM A. WITTBECKER.

Price in Paper, 25 Cents.
Price in Cloth, 50 Cents.

THE growing demand for simple electrical apparatus in dwelling houses, offices and work shops and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed.

The information given is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described.

Important Telephone Books.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.

This handbook is a complete treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.

This book describes the construction of the various forms of transmitting and receiving devices, the signaling mechanisms, and the switchboard apparatus at the central station. It is written by two well-known electricians, and has the merit of being the latest work on the subject.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.

In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view, it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Sixth edition. 16mo, 50 pp. Price 25 cents.

This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Second edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pages. 333 illustrations. Price $4.50.

HOW TO MAKE AND USE THE TELEPHONE. By Geo. H. Cary. The purpose for which this book is written is to furnish information to those who may desire to construct or use telephone apparatus or lines on a small scale. Price $1.00.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp., 168 illustrations. Price $2.00.

TELEPHONE SYSTEMS ON THE CONTINENT OF EUROPE. By Bennett. 436 pages. 169 illustrations. Price $4.50.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pages. 23 illustrations. Price $1.00.

BELL'S ELECTRIC SPEAKING TELEPHONE. Its Invention, Construction, Application, Modification and History. By Prescott. New edition, revised and enlarged 795 pages. 516 illustrations. Price $4.00.

PHILIPP REIS, INVENTOR OF THE TELEPHONE. A Biographical Sketch with Documentary Testimony. By Thompson. Translation of the original papers of the inventor and contemporary publications. 182 pages. 3 plates and 48 engravings. Price $3.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pages. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Works Published, Sent on Receipt of Price.

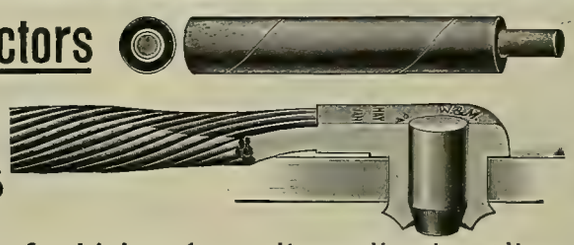
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

PARAGON FAN MOTORS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams Street, CHICAGO.

WE EXCEL AND UNDERSELL ALL

and are manufacturing and selling all kinds of

ELECTRICAL NOVELTIES AND SUPPLIES.

THE FOLLOWING ARE SOME OF OUR SPECIALTIES:

VOLTMETER.

FLASH LIGHT.

HAND LANTERN.

HERE ARE OUR PRICES. REMEMBER WE UNDERSELL ALL.

Ammeters and Voltmeters, 0 to 20	$2.00
Pocket Flash Lights	1.50
Electric Hand Lanterns	2.00
Electric Carriage Lights	5.00
Battery Fan Motors	5.95

AGENTS WANTED. Send for catalogue--JUST OUT.

OHIO ELECTRIC WORKS, - Cleveland, Ohio.

CARR COMMUTATOR TRUING DEVICE.

DIRECTLY ATTACHABLE TO ANY MACHINE HAVING A

REMOVABLE BEARING CAP.

Built in Two Sizes.

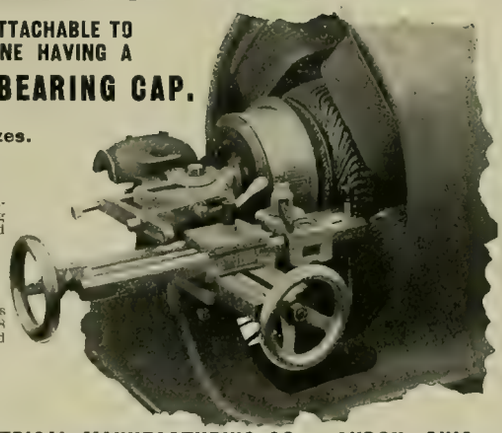
TYPE A.

Operative on Commutators up to and including 20 inches in diameter and 12 inch face.

TYPE B.

Adapted to Commutators up to and including 48 inches in diameter and 18 inch face.

WRITE FOR DESCRIPTIVE MATTER.



THE AKRON ELECTRICAL MANUFACTURING CO., AKRON, OHIO.

HIGH-GRADE PORCELAIN TUBES

300 DIFFERENT LENGTHS AND SIZES

SHOW HIGHEST TESTS YET MADE ON TUBES.

BATTERY BUSHINGS IN ALL SIZES.

ASK YOUR DEALER FOR "BRUNT" TUBES, INSULATORS AND CLEATS.

THEY COMPLY WITH THE UNDERWRITERS' REQUIREMENTS.

EVERY PIECE MARKED "BRUNT."

THE G. F. BRUNT PORCELAIN WORKS,
EAST LIVERPOOL, OHIO.

There is No Higher-Class India-Rubber Insulation For Wires and Cables than

HABIRSHAW.

Authorized Manufacturers of the

ATTIX FLEXIBLE TUBE WIRE.

The India-Rubber and Gutta-Percha Insulating Co.,

MAIN OFFICE, Glenwood Works,

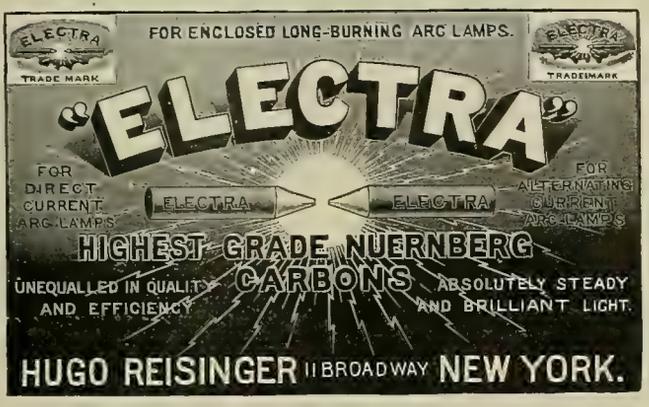
J. W. CODFREY, Manager Sales,
15 Cortlandt Street, NEW YORK.

YONKERS, N. Y.

(10923)

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

OKONITE IT NEVER DISAPPOINTS

Falcon Direct-Current

FAN MOTORS

100 to 125 and 200 to 250 volts. 12 and 16 inch.
Made with universal joint, to be used as either desk or bracket fan.

ARC LAMPS

100 to 125—200 to 240—450 to 550 volts. Life 180 hours.
Indoor use—Polished or Old Brass. Outdoor use—Japanned or Japanned Copper.

OKONITE IT NEVER DISAPPOINTS

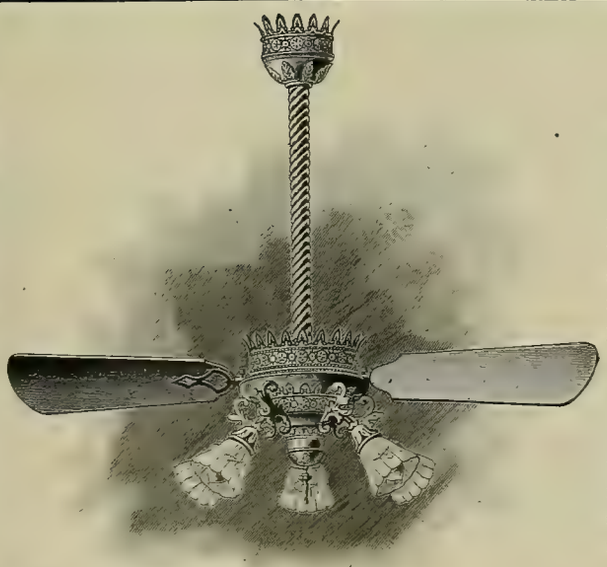
DIEHL DIEHL DIEHL DIEHL

ELECTROLIER-CEILING FANS.

Specially suitable for the finest restaurants, cafes, club houses, and all other places where only the best fans are desired.

The handsomest fan ever offered to the public. During the winter blades can be removed, making an ornamental and serviceable lighting fixture. Can be run successfully with motors on arc circuits and lights on alternating system, as the two currents are kept entirely separate throughout and are thoroughly insulated.

We carry the largest line of fans ever offered—all finishes, special designs, two or four blades. Our fans meet *all* requirements.



PATENTS SUSTAINED

March 8th and December 5th, 1900.

Our Ceiling and Electrolier fan patents have been sustained by U. S. court decision. The use or sale of infringements stopped by injunctions.

DIEHL FANS

are STANDARD OF THE WORLD. Mechanically and electrically perfect. Neat, attractive, noiseless, highly efficient. We are the pioneers in the manufacture of ceiling fans.

DIEHL MANUFACTURING CO.,

SHOW ROOMS { NEW YORK, 561-563 Broadway. CHICAGO, 192-194 Van Buren St. BOSTON, 128-132 Essex St. PHILADELPHIA, W. Irwin Cheyney & Co.

DIEHL DIEHL DIEHL DIEHL

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS. We make very low prices for repairs of batteries manufactured by the **Electric Storage Battery Company.** Send us dimensions of plates required and the number and **we will make you a quotation that will save you money.** We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

A Sure Stop.

If you are contemplating the installation of an underground heating plant, stop and investigate the HOLLY SYSTEM, the original and only successful system of underground steam distribution which has proved a mechanical and financial success.

We were the first to install the underground heating plants, and as we have had over fifteen years of experience, we can guarantee results.

Electric Companies who are operating our system report that they are paying all their fuel and station expenses and interest on the investment for steam mains from the sale of their exhaust steam. Write for our new pamphlet.

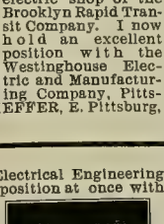
OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.



I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill.

Technical Education by Mail

The American School of Correspondence offers instruction in Engineering Courses under a staff of instructors trained in the best technical schools of the country. It is chartered under the educational laws of Massachusetts. It is located in Boston, the home of three of the foremost technical schools of the land. It is not intended to take the place of a residence school, but to enable that class of ambitious people who have no opportunity to attend a residence school to pursue—under the guidance of able instructors—studies during their leisure moments which they feel to be of value in their daily lives. To introduce the high standard of instruction the Trustees have voted to award a limited number of

Free Scholarships
In Electrical Mechanical and Steam Engineering

Including a Thorough Course in Mechanical Drawing

This offer also affords an excellent opportunity for individual and private instruction in Mathematics, the Natural Sciences and Mechanical Drawing. Prospectus on request.

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. **By CLARK CARYL HASKINS.** Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.
Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.
The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text book for schools and colleges.

FOR ENGINEERS, DYNAMO MEN, FIREMEN, LINEMEN, WIREMEN AND LEARNERS. FOR STUDY OR REFERENCE.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

Published and for sale by ELECTRICIAN PUBLISHING CO., 510 Marquette Building, Chicago

Scrap and Native Platinum Purchased. New York Office, 120 Liberty Street.

Genuine Telephone Wire

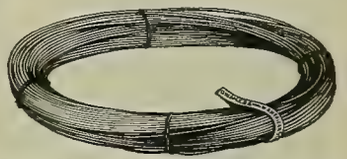
Of highest conductivity and heaviest galvanizing, made in accordance with the specifications of the largest Telegraph and Telephone Companies, has an embossed tin seal securely riveted around every bundle as follows:

NOTE THE SEALS FOR THE THREE GRADES.

W.&M. EXTRA B.B. Made By AMERICAN STEEL & WIRE CO.

W.&M. B.B. Made By AMERICAN STEEL & WIRE CO.

W.&M. STEEL Made By AMERICAN STEEL & WIRE CO.



Bundle of Telephone Wire with Seal Attached.

AVOID SUBSTITUTION of inferior wires by seeing that every bundle is tagged (according to grade) with one of these seals.

ALSO Copper Wire, bare and insulated, single and stranded, for telephone, light and power.

GALVANIZED STRAND.

AMERICAN STEEL & WIRE CO.,

THE ROOKERY, CHICAGO, ILL.

USE OR SALE OF

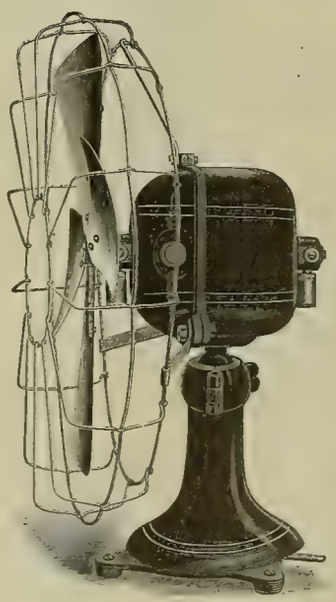
Infringements stopped by Injunctions.

Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of Infringements stopped by injunction March 8th and December 5th, 1900.

DIEHL DESK FAN MOTORS.

The enviable reputation we have established in the manufacture of high grade ceiling fans has been fully maintained in our production of ***DESK FANS.*** They are acknowledged by users to be the best ever produced. Following are some of the important features they possess:

Silk insulation on armature wires,
Hard-drawn copper commutator bars,
Self-aligning bronze bearings,
Improved self-oiling oil cup,
Unbreakable three-speed switch base,
Very strong guards—no solder used,
Body of fan richly enameled and embellished with fine gold stripes.
Absolutely the highest efficient fans on the market.



Endorsed and approved by thousands of users throughout the world. 14 years in the manufacture of fans assures perfection in all respects.

DIEHL MFG. CO.,

Main Office and Works: ELIZABETHPORT, N. J.

SHOWROOMS:

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS. We make very low prices for repairs of batteries manufactured by the **Electric Storage Battery Company.** Send us dimensions of plates required and the number and **we will make you a quotation that will save you money.** We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

LUNDELL FANS

ARE COPIED BUT NEVER EQUALED.

LUNDELL FANS have always had a higher efficiency and greater durability than any other fan.

LUNDELL FANS are the most popular and their reputation is based on their superiority.

LUNDELL FANS give a greater breeze than any other fan consuming the same amount of power.

LUNDELL FANS have the advantage of the single field coil and a strong torque.

LUNDELL FANS run easily and noiselessly and require the least attention.

LUNDELL FANS are made in a variety of styles and sizes to meet all requirements.

LUNDELL FANS are not the cheapest, but are cheaper than cheap fans and never give cause for complaints.

LUNDELL FANS sell the quickest, and all dealers should handle them if they want quick sales and satisfied customers.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

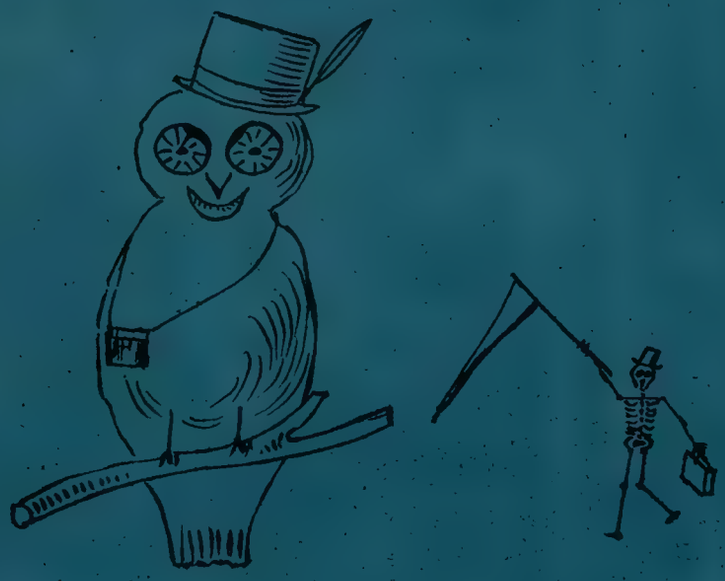
ANNOUNCEMENT!

Little Willie and The Old Man



P. S. We have a catalogue that *is* a ***catalogue***—an up-to-date catalogue. Even if you do not favor us with your business you cannot afford to be without it, ***for a number of reasons.*** If you can't guess one of those reasons from this "ad," write us.

WE HAVE MADE A NEW CONTRACT (WITH AN OLD FRIEND) AND HAVE OPENED OUR

"AD STUDIO"

AT ADDRESS BELOW. WE STIRRED UP SUCH A MUSS SEVERAL YEARS AGO, AND EVERYBODY "ROASTED" US SO, THAT WE WENT ABROAD—PARIS EXPO., ALBERT EDWARD, ETC.—BUT WE LIKE THE ELEC. SUPPLY BUSINESS, AND WHEN OUR OLD EMPLOYER, MR. PAUL CABLE, "CABLED" US, OFFERING A YEAR'S CONTRACT TO ADVERTISE HIS NEW SUPPLY HOUSE, WE—WELL, HERE WE ARE! KEEP YOUR EYE ON OUR AD STUDIO AND THE

MISSOURI ELECTRICAL MANUFACTURING CO.,

P. D. CABLE,	F. B. LITTLE,	R. W. MOORE,	W. F. LITTLE,
President.	Vice-President.	Secretary.	Treasurer.

PATENTS

Fifteen years of continual practice before the U. S. Patent Office gives me the ability to render inventors valuable service in procuring their patents. I am an electrical and mechanical expert, thoroughly conversant with U. S. and foreign patent laws.

Patent Litigation. Opinions.

F. W. BARNACLO,

809-811 Equitable Building, BALTIMORE, MD.

Washington Office, 602 F Street, N. W.

NEW PRICE FOR 1901.

ASPHALT PAPER CONDUIT

GUARANTEED TO STAND 50,000 VOLTS.

UNDERGROUND AND INTERIOR.

GUARANTEED ABSOLUTELY ELECTROLYSIS PROOF.

An absolute Non-Conductor. Guarantees perfect insulation. No bonding of cables in its use. Better service over cables enclosed in it. Construction very rapid, using only ordinary labor.

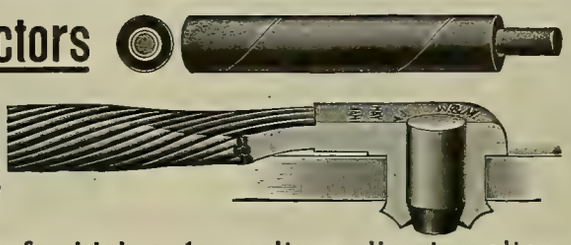
Price, F. O. B. destination, cheaper than any other Conduit.

For prompt delivery for 1901 orders should be placed now.

ELECTROLYSIS PROOF CONDUIT MFG. CO.,

605 MANHATTAN BLDG., CHICAGO.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

AMERICAN SCHOOL of CORRESPONDENCE

The AMERICAN SCHOOL OF CORRESPONDENCE offers ambitious men the opportunity of a lifetime to get a technical education.
Send for prospectus describing the

FREE SCHOLARSHIPS in Stationary, Electrical, Mechanical, Marine and Locomotive Engineering, Heating, Ventilation and Plumbing, Mechanical Drawing.

This offer is made for the purpose of securing a few representative students in all parts of the country, in the confident belief that they will advertise the school more effectually by their progress than an army of agents.

Why the **American School of Correspondence** is Superior to all other correspondence schools:

It is conducted as an Educational Institution and **not as a commercial enterprise.**

It is chartered by the Commonwealth of Massachusetts as an institution of learning.

It is located in the educational and industrial center of the country.

It is in close proximity to three of the greatest technical schools of the land, and a number of the instructors are also regular teachers in two of these schools.

It appeals to educated men; among its students are graduates from Cornell, University of Wisconsin, Massachusetts Institute of Technology, Worcester Polytechnic Institute, Bowdoin College, etc., etc.

AMERICAN SCHOOL OF CORRESPONDENCE.
(Chartered by the Commonwealth of Massachusetts.)

DIEHL ELECTRIC FAN

patents sustained March 8th and December 5th, 1900. Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of infringements stopped by injunctions.

BRACKET FAN MOTORS.

Adapted for use in many places where it would be impracticable to use the desk pattern. They possess all the good features of our desk fan motors. Endorsed and approved by thousands of users throughout the world. Thoroughly efficient, highly durable. Made with universal joint which admits of turning of fan in any direction, up, down or sidewise. Furnished with starting and regulating switch, three variations of speed.

OUR CEILING FANS

have no equal. Adopted by most of the central stations throughout the world on account of their high efficiency, durability and freedom from repairs. We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have demonstrated the superiority of our products and the great demand for them throughout the world is one of the best recommendations that we can offer for their adoption. Catalogues on application.

ABOUT

Eaco Hotel Telephone Service.

The greatest opening in the country for work for contractors. Nine-tenths of the hotels in the United States have unsatisfactory annunciator systems. The Eaco Hotel Telephone system makes the service of even a poor hotel superior. No hotel man will refuse to listen to a proposition to make his house more efficient and serviceable to the general public.

FIBRE-GRAPHITE COMMUTATOR BRUSH
SELF-LUBRICATING
NOISELESS

There's No Friction

with the Fibre-Graphite Commutator Brush. Being 90 per cent. pure graphite, it insures low resistance, no sparking under a varying load, and longer wear. There is no greasing required. The Fibre-Graphite is therefore the most economic brush on the market. Send for price list.

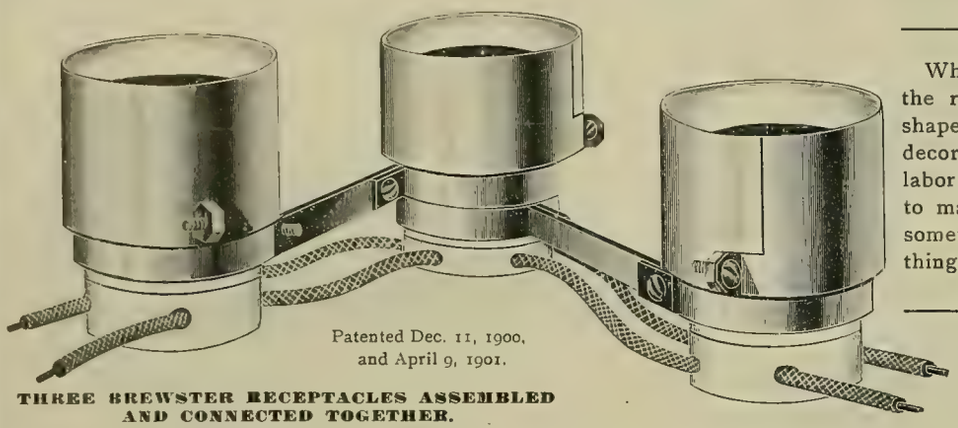
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

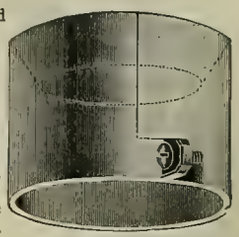
From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.

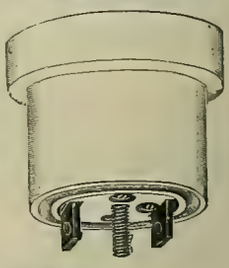


Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.



When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.



PARTS OF THE UNIT READY TO ASSEMBLE.

"THE CONNECTING LINK."

Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

---

5 or 6-inch

STOMBAUGH GUY ANCHORS,

With or Without Rods,

Will hold the strain of any ordinary telephone, electric light or railway pole.

THE NET COST.

5-inch, without rod,	$0.42	6-inch, without rod,	$0.75
5-inch, with rod,	.69	6-inch, with rod,	1.35
5-inch Wrench, -	1.80	6-inch Wrench, -	3.06

8-inch Anchor, with rod, will hold the heaviest strain, 4.50
A Wrench must be used for all 5 and 6-inch Anchors.

15 or 20 minutes is all that is required to bore them into the ground—then they are ready to take the strain.

Best results follow where Anchors with rods are used.
See our offer in last week's Western Electrician.

A TELEPHONE SWITCHBOARD

SHOULD POSSESS THE FOLLOWING QUALITIES:

Swiftness of Operation,
Simplicity of Construction,
Facility of Inspection,
Freedom from Complications,

Neatness of Design—Least Possible Chance for Trouble—Greatest Possible Ease and Quickness of Repairing—Positiveness of Busy Signal.

THESE ARE SOME OF THE GOOD POINTS OF THE UNION SWITCHBOARD. THERE ARE OTHERS.

Our new Automatic Call and Supervisory Signal are the most positive and reliable on the market. NO BATTERY STANDING ON THE LINE.

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. **By CLARK CARYL HASKINS.** Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.

Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.

The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text book for schools and colleges.

FOR ENGINEERS, DYNAMO MEN, FIREMEN, LINEMEN, WIREMEN AND LEARNERS. FOR STUDY OR REFERENCE.

Our Students Succeed

Our instruction helps students to better positions and higher salaries. This is what a student says:

A Lineman Benefited.

My course has been a benefit to me in many ways. When I enrolled, I was working as a lineman. Owing to the excellence of your instruction, I was advanced to the position of dynamo tender, and then to trimmer, with an increase in wages. I am now getting practical experience in handling machinery and winding armatures. I shall always be a good friend of the schools.

CUTTER ELECTRICAL CO., PHILADELPHIA

A Third Reason
why Bullock Generators and Motors are always selected by good engineers is because they are well ventilated. In building the armature core, spacing pieces, made of embossed iron, are inserted at short intervals, thus avoiding useless metal as when brass ventilating plates are used. In operation the air rushes through the slots thus formed, keeping the windings and core perfectly cool. Send for our descriptive bulletins.
Bullock Electric Mfg. Co.,
Cincinnati, U. S. A.

We have purchased the plant, good will, etc., of the NATIONAL ELECTRICAL MANUFACTURING COMPANY, of Milford, Conn., which is rapidly being enlarged, and can beat the world in prices on the instruments, supplies, etc., manufactured by us. We make only the best.

A BATTERY OF "Chloride Accumulators"

is the simplest and most satisfactory means of regulating pressure at THE END OF A LONG RAILWAY FEEDER which requires large amounts of energy for short periods.

A MATERIAL ECONOMY IS GAINED by keeping the generators fully loaded and a safeguard is secured in case of emergency.

Bulletins illustrating the application of Chloride Accumulators to Electric Railways mailed upon request.

THE ELECTRIC STORAGE BATTERY CO.

Genuine Telephone Wire

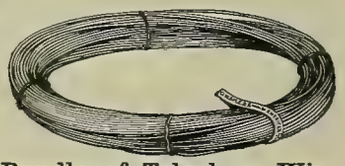
Of highest conductivity and heaviest galvanizing, made in accordance with the specifications of the largest Telegraph and Telephone Companies, has an embossed tin seal securely riveted around every bundle as follows:

NOTE THE SEALS FOR THE THREE GRADES.

W.&M. EXTRA B.B. Made By AMERICAN STEEL & WIRE CO.

W. & M. B.B. Made By AMERICAN STEEL & WIRE CO.

W. & M. STEEL Made By AMERICAN STEEL & WIRE CO.



Bundle of Telephone Wire with Seal Attached.

AVOID SUBSTITUTION of inferior wires by seeing that every bundle is tagged (according to grade) with one of these seals.

ALSO Copper Wire, bare and insulated, single and stranded, for telephone, light and power.

GALVANIZED STRAND.

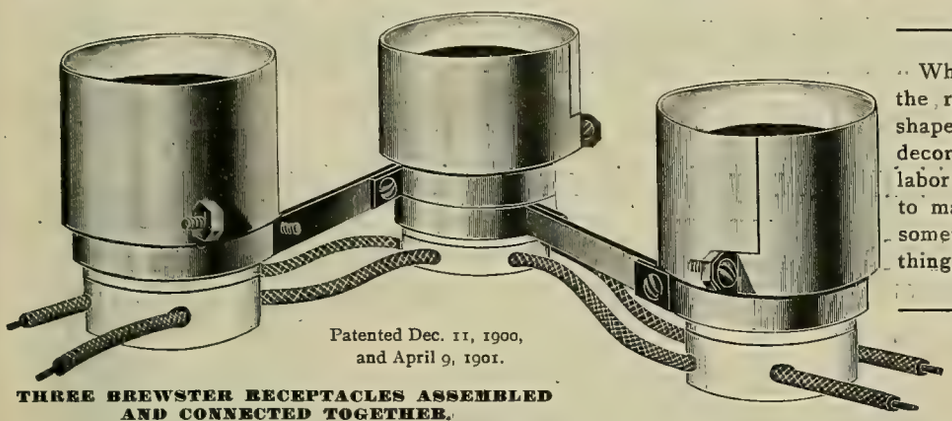
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

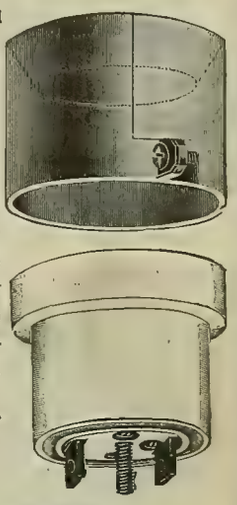
ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.



Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.

When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.



Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

"THE CONNECTING LINK."

Will guarantee 3¾ Ampere Lamp to give the same light as an ordinary 5 Ampere Lamp

NO DEAD RESISTANCE

The Patents are fundamental and are owned by this Company

HELIOS-UPTON COMPANY, PHILADELPHIA, PA.

CEILING DIEHL FANS

STANDARD OF THE WORLD.

We are the original and largest manufacturers of ceiling fans in the world. Many seasons of constant use have absolutely demonstrated the superiority of Diehl fans, and the large and constantly increasing demand for them throughout this and other countries is one of the best recommendations for their adoption that we can offer.

Diehl fans are copied, but never equaled. They are without question the most perfect fans on the market. Electrically and mechanically perfect, attractive in appearance, splendidly finished, highly efficient, noiseless in operation, free from repairs—are some of their important features. Fourteen years' experience in the manufacture of ceiling fans assures perfection in all respects.

OUR CEILING AND ELECTROLIER FAN PATENTS SUSTAINED BY U. S. COURT DECISION.

Use or sale of infringements stopped by injunctions March 8th and December 5th, 1900.

We furnish two types of ceiling fans, two or four blades. We carry the largest line of designs and finishes to meet all possible requirements.

Cut illustrates ceiling fan No. 13 with switch. It has a very ornamental corona and basket, also switch controlling fan when operated on 110 or 220 volt circuits.

All standard fans wound for direct arc circuits of any amperage at same price as 110 volt. All ceiling fans have blades with 60-inch sweep.

Investigate the merits of Diehl fans before placing your orders.

Write us for Prices, Descriptive Matter and Catalogues.

MAY 17TH

WILL BE PRESS DAY FOR THE FIRST SPECIAL NUMBER OF THE WESTERN ELECTRICIAN, COVERING THE NIAGARA FALLS MEETING OF THE NATIONAL ELECTRIC LIGHT ASSOCIATION.

COPY FOR ADVERTISEMENTS CANNOT BE RECEIVED AFTER MAY 16th, AND SHOULD BE FORWARDED MUCH EARLIER TO SECURE THE BEST ATTENTION AND GOOD LOCATION. IT IS NOT TOO EARLY NOW TO FORWARD COPY.

THIS SPECIAL INTERNATIONAL NUMBER, BESIDES CIRCULATING THE WORLD OVER, WILL BE MUCH IN EVIDENCE AT THE CONVENTION ITSELF AND AT THE PAN-AMERICAN EXPOSITION, AND WILL CONTAIN MANY SPECIAL FEATURES INTERESTING TO THE DELEGATES AND VISITORS TO THE CONVENTION AND TO THE PAN-AMERICAN EXPOSITION.

MAY 24TH

WILL BE PRESS DAY FOR OUR SPECIAL CONVENTION REPORT NUMBER (COPY RECEIVED UP TO MAY 23d), IN WHICH WILL APPEAR A FULL REPORT OF THE NIAGARA MEETING, INCLUDING A FULL ACCOUNT OF THE PROCEEDINGS, NEWS AND GOSSIP OF THE CONVENTION, NAMES OF THE NEW OFFICERS, AND OF THE DELEGATES AND OTHERS ATTENDING THE MEETING, AND EVERYTHING OF VALUE AND INTEREST RELATING TO THIS NOTABLE GATHERING OF LEADING ELECTRIC LIGHT AND POWER MEN.

BOTH OF THESE NUMBERS WILL BE ILLUSTRATED IN THE WESTERN ELECTRICIAN'S BEST STYLE, AND UNDOUBTEDLY THEY WILL BE THE MOST VALUABLE AND WIDELY CIRCULATED ELECTRIC LIGHT AND POWER NUMBERS ISSUED BY ANY JOURNAL DURING THE ENTIRE YEAR.

BENEFIT YOUR BUSINESS BY PLACING A LIBERAL ADVERTISING ANNOUNCEMENT IN BOTH OF THESE

SPECIAL INTERNATIONAL NUMBERS.

AS GOOD AS THE NAME.

COLUMBIA CARBONS

FOR ENCLOSED AND OPEN ARCS.

A FEW YEARS AGO PRACTICALLY ALL THE HIGH GRADE CARBONS CONSUMED IN THE U. S. WERE SUPPLIED BY IMPORTERS. TODAY WE ARE SUPPLYING THE BULK OF THE TRADE IN THIS COUNTRY REQUIRING HIGH GRADE CARBONS BECAUSE COLUMBIA CARBONS ARE

GUARANTEED SUPERIOR

TO ANY IMPORTED CARBON. SEND US A TRIAL ORDER. IF THEY ARE NOT ALL WE CLAIM FOR THEM, YOU CAN RETURN THEM AT OUR EXPENSE. THE PRINCIPAL CENTRAL STATIONS HAVE DISCARDED IMPORTED CARBONS FOR THE COLUMBIA BECAUSE THEY ARE ACKNOWLEDGED FAR SUPERIOR

TO IMPORTED CARBONS.

SAMPLES FURNISHED FREE OF EXPENSE.

WANTED.

A case of a reception paid in a growing western town; [illegible] of years. Would like to hear from parties having a plant for sale or lease. Address G. P. D., 1,000 Ld. 2820 Western Ave., Mattoon, Ill.

WANTED.

A good, temperate, industrious man for a small electric light plant. Must understand boilers, engines and dynamos and be able to do line work. Address "W. T.," care Western Electrician, 510 Marquette Building, Chicago.

WANTED.

Salesman for an electrical supply house in Michigan. Would be part of the time in the house and part of the time on the road. State qualifications, salary expected, where last employed, etc. Address BOX 310, care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Position by engineer who has had 12 years' practical experience with Corliss and high speed engines, boilers, pumps, dynamos (both alternating and direct current), line work and wiring. Can furnish good references. Will call and see parties in need of an engineer. Address "ENGINEER," care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Experienced and thoroughly competent mechanical draftsman and designer. Permanent position to the right person. Address MILWAUKEE ELECTRIC CO., 286 Reed Street, Milwaukee, Wis.

WANTED.

First-class experienced mechanical draftsmen wanted at once; some of them acquainted with electrical work. Those with shop experience preferred. Apply by letter to Chief Draftsman, P. O. Box 911, Pittsburg, Pa., stating experience in full and giving references.

WANTED.

By an electric construction company in Michigan, a competent man to act as general foreman in charge of construction work. Must be experienced and active. State age, qualifications, references, etc. Address "Box 210," care Western Electrician, 510 Marquette Building, Chicago.

WANTED.

A position is offered with a firm of electrical contractors to an educated man capable of making estimates and getting business. Apply, giving experience and full particulars, to "Box 110," care Western Electrician, 510 Marquette Building, Chicago.

U. S. ENGINEER OFFICE, 735 N. Capitol St., Washington, D. C., April 10, 1901. Sealed proposals will be received here until noon, May 9, 1901, and then publicly opened, for furnishing cast iron and steel cable racks, porcelain insulator clamps, insulators and accessories, for electrical installation for New Building for Government Printing Office. Information furnished on application. JOHN STEPHEN SEWELL, Capt. Engrs.

WANTED.

Situation by an all-around engineer, electrician and machinist; 18 years' experience in the care of electric light, waterworks and electric power plants, electric and compressed air and mining machinery. At present master mechanic of a large mining plant. Good reasons for leaving. Steady, honest and strictly temperate. Best of references. Competent to take charge of any plant. Would like steady position. Address Y., care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

A young man of experience to manage a telephone exchange of 150 subscribers in a Southern Kentucky town of 3,000 inhabitants. Must have first-class recommendations. Address "KENTUCKY," care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Partner or company wanted with some money to extend and complete an A1 Mutual Telephone plant in Iowa. All new and paying 18%. We invite close investigation. Or would not object to going into a mutual consolidation on equitable terms, which we believe could be effected by, and made to pay in, our vicinity. Address "TELEPHONE," care Western Electrician, 510 Marquette Bldg., Chicago.

TO EXCHANGE.

Telephony scholarship in the International Correspondence School, for buggy. Must be in good condition. Address J. J. SHELTON, Poseyville, Ind.

NOTICE TO CONTRACTORS.

St. Joseph, Mich., April 12, 1901.

Sealed proposals will be received by the Board of Public Works of St. Joseph, Mich., until 1 o'clock p. m., May 9, 1901, for furnishing all labor and material necessary to construct a complete electric light plant for lighting the streets of the city of St. Joseph, Mich. Propositions will be considered on constant current arc dynamo, also on alternating dynamo.

The plant will consist of the following:

One dynamo, capacity 125 enclosed arc lamps each.

One 100-horsepower gas engine.

One hundred and twenty enclosed arc lamps.

One gasoline tank to hold 5,000 gallons.

About 11 miles pole and wire line.

Bids must be made upon blank forms furnished by the city. Each bid must be accompanied by a certified check for the sum of $500. The Board of Public Works reserves the right to reject any and all bids. Plans and specifications are on file with the Board of Public Works, St. Joseph, Mich. Also with H. D. Hallett, engineer, 108 Grand avenue, Aurora, Ill.

FRANK N. WILKINSON,
Chairman Lighting Committee.

Franchise and Grounds

For a term of years will be given by the village of Cabery, Ill., for electric-light purposes and pumping water for the village. Cabery is a prosperous town of about 600 people. A good patronage can easily be obtained. For full particulars address P. M. RAVENSKILDE, Trustee of the village of Cabery, Ill.

ELECTRIC LIGHTS AND WATER

Bids will be received by the City Council of Carrollton, Ill., up to May 9, 1901, for lighting city with 45 arc lights, of 2,000 candlepower each, and for operating city waterworks.

Propositions for lighting must be submitted under Common Sense schedule, and per 1,000 lamp hours, and must be accompanied by a certified check for $250.00. A 5-year contract and a 10-year franchise will be given. Bids to be sealed and addressed to D. E. Fox, chairman of Waterworks Committee, Carrollton, Ill. The City reserves the right to reject any and all bids, and to terminate pumping contract on thirty days' notice.

M. E. McMAHON, Mayor.
ROY PENDT, Clerk.

Carrollton, Ill., April 20, 1901.

WANTED.

Situation by practical electrician who is capable of doing general electrical work; electrical construction superintendency solicited. Address "E. J.," care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

One 100 to 120 K. W., 500 volt, D. C. generator. Also an engine, either Corliss or high speed, to operate same. Apparatus must be in good operative condition and reasonable in price. BELLEVILLE DEEP WELL WATER CO., Belleville, Ill.

TELEPHONES FOR $5.25 EACH!

Splendid bargains in standard make telephones of which exchange managers and others should avail themselves. By special arrangement with various telephone companies we have come into possession of a large number of "used" telephones. While they have seen more or less service, they are, nevertheless, in first-class condition. They have been thoroughly tested and overhauled and are in perfect working order. They are complete, and of standard make. Will be sold for $5.25 each while they last. We also have several hundred 'phones ranging in price from $5.75 to $7.50 each. These are also of standard make and of a slightly better grade than our leader. They are the biggest bargains ever offered to users of telephones.

TELEPHONE SUPPLIES.

We are also in position to furnish anything in telephone supplies — wire, batteries, tools, brackets, pins, cross-arms, insulators, etc., at prices that will astonish you. We can also furnish a number of high-grade switchboards, of various capacities, in fine condition, at ridiculously low figures. Let us tell you about them.

DYNAMOS AND MOTORS.

We sell the "Chicago" noiseless dynamos and motors at one-third the price of other makes. They range in size from 12 to 200 lights and from ¼ to 12 horsepower. We sell them under an absolutely binding guarantee for two years' service. They are as good as any machine on the market. It will pay you to look into them.

BELTING.

We carry in stock for immediate shipment a large quantity of short lap, oak tanned leather belting, fully guaranteed, all widths, single and double thick, at 70 and 5 per cent discount from standard prices.

OUR CATALOG NUMBER 156 GIVES FULL information concerning the above and our other bargains in second-hand machinery and electrical supplies of all kinds. Mailed on request.

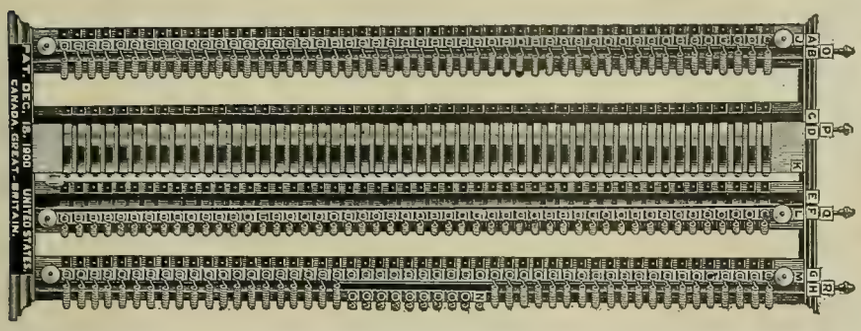
SWEDISH-AMERICAN TELEPHONE CO.

69-71-73-75 West Jackson Boulevard,
Chicago, Ill.

TELEPHONE PROPERTY IS AT LAST MADE SAFE.



On the 18th day of December 1900, the United States Government granted a patent to the undersigned which, in the opinion of every practical man who has examined it, is the safest, surest and most complete protection to electrical apparatus, and more especially to telephone switchboards and telephone property generally, that has ever been attempted. This patent is known as an "ELECTRIC SWITCH," patent No. 664,061, and has recently been patented in foreign countries.

WHAT THE INVENTION ACTUALLY ACCOMPLISHES.

First: Instead of the universal annoying disadvantage of the uncertain contact of the old style screw and washer, a certain safe and sure contact is secured.

Second: All practical men realize that no lightning arresters nor diverters of high pressure currents give perfect immunity from damage and destruction to switchboards and telephone property; this device makes all such property as safe as any other property. Under the old style, the tedious labor, and the long time required to disconnect the conductors, made it practically impossible to do so, and for these reasons failed absolutely to avert serious loss. The damage in nine cases out of ten had been sustained before the switchboards could possibly be disconnected. With this switch one thousand subscribers can be easily disconnected within ten seconds, and every conductor grounded, making the telephone property as well as the building perfectly secure. Another strong feature of the invention is that every conductor can be as quickly connected as disconnected, requiring no loss of time whatsoever. The switch is as readily attached to metallic circuits as to common returns, and ground and wire.

Fourth: The very strongest feature of this important invention, and the one of paramount importance to all telephone property holders, is the quick and sure means to shield telephone property positively and without doubt from the storm, and to obviate terrific damage and often absolute destruction, for however appalling the storm, and however distressing the anxiety and the solicitude for the exchange, the most obtuse and inexperienced operator can instantly disconnect and ground every conductor of the exchange. Again, we care not what voltage from arc circuits or from trolley lines are poured into the exchange, this switch diverts the currents to earth, and all is safe. This fact being true, it is worth many times more than its cost for the quietude and peace of mind it affords. Surely, from a business and commercial standpoint, no exchange can afford to be without this safeguard to valuable property.

For testimonials, further particulars and explanation of cut, address

ONE OF THE LATEST FEATURES OF THE

Union Switchboard Co.'s

NEW SYSTEM

Is an automatic subscriber's call, without battery standing on the line.

Do you appreciate the value of this?

It means that if a line becomes grounded the subscriber on that line is not prevented from signaling exchange, as is the case with other automatic calls.

We have other novel features that make our system the SIMPLEST, SWIFTEST and LEAST EXPENSIVE to construct and operate.

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.

Especially adapted to all kinds of

ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:

The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."

Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS.

We make very low prices for repairs of batteries manufactured by the **Electric Storage Battery Company.** Send us dimensions of plates required and the number and **we will make you a quotation that will save you money.** We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

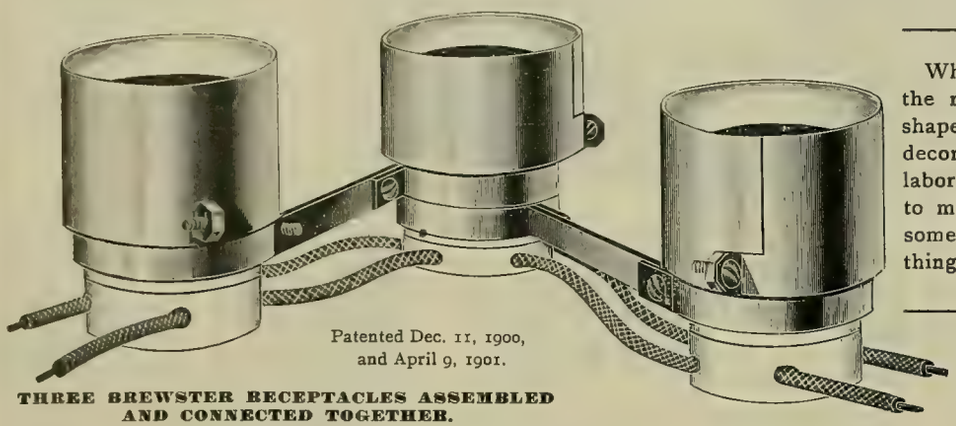
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

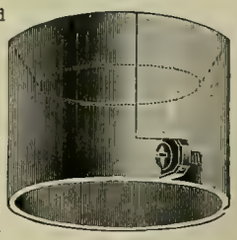
From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

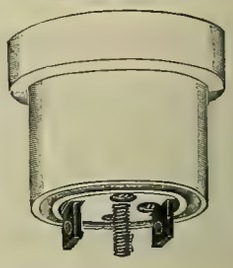
ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.



Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.





When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.

Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

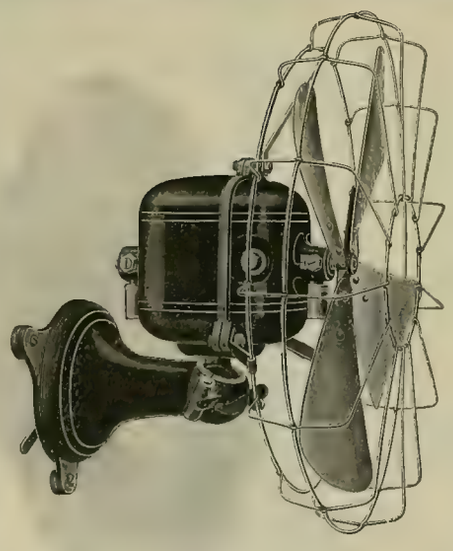
USE OR SALE OF

Infringements stopped by Injunctions.

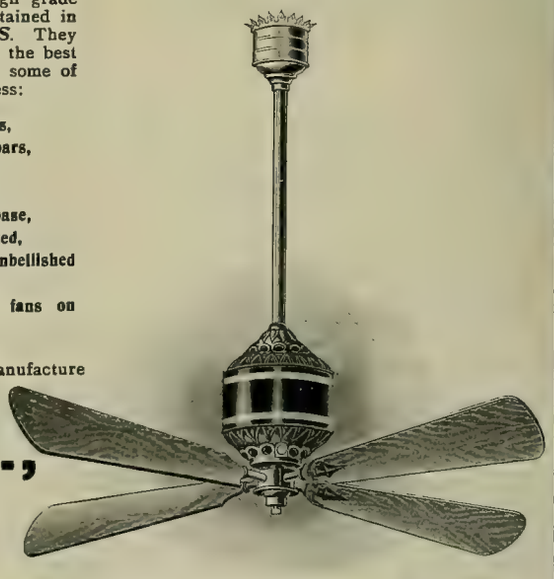
Our ceiling and electrolier fan patents sustained by U. S. court decision. Use or sale of infringements stopped by injunction March 8th and December 5th, 1900.

DIEHL DESK FAN MOTORS.



The enviable reputation we have established in the manufacture of high grade ceiling fans has been fully maintained in our production of *DESK FANS*. They are acknowledged by users to be the best ever produced. Following are some of the important features they possess:

Silk insulation on armature wires,
Hard-drawn copper commutator bars,
Self-aligning bronze bearings,
Improved self-oiling oil cup,
Unbreakable three-speed switch base,
Very strong guards—no solder used,
Body of fan richly enameled and embellished with fine gold stripes.
Absolutely the highest efficient fans on the market.



Endorsed and approved by thousands of users throughout the world. 14 years in the manufacture of fans assures perfection in all respects.

General Offices, 1216 Washington Avenue, ST. LOUIS, MO.

MAY 17TH

WILL BE PRESS DAY FOR THE FIRST SPECIAL NUMBER OF THE WESTERN ELECTRICIAN, COVERING THE NIAGARA FALLS MEETING OF THE NATIONAL ELECTRIC LIGHT ASSOCIATION.

COPY FOR ADVERTISEMENTS CANNOT BE RECEIVED AFTER MAY 16th, AND SHOULD BE FORWARDED MUCH EARLIER TO SECURE THE BEST ATTENTION AND GOOD LOCATION. IT IS NOT TOO EARLY NOW TO FORWARD COPY.

THIS SPECIAL INTERNATIONAL NUMBER, BESIDES CIRCULATING THE WORLD OVER, WILL BE MUCH IN EVIDENCE AT THE CONVENTION ITSELF AND AT THE PAN-AMERICAN EXPOSITION, AND WILL CONTAIN MANY SPECIAL FEATURES INTERESTING TO THE DELEGATES AND VISITORS TO THE CONVENTION AND TO THE PAN-AMERICAN EXPOSITION.

MAY 24TH

WILL BE PRESS DAY FOR OUR SPECIAL CONVENTION REPORT NUMBER (COPY RECEIVED UP TO MAY 23d), IN WHICH WILL APPEAR A FULL REPORT OF THE NIAGARA MEETING, INCLUDING A FULL ACCOUNT OF THE PROCEEDINGS, NEWS AND GOSSIP OF THE CONVENTION, NAMES OF THE NEW OFFICERS, AND OF THE DELEGATES AND OTHERS ATTENDING THE MEETING, AND EVERYTHING OF VALUE AND INTEREST RELATING TO THIS NOTABLE GATHERING OF LEADING ELECTRIC LIGHT AND POWER MEN.

BOTH OF THESE NUMBERS WILL BE ILLUSTRATED IN THE WESTERN ELECTRICIAN'S BEST STYLE, AND UNDOUBTEDLY THEY WILL BE THE MOST VALUABLE AND WIDELY CIRCULATED ELECTRIC LIGHT AND POWER NUMBERS ISSUED BY ANY JOURNAL DURING THE ENTIRE YEAR.

BENEFIT YOUR BUSINESS BY PLACING A LIBERAL ADVERTISING ANNOUNCEMENT IN BOTH OF THESE

SPECIAL INTERNATIONAL NUMBERS.

85% Loss 85% Loss 85% Loss 85% Loss 85% Loss

An Endless Chain of Losses!

Electric Light and Power Companies all over the country are losing **85** per cent. of their profits by not utilizing their exhaust steam. Their more progressive brethren, who have installed the ***Holly System of Underground Mains,*** are enabled to pay their *entire coal and labor bill for the year and 6 per cent. on the investment* from the sale of exhaust steam.

Under the circumstances, can you longer afford to turn a deaf ear to our wishes to let us explain our system thoroughly? A word from you will bring facts and figures that will astonish you. Write for our new pamphlet.

Columbus Storage Batteries

Are being thoroughly tested in splendidly equipped laboratories of some of the largest electrical manufacturing establishments in the United States. Supply houses, telephone exchanges, universities, etc., are likewise making complete tests. They all confirm the claims which we make for high efficiency, low internal resistance and unusually uniform discharge.

The tests prove conclusively that the cells have a capacity equal to their rating.

The active material will not disintegrate, for, due to the special treatment which it receives, it has a consistency resembling limestone.

Technical Education by Mail

The American School of Correspondence offers instruction in Engineering Courses under a staff of instructors trained in the best technical schools of the country. It is chartered under the educational laws of Massachusetts. It is located in Boston, the home of three of the foremost technical schools of the land. It is not intended to take the place of a residence school, but to enable that class of ambitious people who have no opportunity to attend a residence school to pursue—under the guidance of able instructors—studies during their leisure moments which they feel to be of value in their daily lives. To introduce the high standard of instruction the Trustees have voted to award a limited number of

Free Scholarships

In Electrical Mechanical and Steam Engineering

Including a Thorough Course in Mechanical Drawing

This offer also affords an excellent opportunity for individual and private instruction in Mathematics, the Natural Sciences and Mechanical Drawing. Prospectus on request.

AMERICAN SCHOOL OF CORRESPONDENCE
Boston, Mass., U. S. A.

Our Students Succeed

Our instruction helps students to better positions and higher salaries. This is what a student says:

A Lineman Benefited.

My course has been a benefit to me in many ways. When I enrolled, I was working as a lineman. Owing to the excellence of your instruction, I was advanced to the position of dynamo tender, and then to trimmer, with an increase in wages. I am now getting practical experience in handling machinery and winding armatures. I shall always be a good friend of the schools.

FRED W. HOUGHTALING,
Three Rivers, Mich.

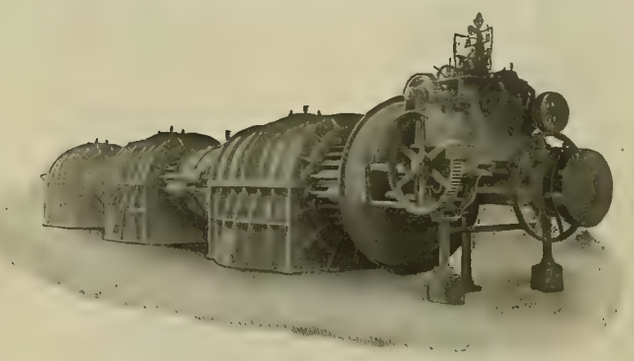
VICTOR TURBINES

OPERATING DYNAMOS.

That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.



FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

We Also Have a Full Line of Modern Patterns for Gears and Power Transmission Machinery.

American Telephone Practice

By KEMPSTER B. MILLER, M. E.

CONTENTS.

CHAPTER I.—History and Principles of the Magneto Telephone. II.—History and Principles of the Battery Transmitter. III.—The Telephone Receiver. IV.—Carbon Transmitters. V.—Induction Coils. VI.—Batteries. VII.—Calling Apparatus. VIII.—The Automatic Shunt. IX.—The Hook Switch, and Circuits of a Telephone. X.—Commercial Calling Apparatus. XI.—The Telephone Relay or Repeater. XII.—Self-Induction and Capacity. XIII.—Telephone Lines. XIV.—Simple Switchboards for Small Exchanges. XV.—Listening and Ringing Apparatus for Switchboards. XVI.—Self-Restoring Switchboard Drops. XVII.—Complete Switchboards for Small Exchanges. XVIII.—Lamp Signal Switchboards. XIX.—The Multiple Switchboard. XX.—Transfer Systems. XXI.—Common-Battery Systems. XXII.—House Systems. XXIII.—Protective Devices. XXIV.—Distributing Boards. XXV.—Party Lines Non-Selective. XXVI.—Party Lines. Step by Step Selective Signaling. XXVII.—Selective Signaling by Strength and Polarity. XXVIII.—Harmonic Systems of Selective Signaling. XXIX.—Wire for Telephone Use. XXX.—Pole Line Construction. XXXI.—Overhead Cable Construction. XXXII.—Underground Cable Construction. XXXIII.—Testing. XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

IF

You bought a bicycle, you would not choose one with iron tires and cone bearings.
You bought a clock, you would not choose one with wooden wheels.
You want a light, you don't use a dish of grease with a rag.
You want to travel, you don't go on a canalboat.
You take your girl for a ride, you don't use an ox team.
You want the latest news, you don't look in the almanac.
You get sick, the doctors don't bleed (?) you (that is, your veins).
You harvest your wheat, you don't cut it with a scythe.
You want to talk from one point to another, you don't want to be compelled to use a megaphone.
You buy a telephone you should not want one equipped with antiquated Transmitters and Receivers—Transmitters that have ancient and crude methods for retaining carbon granules, such as corn plasters, felt, flannel rags, etc., etc.; also carbon diaphragms,

BUT

YOU DO WANT AN UP-TO-DATE SCIENTIFIC DEVICE, AS SHOWN HEREWITH.
PAT. SEPT. 5th, 1899, No. 632,355. | PAT. FEB. 5th, 1901, No. 667,327.

ONE OF THE LATEST FEATURES OF THE

Union Switchboard Co.'s

NEW SYSTEM

Is an automatic subscriber's call, without battery standing on the line.

Do you appreciate the value of this?

It means that if a line becomes grounded the subscriber on that line is not prevented from signaling exchange, as is the case with other automatic calls.

We have other novel features that make our system the SIMPLEST, SWIFTEST and LEAST EXPENSIVE to construct and operate.

The Union Switchboard Company,

ERIE, PA.

You cannot operate this machine with a penny on a string or by working wires through slots.

TRY THE OTHERS.

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. By CLARK CARYL HASKINS. Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.

Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.

The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text book for schools and colleges.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy, Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

FORT WAYNE ELECTRIC WORKS.

(INCORPORATED.)

SOMETHING NEW

Our TYPE K Integrating Wattmeter

Weighs less than 13 pounds and can be installed in a space 6¾ inches by 8¾ inches.

SOME INTERESTING POINTS.

This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.
It can be quickly Adjusted for Either HIGH OR LOW FREQUENCY.
No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.
CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.
ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

Write for Bulletin 1012.

Weston "Round Pattern" Ammeter, Type F.

BERLIN—European Weston Electrical Instrument Co., Ritterstrasse No. 38.
LONDON—Elliott Bros., No. 101 St. Martin's Lane.

We desire to call attention to a line of **cheap** but excellent Switchboard Instruments for Direct Current Circuits, which we designate as

"Round Pattern," Style F.

These Instruments are particularly suitable for Isolated Plants and Feeder Circuits in Railway and Power Plants. Voltmeters in ranges from 3 to 750 volts. Ammeters in ranges from 1 to 2,500 amp. All Weston Instruments are unsurpassed in excellence of workmanship, in accuracy and economy of operation.

Mention the Western Electrician when writing for catalogue.

A Fifth Reason

why good engineers select Bullock Dynamos and Motors is because the coils of the armature are protected from mechanical injury. This is accomplished by wooden wedges inserted into grooves near the top of the slots. These wedges also serve to retain the coils and make band wires unnecessary. Send for our descriptive bulletins.

We have purchased the plant, good will, etc., of the NATIONAL ELECTRICAL MANUFACTURING COMPANY, of Milford, Conn., and are adding valuable improvements to the District Call Boxes and Registers manufactured by said company. Our new plant is rapidly being enlarged, and we can beat the world in prices on the instruments, supplies, etc., manufactured by us. We make only the best.

A BATTERY OF "Chloride Accumulators"

is the simplest and most satisfactory means of regulating pressure at THE END OF A LONG RAILWAY FEEDER which requires large amounts of energy for short periods.

A MATERIAL ECONOMY IS GAINED by keeping the generators fully loaded and a safeguard is secured in case of emergency.

Bulletins illustrating the application of Chloride Accumulators to Electric Railways mailed upon request.

MAY 17TH

WILL BE PRESS DAY FOR THE FIRST SPECIAL NUMBER OF THE WESTERN ELECTRICIAN, COVERING THE NIAGARA FALLS MEETING OF THE NATIONAL ELECTRIC LIGHT ASSOCIATION.

COPY FOR ADVERTISEMENTS CANNOT BE RECEIVED AFTER MAY 16th, AND SHOULD BE FORWARDED MUCH EARLIER TO SECURE THE BEST ATTENTION AND GOOD LOCATION. IT IS NOT TOO EARLY NOW TO FORWARD COPY.

THIS SPECIAL INTERNATIONAL NUMBER, BESIDES CIRCULATING THE WORLD OVER, WILL BE MUCH IN EVIDENCE AT THE CONVENTION ITSELF AND AT THE PAN-AMERICAN EXPOSITION, AND WILL CONTAIN MANY SPECIAL FEATURES INTERESTING TO THE DELEGATES AND VISITORS TO THE CONVENTION AND TO THE PAN-AMERICAN EXPOSITION.

MAY 24TH

WILL BE PRESS DAY FOR OUR SPECIAL CONVENTION REPORT NUMBER (COPY RECEIVED UP TO MAY 23d), IN WHICH WILL APPEAR A FULL REPORT OF THE NIAGARA MEETING, INCLUDING A FULL ACCOUNT OF THE PROCEEDINGS, NEWS AND GOSSIP OF THE CONVENTION, NAMES OF THE NEW OFFICERS, AND OF THE DELEGATES AND OTHERS ATTENDING THE MEETING, AND EVERYTHING OF VALUE AND INTEREST RELATING TO THIS NOTABLE GATHERING OF LEADING ELECTRIC LIGHT AND POWER MEN.

BOTH OF THESE NUMBERS WILL BE ILLUSTRATED IN THE WESTERN ELECTRICIAN'S BEST STYLE, AND UNDOUBTEDLY THEY WILL BE THE MOST VALUABLE AND WIDELY CIRCULATED ELECTRIC LIGHT AND POWER NUMBERS ISSUED BY ANY JOURNAL DURING THE ENTIRE YEAR.

BENEFIT YOUR BUSINESS BY PLACING A LIBERAL ADVERTISING ANNOUNCEMENT IN BOTH OF THESE

SPECIAL INTERNATIONAL NUMBERS.

HELIOS-UPTON STORAGE BATTERIES

FOR STREET RAILWAYS, POWER AND LIGHTING PLANTS, FOR ELECTRICAL VEHICLES, TELEGRAPH, TELEPHONE AND ELECTRIC ELEVATORS.

BATTERY SUPPLIES AND REPAIRS. We make very low prices for repairs of batteries manufactured by the Electric Storage Battery Company. Send us dimensions of plates required and the number and we will make you a quotation that will save you money. We will guarantee that our plates can be used with better results in installations of the Electric Storage Battery Co. than the plates of their own manufacture. To sustain our claims we refer you to the Kansas City Electric Light Company, who have a large installation, manufactured and installed by this Company.

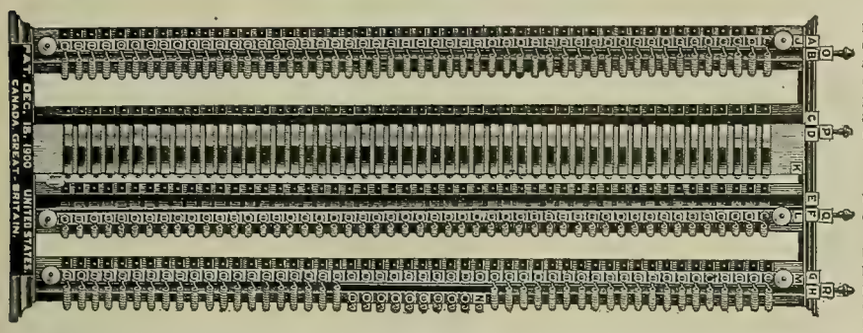
TELEPHONE PROPERTY IS AT LAST MADE SAFE.



On the 18th day of December 1900, the United States Government granted a patent to the undersigned which, in the opinion of every practical man who has examined it, is the safest, surest and most complete protection to electrical apparatus, and more especially to telephone switchboards and telephone property generally, that has ever been attempted. This patent is known as an "ELECTRIC SWITCH," patent No. 664,061, and has recently been patented in foreign countries.

WHAT THE INVENTION ACTUALLY ACCOMPLISHES.

First: Instead of the universal annoying disadvantage of the uncertain contact of the old style screw and washer, a certain safe and sure contact is secured.

Second: All practical men realize that no lightning arresters nor diverters of high pressure currents give perfect immunity from damage and destruction to switchboards and telephone property; this device makes all such property as safe as any other property. Under the old style, the tedious labor, and the long time required to disconnect the conductors, made it practically impossible to do so, and for these reasons failed absolutely to avert serious loss. The damage in nine cases out of ten had been sustained before the switchboards could possibly be disconnected. With this switch one thousand subscribers can be easily disconnected within ten seconds, and every conductor grounded, making the telephone property as well as the building perfectly secure. Another strong feature of the invention is that every conductor can be as quickly connected as disconnected, requiring no loss of time whatsoever. The switch is as readily attached to metallic circuits as to common returns, and ground and wire.

Fourth: The very strongest feature of this important invention, and the one of paramount importance to all telephone property holders, is the quick and sure means to shield telephone property positively and without doubt from the storm, and to obviate terrific damage and often absolute destruction, for however appalling the storm, and however distressing the anxiety and the solicitude for the exchange, the most obtuse and inexperienced operator can instantly disconnect and ground every conductor of the exchange. Again, we care not what voltage from arc circuits or from trolley lines are poured into the exchange, this switch diverts the currents to earth, and all is safe. This fact being true, it is worth many times more than its cost for the quietude and peace of mind it affords. Surely, from a business and commercial standpoint, no exchange can afford to be without this safeguard to valuable property.

For testimonials, further particulars and explanation of cut, address

The Search for Work

This is an age of specialists. The man who can do something better than anyone else is always sure of remunerative employment. He doesn't search for work; employers search for him. We teach the theory of engineering and the trades to men and women already at work. We qualify young people to support themselves while learning. Write for free circular

Salaried Positions for Learners

We also teach by mail Mechanical, Steam, Electrical, Civil and Mining Engineering; Shop and Foundry Practice; Mechanical Drawing; Architecture; Architectural Drawing; Plumbing, Heating and Ventilation; Sheet Metal Work; Telephony; Telegraphy; Chemistry; Ornamental Design; Lettering; Bookkeeping; Stenography; Teaching; English Branches; Locomotive Running (for engineers and firemen only); Electrotherapeutics (for physicians and nurses only). When writing state subject in which interested.

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. **By CLARK CARYL HASKINS.** Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.

Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.

The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text book for schools and colleges.

FOR ENGINEERS, DYNAMO MEN, FIREMEN, LINEMEN, WIREMEN AND LEARNERS. FOR STUDY OR REFERENCE.

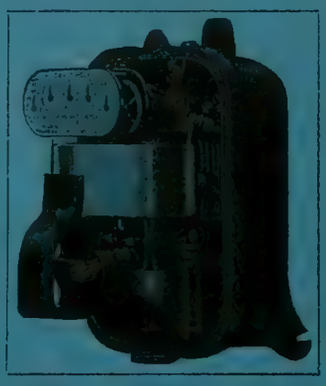
SOMETHING NEW

Our TYPE K Integrating Wattmeter

Weighs less than 13 pounds and can be installed in a space 6¾ inches by 8¾ inches.

SOME INTERESTING POINTS.



This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.
It can be quickly Adjusted for Either HIGH OR LOW FREQUENCY.
No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.
CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.
ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

Write for Bulletin 1012.

MAIN OFFICE AND FACTORY

FORT WAYNE, - - - - INDIANA.

THE PEMCO FUSE ROSETTE

Has large, heavy contacts between cap and base, which have a knife-like action, making a solid, broad and long electrical connection that is so strong that it is impossible to pull cap from base. Send your jobber a sample order. Price, 13 cents; lots of 250, 10%.

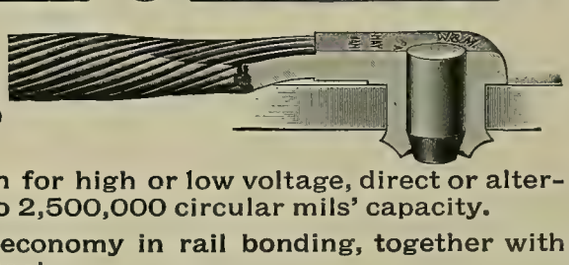
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

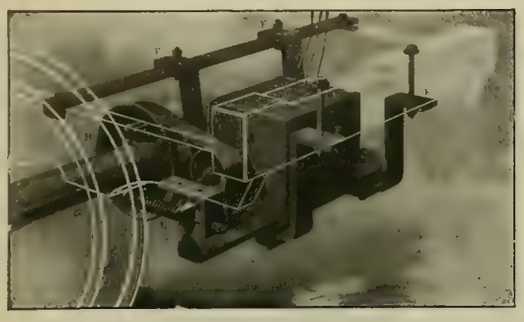
THE CONSOLIDATED "AXLE LIGHT" SYSTEM

OF

ELECTRIC LIGHTS AND FANS

FOR ALL KINDS OF

RAILWAY PASSENGER CARS.



Dynamo Operated from the Car Axle.

Electricity generated from the car axle while the car is in motion and supplied automatically from a storage battery when the car is stationary.

Each car carries its own electric lighting and ventilating apparatus, being entirely independent of all other cars and of any distant stationary plant.

Electric lights and fans keep a car bright and cool and avoid all discomfort from heat, smoke and glare, and all danger from fire or explosions where gas or oil lamps are used.

The "Axle Light" equipment is automatic and self-regulating in its operation, and, therefore, its cost of maintenance is insignificant when compared with the expense incurred by railway companies using gas or oil lamps in passenger cars.

SEND FOR ILLUSTRATED CATALOGUE.

Edison and Westinghouse Base.

GENERAL ELECTRIC COMPANY,

HARRISON, N. J.

Northern Spherical Motor. Inclosed Type.

Northern Motors

are of such compact and symmetrical design that they are easily operated in any situation for any kind of work. They can be belted, geared or direct-connected to the driven machine. Our Engineering Corps has made an exhaustive study of the various wood and metal working machines in use by manufacturers for the purpose of determining the best methods of electric drive, and we have the results of years of patient investigation carefully compiled for the benefit of our customers. We have made some of the largest installations for complete electric drive in America and challenge a comparison of economical results.

We build all sizes of Generators and Motors for either Alternating or Direct Current. Ask for Bulletin No. 240.

The R. E.-A. I. Monitor Bell.
(Patented.)

Hammer rod supported in two places and thrown straight out and in by the armature, striking gong on inside, near edge, thus giving a full, clear tone.

All springs made of Phosphor Bronze and so formed that there is least possible strain.

Contacts are platinized, adjustment is made by pressure on the standard which supports one contact. No screws or nuts being used in the adjustment, bell does not get out of order by operation.

Ordinarily the weak point is the pivot, the unreliable one the adjusting screw and nut. As these defects have been eliminated, this bell will stand hard usage and operate under adverse conditions.

The hammer entirely concealed by gong and cannot be tampered with.

It is especially adapted for use on street cars, as, in addition to the advantages mentioned, it is dust, insect and moisture proof.

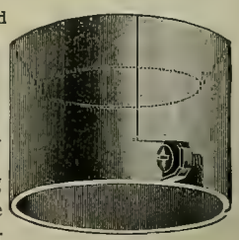
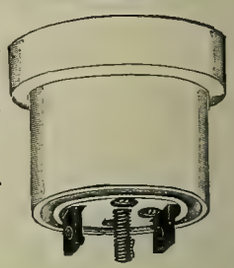
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

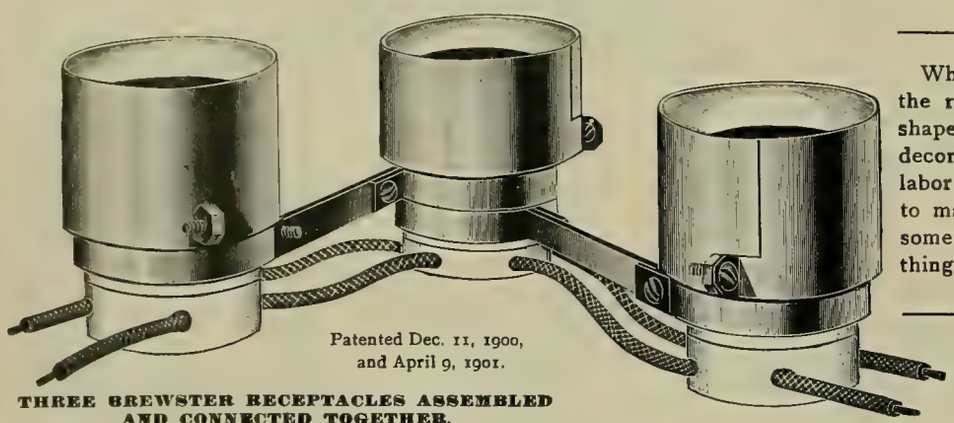
From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.





When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.



Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.

Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

Mention this paper.

One Customer Writes:

"We have used this torch to displace the common gasoline torches for all kinds of line work.

"The old style torch was never satisfactory for line work, and especially if there was any wind blowing, but with this torch we find that we can handle No. 6 and No. 4 wire out of doors very nicely, and in some cases much more convenient than with a slush pot and furnace; the wind seems to have but very little effect upon it.

"I am very sure that it is only necessary to get this torch introduced to make it a fast seller, especially to any that will appreciate a torch that will work when they want it to."

Technical Education by Mail

The American School of Correspondence offers instruction in Engineering Courses under a staff of instructors trained in the best technical schools of the country. It is chartered under the educational laws of Massachusetts. It is located in Boston, the home of three of the foremost technical schools of the land. It is not intended to take the place of a residence school, but to enable that class of ambitious people who have no opportunity to attend a residence school to pursue—under the guidance of able instructors—studies during their leisure moments which they feel to be of value in their daily lives. To introduce the high standard of instruction the Trustees have voted to award a limited number of

Free Scholarships
In Electrical Mechanical and Steam Engineering

Including a Thorough Course in Mechanical Drawing

This offer also affords an excellent opportunity for individual and private instruction in Mathematics, the Natural Sciences and Mechanical Drawing. Prospectus on request.

AMERICAN SCHOOL OF CORRESPONDENCE
Boston, Mass., U. S. A.

Our Students Succeed

Our instruction helps students to better positions and higher salaries. This is what a student says:

A Lineman Benefited.

My course has been a benefit to me in many ways. When I enrolled, I was working as a lineman. Owing to the excellence of your instruction, I was advanced to the position of dynamo tender, and then to trimmer, with an increase in wages. I am now getting practical experience in handling machinery and winding armatures. I shall always be a good friend of the schools.

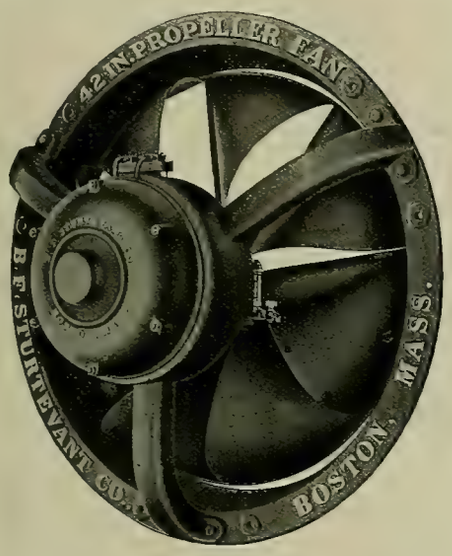
STURTEVANT
ELECTRIC PROPELLER FANS



MANUFACTURED IN ALL SIZES FROM

18-inch to 120-inch

In small and medium sizes the motor is of the bipolar type, entirely enclosed and dust-proof, designed for the specific purpose of driving the proper size of fan

The fan blades are so formed as to pick up the air at the inlet edge at low velocity, to move it forward in an axial direction, and when well under the influence of the blade to discharge it at maximum velocity. As a natural result, the efficiency is very high. The wheel is partially enclosed within a conoidal inlet ring which decreases the frictional resistance.

CAPACITIES FROM

2,000

TO

175,000

cubic feet per minute

Large fans are usually equipped with motors of the eight-pole pattern, supported upon an independent pedestal.

All motors are of the same high grade as our regular commercial machines. The entire equipment is in each case designed and built within our own works.

PRACTICAL ELECTRICITY

PRICE, $2.00 PREPAID.

287 Pages. 427 Questions and Answers. 95 Illustrations. 20 Tables (all that's required) Size, 6x4¼ inches. Flexible Binding. Set in a good, readable size type.

IS a ***SCHOOL*** for the beginner and a ***VALUABLE REFERENCE*** for the Electrical Engineer. If you are willing to study carefully the nineteen chapters, and work out correctly the answers to the 427 questions yourself, and only refer to answers given in back of book to verify your own answers, you (whether you are the college student, the ambitious young man, the stationary engineer, the motorman, or anyone else whom the study of electricity would benefit) will have a knowledge of electricity which you could not acquire from any other source for ten times the cost of this little book.

Table of Subjects.

Chapter.
I—Wiring.
II—Electric Batteries, Electric Plating.
III—Magnetism.
IV—The Magnetic Circuit.
V—Magnetic Traction.
VI—Magnetic Leakage.
VII—Energy in Electric Circuit.
VIII—Calculation of Size of Wire for Magnetizing Coils.
IX—Calculation of EMF's in Electric Machines.
X—Counter EMF.
XI—Hysteresis and Eddy Currents.
XII—Armature Reaction.
XIII—Sparking.
XIV—Winding of Dynamos and Motors.
XV—Proper Method of Connecting Dynamos and Motors—Self Excitation.
XVI—Diseases of Dynamos and Motors, Their Symptoms and How to Cure Them.
XVII—Arc and Incandescent Lamps.
XVIII—Measuring Instruments.
XIX—Alternating Current.

ELECTRICIAN PUBLISHING CO., 510 Marquette Bldg., Chicago.

ELECTRICITY MADE SIMPLE.

233 Pages. 108 Illustrations. **By CLARK CARYL HASKINS.** Cloth $1.00. Paper .50.

A BOOK DEVOID OF TECHNICALITIES—SIMPLE, PLAIN AND UNDERSTANDABLE.

There are many elementary books about electricity upon the market, but this is the first one presenting the matter in such shape that the layman may understand it, and, at the same time, not written in a childish manner.

This little work is not intended for the instruction of experts, nor as a guide for professors. The author has endeavored to bring the matter down to the level of those whose opportunities for gaining information on the branches treated have been limited.

Four chapters are devoted to Static Electricity; three each to Chemical Batteries and Light and Power; two each to Terrestrial Magnetism and Electro-Magnetism; one each to Atmospheric Electricity; Lightning Rods; Electro-Chemistry; Applied Electro-Magnetism; Force, Work and Energy; Practical Application of Ohm's Law; also a chapter upon Methods of Developing Electricity, other than Chemical.

The large number of examples that are given to illustrate the practical application of elementary principles is gaining for it a reputation as a text-book for schools and colleges.

FOR ENGINEERS, DYNAMO MEN, FIREMEN, LINEMEN, WIREMEN AND LEARNERS. FOR STUDY OR REFERENCE.

ELECTRICIAN PUBLISHING CO., 510 MARQUETTE BLDG., CHICAGO.

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

Northern Spherical Multipolar Motor Inclosed Type.

Northern Motors

are of such compact and symmetrical design that they are easily operated in any situation, for any kind of work.

They can be belted, geared or direct-connected to the driven machine. They are suited for work in many places where it would be difficult if not impossible to operate other motors. The construction of the bearings is such that the motors can be operated either in a horizontal, vertical or inverted position.

Our engineering corps has made an exhaustive study of the various wood and metal working machines in use by mills, shops and factories, for the purpose of determining the best methods of electric drive. We have the results of years of patient investigation carefully compiled for the benefit of our customers. We have made some of the largest installations for complete electric drive in America and challenge a comparison of economical results.

We build all sizes of Generators and Motors for either Alternating or Direct Current. Ask for Bulletin No. 240.

The Search for Work

This is an age of specialists. The man who can do something better than anyone else is always sure of remunerative employment. He doesn't search for work; employers search for him. We teach the theory of engineering and the trades to men and women already at work. We qualify young people to support themselves while learning. Write for free circular

Salaried Positions for Learners

We also teach by mail Mechanical, Steam, Electrical, Civil and Mining Engineering; Shop and Foundry Practice; Mechanical Drawing; Architecture; Architectural Drawing; Plumbing, Heating and Ventilation; Sheet Metal Work; Telephony; Telegraphy; Chemistry; Ornamental Design; Lettering; Bookkeeping; Stenography; Teaching; English Branches; Locomotive Running (for engineers and firemen only); Electrotherapeutics (for physicians and nurses only). When writing state subject in which interested.

Bargain Offerings.

WE ARE THE BARGAIN MACHINERY HOUSE OF AMERICA.

When in the market for anything in the way of Boilers, Engines, Pumps or Machinery of any kind, be sure to write for our list.

WE OFFER THE FOLLOWING ITEMS SUBJECT TO PRIOR SALE:

E1—One 400-light T.-H. dynamo.
E2—One 500-light T.-H. dynamo.
E3—One 600-light T.-H. dynamo.
E4—One 50-light U. S. dynamo.
E5—One 12-light Excelsior dynamo.
E6—One 50-light Westinghouse arc dynamo.
E7—One 65-light Brush arc dynamo.
E8—One 45-light Schuyler arc dynamo.
E9—One 30-light Schuyler arc dynamo.
E10—One 50 K. W., 1000-light, 1000-volt Westinghouse generator.
E11—One 60 K. W., 1200-light Slattery generator.
E12—Two 50 K. W., 1000-light, 1000-volt Westinghouse generators.
E13—One 4 H. P. electric motor.
E14—One Pillsbury 3 H. P. motor.
E15—One electric elevator hoist, manufactured by the Union Elevator & Machine Co., complete with all attachments.
E16—One electric motor, direct-connected to drum for elevator; manufactured by the Keystone Electric Co. Cost originally, $1,400. Will sell at sacrifice.
E17—One 80 K. W. U. S. Westinghouse generator.

BOILERS.

Three 60x18 horizontal tubular boilers.
Two 66x16 horizontal tubular boilers.
One 72x18 horizontal tubular boilers.
Three 54x16 horizontal tubular boilers.

ENGINES.

Two 250 H. P., high-duty Atlas, rope-driven.
One pair Williams, 250 H. P. each.
One 22x60 Rankin-Fitch Corliss.
One 12x34 Putnam.
One 13x34 Fitchburg.
One 20x30 slide valve.
One 18x28 Nicols-Burr.
One 22¾x36 Wright Corliss.
One 13¼x22½x15 cross-compound Armington & Simms.
One 15x17 Ideal.
One 15x16 Ball.
One 13x12 Ball.

ENGINES—Continued.

One 12x12 Armington & Simms.
One pair twin engines, 15x22.
One 20x40 automatic, with Nordburg governor.
One McEwen compound.
One Payne compound.
One 10x20x20 Rice automatic.
One 14x20 Atlas slide valve.
One 12x20 Atlas slide valve.
One 11x16 Atlas slide valve.
One 12x24 automatic.
One 12x24 slide valve.
Ten Tifft engines, 9x12.
Ten Tifft engines, 8x12 (reversible).
One 10x18 Buckeye.
One 11x16 Russel automatic.
One 8x14 Taylor-Beck.
Six 10x22 plain slide valve.
One 9x14 slide valve.
One 10x18 vertical.
One 9x9 vertical Racine.
One 9x15x9 Westinghouse.
One 13x22x13 Westinghouse.
One 14x24x14 Westinghouse.
Two 12x20x12.
One 10x18x10.
One 6½x6.
One 11x10 Standard.
One 10x9.
One 12x11.

MISCELLANEOUS.

Five hundred arc lamps.
One hundred and seventy-five electric meters.
Fifty-five assorted transformers.
Weather-proof wire, all sizes.
Rubber-covered wire, all sizes.
Twenty-five thousand Edison incandescent lamps, 104 volts.
Seven hundred and fifty telephones, in good condition, used a short time. Price, each, $5.50.
Two hundred rolls short lap leather belting, all widths, single and double thick.
Shafting, hangers, pulleys, couplings, boxes, etc.

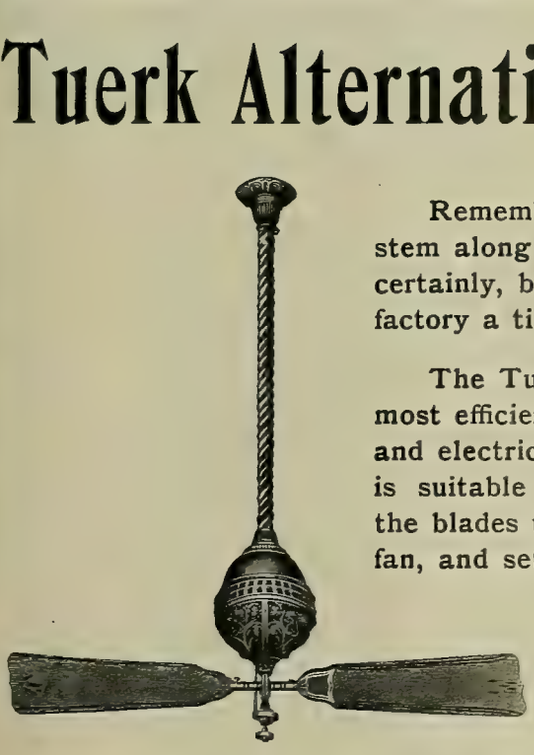
Tuerk Alternating Current Ceiling Fan.



Remember the watch that you had to wind up by running the stem along a board? Had fewer working parts than a Waltham, certainly, but took lots of spring to make it go. Hardly so satisfactory a timepiece, was it?

The Tuerk Fan is comparable to the high-grade watch. It is most efficient in operation, and gives no trouble. It is mechanically and electrically perfect, light in weight, and exceedingly durable. It is suitable for circuits of all frequencies and voltages, and while the blades used are of greater width and sweep than on any other fan, and set at a sharper pitch, the consumption of current is but 100 watts at full speed—175 r. p. m. on 40, 50 and 60 cycle circuits, 152 r. p. m. on other frequencies up to 140 cycles.

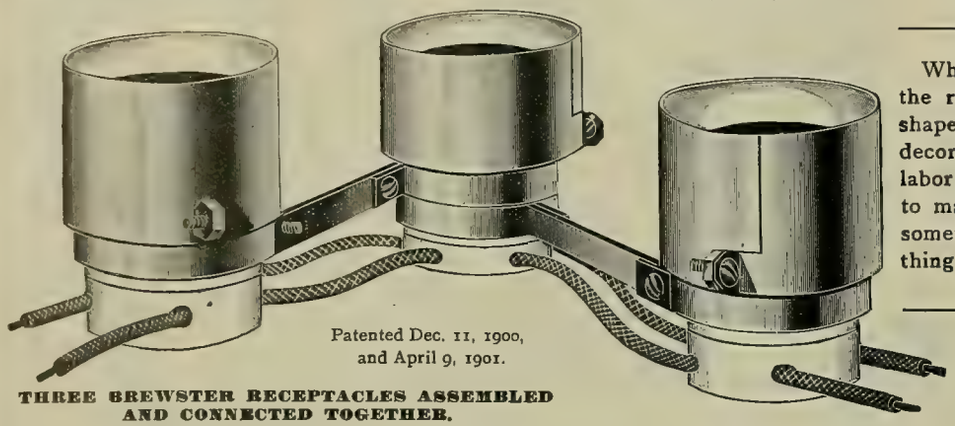
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

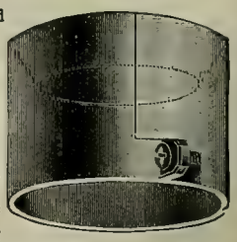
From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.

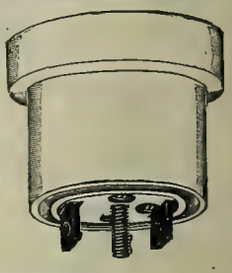


Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.



When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.



Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

LA CROSSE, WIS.

A NEW TORCH FOR LINEMEN.

PRICE, $6.00 NET.

ONE CUSTOMER WRITES:

"We have used this torch to displace the common gasoline torches for all kinds of line work.

"The old style torch was never satisfactory for line work, and especially if there was any wind blowing, but with this torch we find that we can handle No. 6 and No. 4 wire out of doors very nicely, and in some cases much more convenient than with a slush pot and furnace; the wind seems to have but very little effect upon it.

"I am very sure that it is only necessary to get this torch introduced to make it a fast seller, especially to any that will appreciate a torch that will work when they want it to."

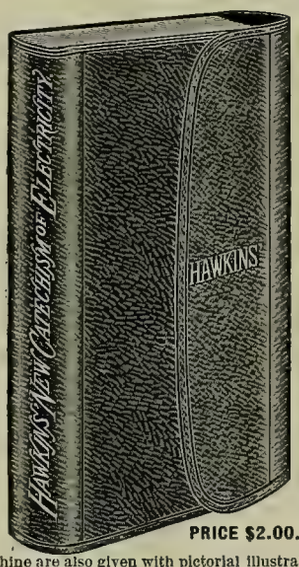
JOSEPH DIXON CRUCIBLE CO., - JERSEY CITY, N. J.

HAWKINS' NEW CATECHISM OF ELECTRICITY.

Plan of the Work, Contents, Etc.



PRICE $2.00.

The New Catechism of Electricity will be found to be surprisingly plain, and free from useless and ambiguous terms. The plan upon which it is arranged is unique.

The book is, first of all, intended to be plain and instructive: some 300 illustrations have been introduced, so that the mere pictures will afford almost a knowledge of the subjects.

It is a school book from the manner in which it proceeds from the simple facts to the abstract principles which the facts indicate; it is also a book of reference through the index of seventeen double columns of fine type pages; by means of this index a thousand items of practical importance are at once available.

It is an up-to date work, which has cost a large outlay of capital and time, and, in short, it is doubtful if any more attractive book has ever been issued—or one more useful.

The subjects treated upon are as follows: Dedication to Thomas A. Edison, with engraving of Mr. Edison; Preface and Introduction; Nature and Source of Electricity and Magnetism.

The Dynamo; Conductors and Non-Conductors; Symbols, abbreviations and definitions relating to electricity; Parts of the Dynamo; The Motor; The Care and Management of the Dynamo and Motor.

Electric Lighting; Wiring; The rules and requirements of the National Board of Underwriters in full; Electrical Measurements.

The Electric Railway; Line Work; Instruction and Cautions for Linemen and the Dynamo Room; Storage Batteries; Care and Management of the Street Car Motor; Electro Plating.

The Telephone and Telegraph; The Electric Elevator; Accidents and Emergencies, etc., etc.

The full one-third part of the whole work has been devoted to the explanation and illustrations of the dynamo, and particular directions relating to its care and management;—all the directions are given in the simplest and most kindly way to assist rather than confuse the learner. The names of the various parts of the machine are also given with pictorial illustrations of the same.

In the Catechism no less than 25 full page illustrations have been given of the various dynamo machines made in different parts of the country, and an equal number of part page illustrations.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

We buy and Refine Platinum Scrap also.

Grimshaw.

Raven White Core.

Raven Black Core.

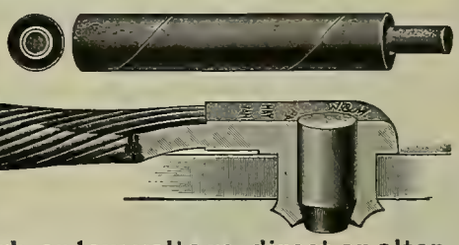
ALL OUR WIRES pass inspection and carry the above TRADE-MARKS on our tags. We also manufacture Grimshaw and Competition Tapes and Splicing Compounds.

NEW YORK INSULATED WIRE COMPANY,

MAIN OFFICE: 13-17 Cortlandt St., New York.

BRANCHES: CHICAGO: 320 Dearborn St. BOSTON: 134 Congress St. SAN FRANCISCO: 71 Flood Building.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

American Steel and Wire Co., Chicago, Ill.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."

Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

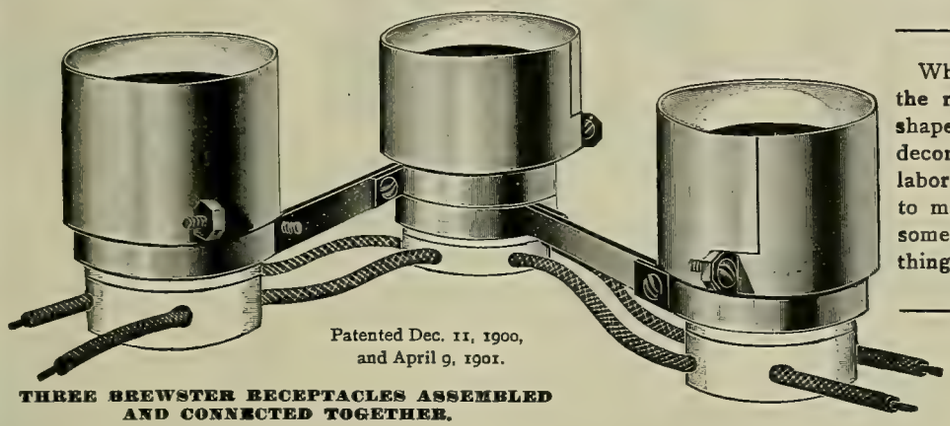
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

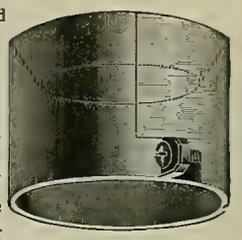
ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.

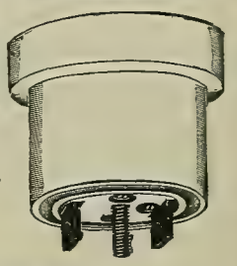


Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.

When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.





Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

SIGNALPHONE MFG. CO.,
MILWAUKEE, WIS., U. S. A.

DID YOU EVER NOTICE

That every manufacturer of Telephone Apparatus claims that his is the Best ? The word has lost its significance when used in connection with Telephone Switchboards. . . . . Instead of making claims, we prefer to have you investigate our altogether novel multiple Switchboard system, compare it with ANY other, and draw your own conclusions. . . . . .

SEND FOR A COPY OF OUR NEW CATALOGUE.

Our Students Succeed

Our instruction helps students to better positions and higher salaries. This is what a student says:

A Lineman Benefited.

My course has been a benefit to me in many ways. When I enrolled, I was working as a lineman. Owing to the excellence of your instruction, I was advanced to the position of dynamo tender, and then to trimmer, with an increase in wages. I am now getting practical experience in handling machinery and winding armatures. I shall always be a good friend of the schools.

FRED W. HOUGHTALING,
Three Rivers, Mich.

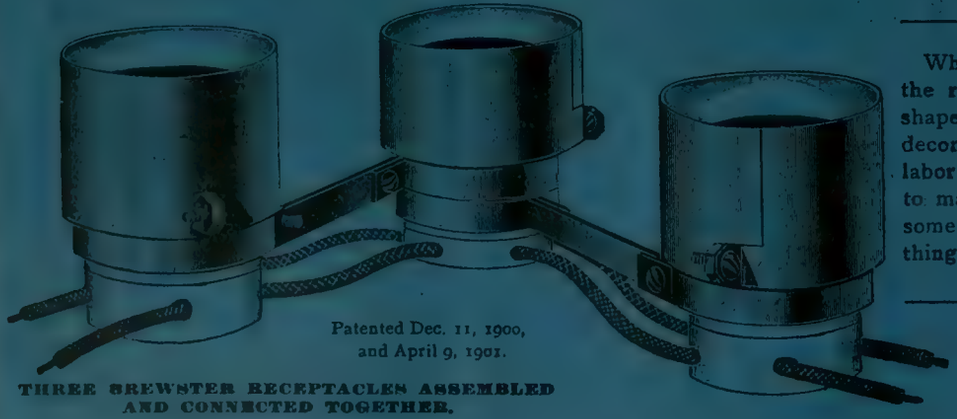
ELIZABETHPORT, N. J.

BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.



Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.

When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.

Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

"THE CONNECTING LINK."

THE ELECTRIC MOTOR AND EQUIPMENT CO.,

SOLE MANUFACTURERS AND SALES AGENTS

12-14 Beaver Street, NEWARK, N. J.

A. D. C. CENTRAL STATION Equipped with "Chloride Accumulators"

MEANS AN UP-TO-DATE LIGHTING PLANT.

By storing the current during the periods of light loads the generating units are operated economically:
By supplying this current during periods of heavy loads the number of generating units required is reduced to a minimum:
By being always available in case of emergency, Chloride Accumulators "*have repeatedly prevented an interruption of service.*"

Send for Descriptive Bulletins describing other advantages.

EDISON TELEPHONE LAMPS

Are the Standard for Visual Signals.

Their value has been verified by more than three years of extended service.

They are preferred because of

Certainty of service of each individual lamp—every lamp being perfect.
Extreme length of life.
Strong and durable mechanical construction.
Thorough uniformity of all lamps, insuring certainty of contact in sockets and freedom from misfit.
Maximum of maintained light for a minimum of power consumption.

Orders for any quantity promptly filled.
All lamps supplied closely rated and carefully selected.

EDISON DECORATIVE AND MINIATURE LAMP DEPT.

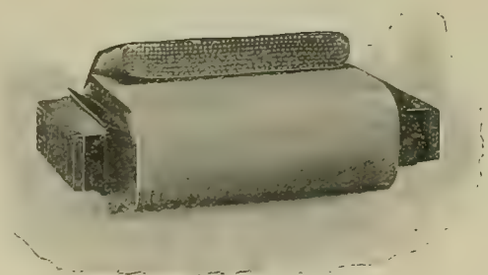
General Electric Company,

Harrison, N. J.

THE GENERAL ELECTRIC COMPANY'S

TYPE H

Oil Transformers



Coils of Type H Transformer.

Have compact form of winding which prevents vibration and presents large radiating surface to the oil. Therefore the insulation is permanent and the temperature rise small.

A careful test will reveal many other excellent qualities.

General Office: Schenectady, N. Y.

Sales Offices in All Large Cities.

Chicago Office, Monadnock Building.

Delegates

—TO THE—

CONVENTION OF THE INDEPENDENT TELEPHONE ASSOCIATION

Take Notice!

We hereby take exception to the statement of wise old King Sol, who said: "There is nothing new under the sun."

We desire to affirm that we have a telephone switchboard that is not only novel in its design and general arrangement, but comprises many features that enable it to be operated more easily and quickly than was ever known in telephone switchboard practice before its introduction.

Be sure to see our representatives and have the system explained to you before you leave Buffalo.

THE UNION SWITCHBOARD COMPANY,

ERIE, PA.

MR. SEYMOUR SWARTS

HEREBY ANNOUNCES THAT HE WILL BE AT THE INDEPENDENT TELEPHONE CONVENTION AT BUFFALO, JUNE 11TH AND 13TH, WITH RESIDENCE AT THE IROQUOIS HOTEL AND IN CONSTANT ATTENDANCE AT THE CONVENTION HALL FOR THE PURPOSE OF

BUYING SCRAP COPPER

MR. SWARTS WILL PAY THE HIGHEST MARKET PRICES FOR OLD COPPER WIRE AND OTHER "ELECTRICAL METAL SCRAP." TELEPHONE MEN WILL FIND IT TO THEIR ADVANTAGE ALWAYS TO KEEP US IN MIND AND COMMUNICATE WITH US WHENEVER THEY HAVE ANY SCRAP "GOING BEGGING."

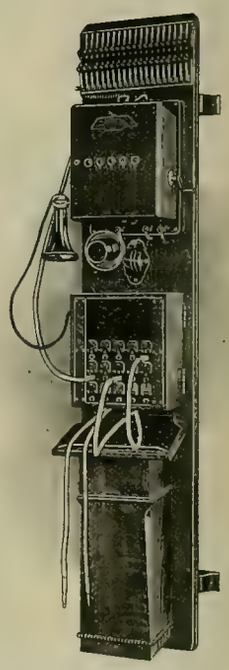
150 Line Magneto Switchboard.

The reader of this advertisement in particular, and the telephone public in general, are cordially invited to visit the Kellogg Pavilion in Section R of the Electricity Building, at the Pan-American Exposition at Buffalo. This is without question the finest pavilion devoted to any electrical exhibit, a fitting housing for what we know to be the most complete and best line of telephone apparatus ever displayed to the public.

Our exhibit adjoins that of the Bell and Western Electric Companies. We invite comparison.

Gentlemen will be in charge to explain the apparatus, to give technical advice and to talk business.



Combination Telephone and Switchboard for Selective Signaling.

Write for Price-list No. 43 for other apparatus.

ILLINOIS MAINTENANCE COMPANY,
E. H. Cheney, Mgr. 204 Dearborn St., Chicago.

FOR SALE.

One battery, seven boilers, horizontal tubular shell 72 inches diameter by 18 feet long, containing 72 tubes 4 inches diameter each. The shell is $\frac{3}{8}$-inch steel with longitudinal seam, butt jointed, double riveted. The heads are $\frac{9}{16}$ inch steel, well stayed. The boiler has a manhole in front head and a manhole on top. The bottom at the back is reinforced on top with 2-inch blowout.

Murphy patented smokeless furnace; grate area 6 feet x 6½ feet, with front, and with automatic stoker and magazine 6 feet x 2½ x 1¼ feet; grate bars, shaking pattern and ash-pit doors complete. Castings for setting and tie rods, and buck staves with boiler. Each boiler has a 6-inch pipe for connecting to a steam main equipped with a Pratt & Cady globe valve, also blowoff valves and Ashton pot safety valve and Reliance water column.

With battery is a 4-inch main with branches for cooling grates with exhaust steam, with all fittings complete; also blowoff and feed-water mains on back of boilers. The valves of the branches of the feed-water mains may be operated on front of boilers by means of rods. Battery has two double duplicate stoker engines, one at each end, with all connections complete for operating stokers.

The entire battery is in first-class order and has the equipment for running condition, including smoke breeching. They were built by the Variety Iron Works in 1892, and have been worked with as much as 125 pounds' steam pressure.

THE IDEAL WAY TO HEAT MAGNETS

Is by using the Stewart Gas Blast Furnace, which obviates all danger of improper heating.

With this furnace you take no chances, and you cannot go wrong. Thousands of magnets are ruined by being heated in the open fire. More pieces can be heated in one day with one of our furnaces, and heated right, than can be heated by the old method in three days. Don't blame your steel man if your magnets aren't good; the fault is in the heating.

The price of furnace illustrated here is $85.00. It was especially designed for heating magnets, tools, dies, punches, etc. We make several sizes, and send our furnaces on thirty days' trial.

XXXIV. —Automatic Exchanges. XXXV. — Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

ELECTRICIAN PUBLISHING CO.,
510 MARQUETTE BUILDING, CHICAGO.

Important Telephone Books.

THE TELEPHONE HANDBOOK. By Herbert Laws Webb. 16mo, 150 pp. Price $1.00.
This handbook is a complete treatise on telephony, and a practical book on telephone working and management, based entirely on standard American practice. It is extremely useful to telephone inspectors and operators.

PATENTED TELEPHONY. A Review of the Patents Pertaining to Telephones and Telephonic Apparatus. Published by the American Electrical Engineering Association. Cloth bound; fully illustrated. Price $1.50.

THE ELECTRIC TELEPHONE. By E. J. Houston, Ph. D., and A. E. Kennelly, Sc. D.; 12mo, cloth, 422 pp., 142 illustrations. Price $1.00.
This book describes the construction of the various forms of transmitting and receiving devices, the signaling mechanisms, and the switchboard apparatus at the central station. It is written by two well-known electricians, and has the merit of being the latest work on the subject.

THE PRACTICAL TELEPHONE HANDBOOK. By Joseph Poole, A. I. E. E. Second edition, revised and enlarged. 360 pp. 288 illustrations. Price $1.50.
In this work the writer has endeavored to produce a manual of moderate size and cost, but thoroughly practical, and detailing, as far as space will allow, the most recent methods of telephone working. While the requirements of telephone employes have been kept constantly in view, it is fully intended also that the book shall be of service as a source of information on telephonic matters to users of the telephone and to the public generally.

TELEPHONE TROUBLES AND HOW TO FIND THEM. A complete handbook for telephone inspectors. By W. Hyde and J. H. McManman, edited by Prof. C. H. Haskins. Sixth edition. 16mo, 50 pp. Price 25 cents.
This little volume is an extremely practical work for telephone employes, written in a popular style and devoid of technicalities.

TELEPHONE LINES AND THEIR PROPERTIES. By Wm. J. Hopkins. Second edition. 272 pp. Illustrated. Price $1.50.

A MANUAL OF TELEPHONY. A new and large edition. By W. H. Preece, F. R. S., and A. J. Stubbs. 508 pages. 333 illustrations. Price $4.50.

HOW TO MAKE AND USE THE TELEPHONE By Geo. H. Cary. The purpose for which this book is written is to furnish information to those who may desire to construct or use telephone apparatus or lines on a small scale. Price $1.00.

TELEPHONES, THEIR CONSTRUCTION AND FITTING. A Practical Manual on the Fitting Up and Maintenance of Telephone and Auxiliary Apparatus. By F. C. Allsop. 191 pp., 168 illustrations. Price $2.00.

TELEPHONE SYSTEMS ON THE CONTINENT OF EUROPE. By Bennett. 436 pages. 169 illustrations. Price $4.50.

TELEPHONING OF GREAT CITIES. By Bennett. Paper. Price 35 cents.

MAGNETO HAND TELEPHONE. Its Construction, Fitting Up and Adaptability to Everyday Use. By Hughes. 80 pages. 23 illustrations. Price $1.00.

BELL'S ELECTRIC SPEAKING TELEPHONE. Its Invention, Construction, Application, Modification and History. By Prescott. New edition, revised and enlarged 795 pages. 516 illustrations. Price $4.00.

PHILIPP REIS, INVENTOR OF THE TELEPHONE A Biographical Sketch with Documentary Testimony. By Thompson. Translation of the original papers of the inventor and contemporary publications. 182 pages. 2 plates and 48 engravings. Price $3.00.

ELECTRICAL TRANSMISSION OF INTELLIGENCE AND OTHER ADVANCED PRIMERS OF ELECTRICITY, treating on the telegraph, telephone, etc. By E. J. Houston. 330 pages. 88 illustrations. Price $1.00.

The Above, or Any Other Electrical Works Published, Sent on Receipt of Price.

A NEW TORCH FOR LINEMEN.

ONE CUSTOMER WRITES:

"We have used this torch to displace the common gasoline torches for all kinds of line work.

"The old style torch was never satisfactory for line work, and especially if there was any wind blowing, but with this torch we find that we can handle No. 6 and No. 4 wire out of doors very nicely, and in some cases much more convenient than with a slush pot and furnace; the wind seems to have but very little effect upon it.

"I am very sure that it is only necessary to get this torch introduced to make it a fast seller, especially to any that will appreciate a torch that will work when they want it to."

PRICE, $6.00 NET.

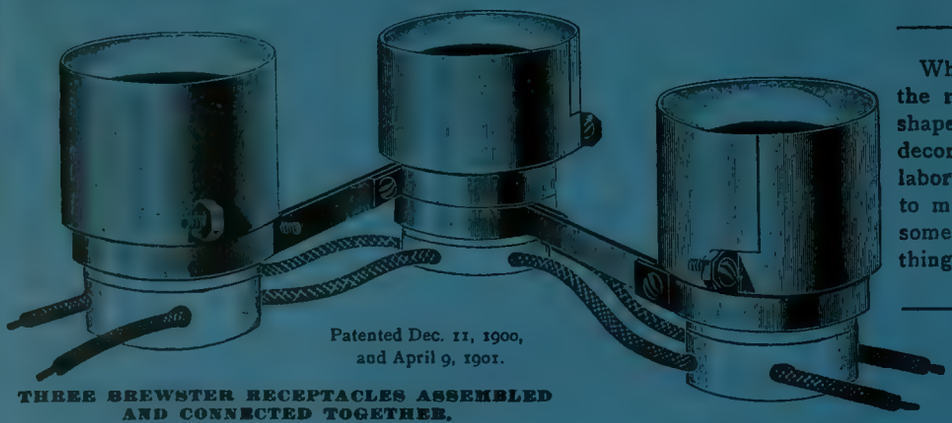
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.



Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.

When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.

Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

A successful lamp manufacturer can not afford to experiment with poor materials. This explains the popularity of

BAKER & CO.'S PLATINUM

408 N. J. R. R. Ave., NEWARK, N. J. 120 LIBERTY ST., NEW YORK.

We buy and Refine Platinum Scrap also.

Crimshaw.

Raven White Core.

Raven Black Core.

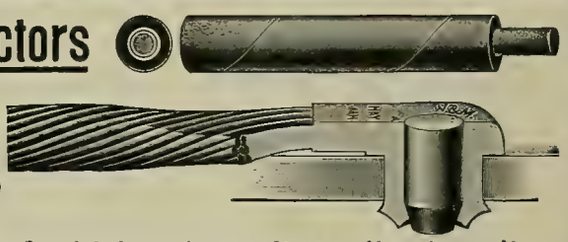
ALL OUR WIRES pass inspection and carry the above TRADE-MARKS on our tags. We also manufacture Crimshaw and Competition Tapes and Splicing Compounds.

NEW YORK INSULATED WIRE COMPANY,

MAIN OFFICE: 13-17 Cortlandt St., New York.

BRANCHES: CHICAGO: 192 Desplaines St. BOSTON: 7 Otis St. SAN FRANCISCO. 33 Second St.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

Bridging Wall Set, with Pay Station.

TO THE READER: The reader of this advertisement in particular and the telephone public in general are cordially invited to visit the Kellogg pavilion in Section R of the Electricity Building at the Pan-American Exposition at Buffalo. This is without question the finest pavilion devoted to any electrical exhibit, a fitting housing for what we know to be the most complete and best line of telephone apparatus ever displayed to the public. Our exhibit adjoins that of the Bell and Western Electric Companies. We invite comparison. Gentlemen will be in charge to explain the apparatus, to give technical advice and to talk business. Very truly,

KELLOGG SWITCHBOARD AND SUPPLY COMPANY.

EDISON TELEPHONE LAMPS

Are the Standard for Visual Signals.

Their value has been verified by more than three years of extended service.

They are preferred because of

Certainty of service of each individual lamp—every lamp being perfect.
Extreme length of life.
Strong and durable mechanical construction.
Thorough uniformity of all lamps, insuring certainty of contact in sockets and freedom from misfit.
Maximum of maintained light for a minimum of power consumption.

Orders for any quantity promptly filled.
All lamps supplied closely rated and carefully selected.

ILLINOIS MAINTENANCE COMPANY,
E. H. Cheney, Mgr. 204 Dearborn St., Chicago.

FOR SALE.

One battery, seven boilers, horizontal tubular shell 72 inches diameter by 18 feet long, containing 72 tubes 4 inches diameter each. The shell is ⅜-inch steel with longitudinal seam, butt jointed, double riveted. The heads are $\frac{9}{16}$ inch steel, well stayed. The boiler has a manhole in front head and a manhole on top. The bottom at the back is reinforced on top with 2-inch blowout.

Murphy patented smokeless furnace; grate area 6 feet x 6½ feet, with front, and with automatic stoker and magazine 6 feet x 2½ x 1⅛ feet; grate bars, shaking pattern and ash-pit doors complete. Castings for setting and tie rods, and buck staves with boiler. Each boiler has a 6-inch pipe for connecting to a steam main equipped with a Pratt & Cady globe valve, also blowoff valves and Ashton pot safety valve and Reliance water column.

With battery is a 4-inch main with branches for cooling grates with exhaust steam, with all fittings complete; also blow-off and feed-water mains on back of boilers. The valves of the branches of the feed-water mains may be operated on front of boilers by means of rods. Battery has two double duplicate stoker engines, one at each end, with all connections complete for operating stokers.

The entire battery is in first-class order and has the equipment for running condition, including smoke breeching. They were built by the Variety Iron Works in 1892, and have been worked with as much as 125 pounds' steam pressure.

CLEVELAND ELECTRIC RAILWAY CO.,

One bracket quill for floor hanger mentioned above.
One clamp iron pulley, 44 in. dia., 8½ in. face for 5⅛ in. shaft.
One clamp iron pulley, 44 in. dia., 5½ in. face for 5⅛ in. shaft.
One clamp iron pulley, 44 in. dia., 5⅛ in. face, 8½ in. bore.
One A 12 T. H. alternating current generator, 125 cycles — 1000 volts — 60 amperes. Wooden base in operative condition.

All the above goods are for immediate delivery and f. o. b. cars Newton or Watertown, Mass.

For delivery about September 15th we have:

One A 120 T. H. alternating current generator. 125 cycles — 1000 volts — 100 amperes compound wound with iron base.
One A 12 T. H. alternating current generator. 125 cycles — 1000 volts — 60 amperes with wooden base.
One 60 K. W. Stanley Transformer step up. 125 cycles, 1000 volts to 2000 volts.
Seven Station switchboard G. E. transformers, 125 cycles, 350 watts, 1040 to 52-104 volts.
One 5 K. W. Exciter T. H. 110 volts.

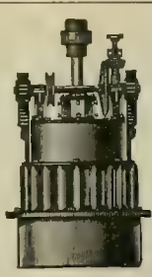
NEWTON, MASS.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.

Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, **as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. The Telephone Company of America

Long Distance, Central Energy System.

The only up-to-date 100 per cent. system, full patent protection.

The only first-class system at a cost admitting of no competition.

The only system that can be supplied to the public at **two cents per call.**

The only system that can be installed in every house, office, mill, shop or other place of business **at two cents per call and insure shareholders a handsome profit on their investment.**

The aim of the Telephone Company of America is to place a telephone in every house and place of business and to limit the charge for its use to two cents per call, the same as for sending a letter.

Installation on this plan admits of no competition.

By this system the telephone service will be increased to twenty times its present volume, its value to investors will be many times greater than that of any other system, while the cost of service to the public will be only two cents per call, or one-third the lowest present rates.

The central office and station telephone apparatus are of the highest excellence in quality and appearance.

For particulars write or call at the office of

THE TELEPHONE COMPANY OF AMERICA

719-721 Thirteenth Street N. W., WASHINGTON, D. C.

Our Feed Water Heaters

Use exhaust steam and supply boilers with **PURE HOT WATER** and prevent the solid matter from going into the boilers, saving from 10 to 25 per cent. of your fuel bills. Our latest design is made entirely of **CAST IRON,** designed for use where water contains acid salt or other impurities which put or corrode wrought iron or steel. We also build

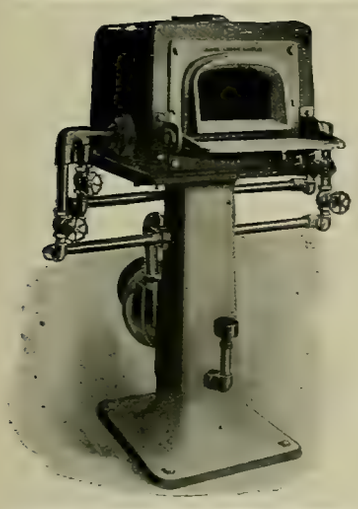
257 Lehman St., DAYTON, OHIO, U. S. A.



THE IDEAL WAY TO HEAT MAGNETS

Is by using the Stewart Gas Blast Furnace, which obviates all danger of improper heating.

With this furnace you take no chances, and you cannot go wrong. Thousands of magnets are ruined by being heated in the open fire. More pieces can be heated in one day with one of our furnaces, and heated right, than can be heated by the old method in three days. Don't blame your steel man if your magnets aren't good; the fault is in the heating.

The price of furnace illustrated here is $85.00. It was especially designed for heating magnets, tools, dies, punches, etc. We make several sizes, and send our furnaces on thirty days' trial.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket: Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

Our Students Succeed

Our instruction helps students to better positions and higher salaries. This is what a student says:

A Lineman Benefited.

My course has been a benefit to me in many ways. When I enrolled, I was working as a lineman. Owing to the excellence of your instruction, I was advanced to the position of dynamo tender, and then to trimmer, with an increase in wages. I am now getting practical experience in handling machinery and winding armatures. I shall always be a good friend of the schools.

SUMMER HOMES.

In the Lake Country of Northern Illinois, Wisconsin, Minnesota and the Upper Peninsula of Michigan, on the line of the Chicago, Milwaukee & St Paul Railway, are hundreds of most charming summer resorts. Among the list are: Fox Lake, Delavan Lake, Lake Geneva, The Lauderdale Lakes, Waukesha, Oconomowoc, Palmyra, The Dells at Kilbourn, Elkhart Lake, and Madison, Minocqua, Star Lake, Frontenac, White Bear, Minnetonka, Marquette, Spirit Lake, Okoboji, Big Stone Lake, etc, etc.

For illustated booklets "Summer Homes for 1901" and "In the Lake Country," send address, with six cents in postage, to F. A. Miller, General Passenger Agent, Chicago, Milwaukee & St. Paul Railway, Chicago, Ill.

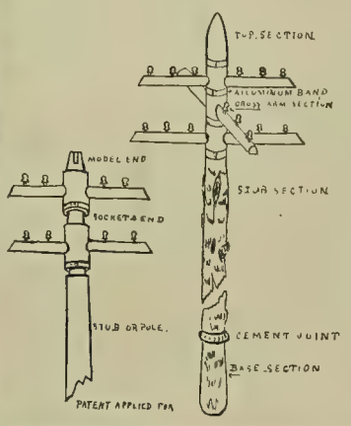
WEATHERPROOF SECTIONAL POLES,

TOPS AND BASES.

LARGE, LIGHT, DURABLE AND CHEAP.



Made of the very best wood, heavily coated with compound. No iron bolts, spikes or lags. Arms and pins secured with wooden plugs and compound. Any pole can be built on by placing another section on top; sections fit together with compound to secure and solidify. Each section is a socket; each socket is strengthened with an aluminum band. All sections complete; any length arms; base sections receive extra heavy coat of compound; all sections have model ends to fit sockets.

Any stub you can secure locally will look well fitted with sectional tops. Sectional poles will last a lifetime and always look well and newly painted. For particulars address

THE GORDON BATTERY CO.,

13 and 15 Laight Street, New York.

A NEW TORCH FOR LINEMEN.

ONE CUSTOMER WRITES:

"We have used this torch to displace the common gasoline torches for all kinds of line work.

"The old style torch was never satisfactory for line work, and especially if there was any wind blowing, but with this torch we find that we can handle No. 6 and No. 4 wire out of doors very nicely, and in some cases much more convenient than with a slush pot and furnace; the wind seems to have but very little effect upon it.

"I am very sure that it is only necessary to get this torch introduced to make it a fast seller, especially to any that will appreciate a torch that will work when they want it to."

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

WESTERN ELECTRIC COMPANY

CHICAGO. ST. LOUIS. PHILADELPHIA. NEW YORK.

AMERICAN ELECTRIC COMPANY, St. Paul, Minn.

CALIFORNIA ELECTRICAL WORKS, San Francisco, Cal.

STANDARD ELECTRIC COMPANY, Cincinnati, Ohio.

KILBOURNE & CLARK COMPANY, Seattle, Wash.

ANTWERP. LONDON. PARIS.

A MONEY SAVER.

8-CANDLEPOWER CONVEX. (Cut full size.)

LOWATT

INCANDESCENT LAMPS

Has complete metal reflector entirely within the bulb, directly behind a multi-coiled carbon filament.

An 8-candlepower lamp does the work of an ordinary 32-c. p. lamp.

You Can Figure How Much You Save.

Concave type concentrates the light; especially desirable for show windows, signs, etc.; too concentrated for general use unless frosted.

Convex type diffuses the light and increases its power and intensity; gives better satisfaction for general use.

Side type designed for locations where sockets are at right angles to the object to be lighted.

8-CANDLEPOWER CONCAVE. (Cut full size.)

PRICES, DESCRIPTIVE MATTER, ETC., ON APPLICATION.

ILLINOIS MAINTENANCE COMPANY,
E. H. Cheney, Mgr. 204 Dearborn St., Chicago.

FOR SALE.

One battery, seven boilers, horizontal tubular shell 72 inches diameter by 18 feet long, containing 72 tubes 4 inches diameter each. The shell is 3/8-inch steel with longitudinal seam, butt jointed, double riveted. The heads are 5/16 inch steel, well stayed. The boiler has a manhole in front head and a manhole on top. The bottom at the back is reinforced on top with 2-inch blowout.

Murphy patented smokeless furnace; grate area 6 feet x 6½ feet, with front, and with automatic stoker and magazine 6 feet x 2½ x 1⅛ feet; grate bars, shaking pattern and ash-pit doors complete. Castings for setting and tie rods, and buck staves with boiler. Each boiler has a 6-inch pipe for connecting to a steam main equipped with a Pratt & Cady globe valve, also blowoff valves and Ashton pot safety valve and Reliance water column.

With battery is a 4-inch main with branches for cooling grates with exhaust steam, with all fittings complete; also blow-off and feed-water mains on back of boilers. The valves of the branches of the feed-water mains may be operated on front of boilers by means of rods. Battery has two double duplicate stoker engines, one at each end, with all connections complete for operating stokers.

The entire battery is in first-class order and has the equipment for running condition, including smoke breeching. They were built by the Variety Iron Works in 1892, and have been worked with as much as 125 pounds' steam pressure.

Material will be placed on board cars free of charge to the purchaser.

MODERN ELECTRIC RAILWAY MOTORS.

BY GEO. T. HANCHETT, M. E.

FIRST PRACTICAL WORK ON RAILWAY MOTORS.

CONTENTS.—Chapter I.—Forms of Field Magnets. II. Armature Winding Diagrams. III.—Field Coil Construction and Arrangement. IV.—Armature Construction. V.—Commutator and Brush Holder Construction. VI.—Motor Casings. VII.—Motor Suspensions. VIII.—Bearings and Gears. IX.—Lubrication. X. General Dimensions and Data. XI.—Management and Repair. XII.—Railway Motor Design.

200 Pages. 157 Illustrations and Table. Price $2.00.

THIS is a book unique in its treatment of electric railway equipment. The first ten chapters are devoted to minute description of the details of electric railway motors that are in use to-day. Each organ of an electric railway motor is taken up in turn, described and illustrated by examples of present and past practice, and its operation explained in the light of practical experience. In short, the review of current practice is of such a nature as to bring out the reason why the electric railway motor is built as it is to-day. For example, field magnets of different types of motors are illustrated and compared, and their features of merit and faults pointed out. Armatures, armature windings, brush holders, suspensions and other details are similarly treated, each detail, however minute, being exhaustively considered. The last two chapters are devoted, one to the management and repair of electric railway motors, and the other to railway motor design, a complete design being worked out as an example. A table gives authoritative data of all types of railway motors in common use, both in America and Europe. **Sent postpaid on receipt of price.**

Technical Education by Mail

The American School of Correspondence offers instruction in Engineering Courses under a staff of instructors trained in the best technical schools of the country. It is chartered under the educational laws of Massachusetts. It is located in Boston, the home of three of the foremost technical schools of the land. It is not intended to take the place of a residence school, but to enable that class of ambitious people who have no opportunity to attend a residence school to pursue—under the guidance of able instructors—studies during their leisure moments which they feel to be of value in their daily lives. To introduce the high standard of instruction the Trustees have voted to award a limited number of

Free Scholarships

In Electrical, Mechanical and Steam Engineering

Including a Thorough Course in Mechanical Drawing

This offer also affords an excellent opportunity for individual and private instruction in Mathematics, the Natural Sciences and Mechanical Drawing. Prospectus on request.

The Telephone Company of America

Long Distance, Central Energy System.

The only up-to-date 100 per cent. system, full patent protection.

The only first-class system at a cost admitting of no competition.

The only system that can be supplied to the public at **two cents per call.**

The only system that can be installed in every house, office, mill, shop or other place of business **at two cents per call and insure shareholders a handsome profit on their investment.**

The aim of the Telephone Company of America is to place a telephone in every house and place of business and to limit the charge for its use to two cents per call, the same as for sending a letter.

Installation on this plan admits of no competition.

By this system the telephone service will be increased to twenty times its present volume, its value to investors will be many times greater than that of any other system, while the cost of service to the public will be only two cents per call, or one-third the lowest present rates.

The central office and station telephone apparatus are of the highest excellence in quality and appearance.

For particulars write or call at the office of

THE TELEPHONE COMPANY OF AMERICA
719-721 Thirteenth Street N. W., WASHINGTON, D. C.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.

CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.

CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated. Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator; Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

STURTEVANT ELECTRIC FANS
ARE SPECIALLY DESIGNED.

Our immense variety in styles and sizes of Electric Motors makes it possible for us to construct high or low pressure electric fans in great diversity to meet any possible conditions.
Motors are built of enclosed or open types, according to the amount of dust and moisture in surrounding atmosphere.

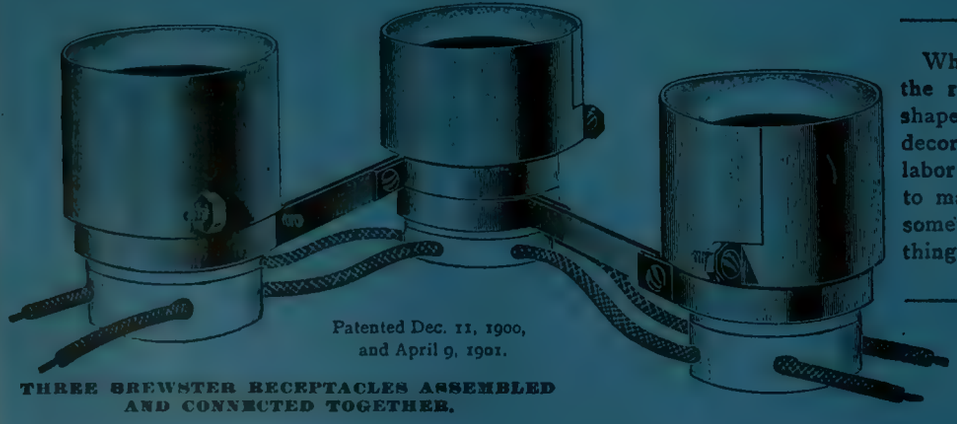
BREWSTER UNIVERSAL SIGN RECEPTACLES.

A SYSTEM OF UNITS

From which may quickly be formed, wired and installed anything in the shape of thoroughly weatherproof

ELECTRIC SIGNS or ELECTRICAL DECORATIONS of any style or variety.

When through using the receptacles in the shape of one sign or decoration, a very little labor only is necessary to make them up into something else—something entirely different.



Patented Dec. 11, 1900, and April 9, 1901.

THREE BREWSTER RECEPTACLES ASSEMBLED AND CONNECTED TOGETHER.

Illustrating method of use and simplicity of means by which a perfectly rigid, yet readily adjustable, construction in any form or design desired is provided.

Just the thing for theaters, or for merchants who want to keep abreast of the times by electrical advertising and yet require variety.

PARTS OF THE UNIT READY TO ASSEMBLE.

"THE CONNECTING LINK."

THE ELECTRIC MOTOR AND EQUIPMENT CO.,

SOLE MANUFACTURERS AND SALES AGENTS. 12-14 Beaver Street, NEWARK, N. J.

An INCANDESCENT LAMP represents a large investment of capital, ingenuity and skilled workmanship, it is sold at a price so low as to necessitate eternal vigilance in cutting costs to a minimum. A successful lamp manufacturer can not afford to experiment with poor materials. This explains the popularity of

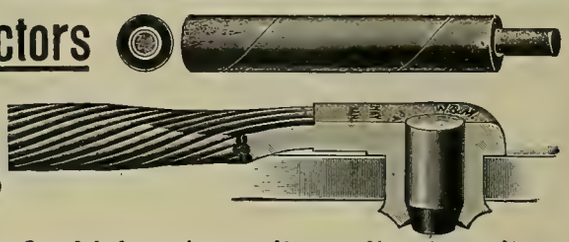
"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

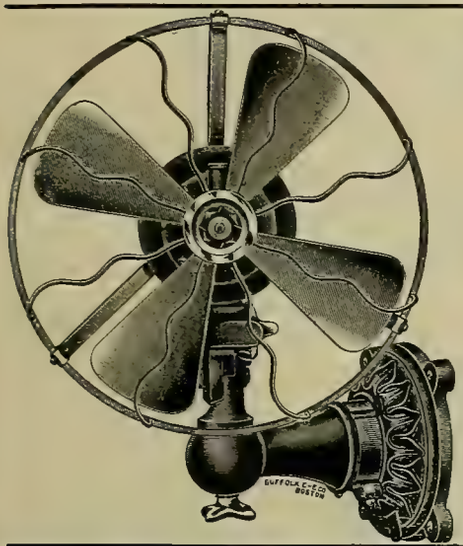
The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."

Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.



THERE WILL BE

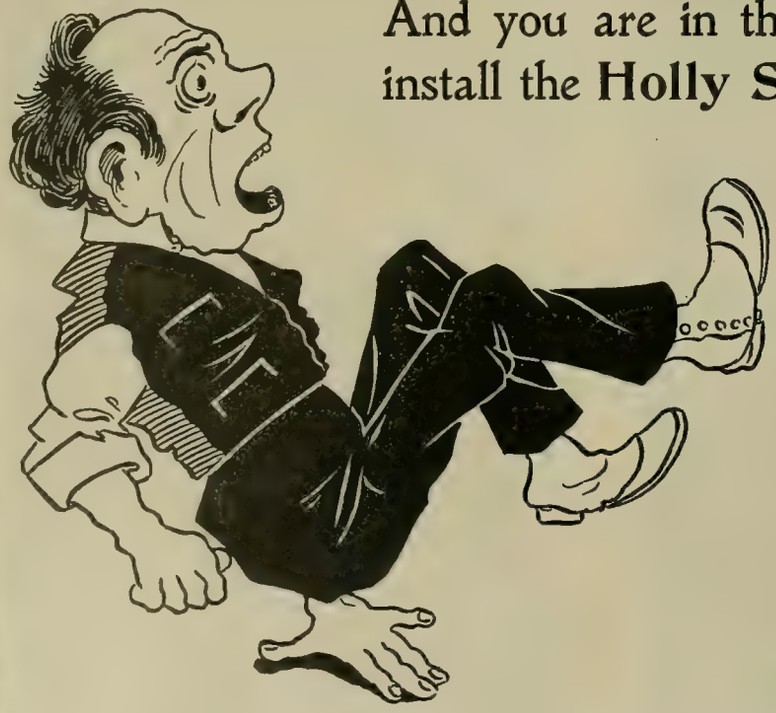
DON'T WAIT UNTIL THE CRASH COMES



And you are in the hands of the Sheriff, but install the **Holly System of Underground Steam Mains** at once, which will enable you to sell your exhaust steam for enough to pay all your station expenses and interest on the investment for steam mains, thus securing your electric current free. It is cheaper than waterpower.

WRITE FOR OUR NEW PAMPHLET GIVING FULL EXPLANATIONS. MENTION WESTERN ELECTRICIAN.

AMERICAN DISTRICT STEAM CO., LOCKPORT, N. Y.

SCALE=SCALE=SCALE=SCALE=SCALE

It does not do you any good to overlook your boilers and because there are some 3,000 ideas on the market which have been tried and have failed, is no sign it cannot be removed and kept out. There is no money, knowledge or Laboratories back of these 3,000 patent medicines.

Try a little Chemistry and Laboratory direction and see the saving in coal, boilers, etc. WRITE US.

Northern Spherical Motor. Inclosed Type.

Northern Motors

are of such compact and symmetrical design that they are easily operated in any situation for any kind of work. They can be belted, geared or direct-connected to the driven machine. Our Engineering Corps has made an exhaustive study of the various wood and metal working machines in use by manufacturers for the purpose of determining the best methods of electric drive, and we have the results of years of patient investigation carefully compiled for the benefit of our customers. We have made some of the largest installations for complete electric drive in America and challenge a comparison of economical results.

We build all sizes of Generators and Motors for either Alternating or Direct Current. Ask for Bulletin No. 240.

WANTED.

Practical office man, lately with a large electric company as traveling auditor, desires to connect himself with an electric light or street railroad company. If desired will systematize your accounts so that monthly reports will show actual results of operation. Highest references as to ability, etc. Address "C. A.," care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Three 1000-light second-hand Brush arc machines and two second-hand large high-tension alternators. Address "D. G. C.," care Western Electrician, 510 Marquette Building, Chicago.

WANTED.

Position as electrician or assistant engineer by young man of good habits. Understands all kinds of wiring and line work. Five years' experience. Can furnish good references from former employers. FRANK McCULLOUGH, 634 Hitt St., Ottawa, Ill.

WANTED.

Position as superintendent or foreman of construction. Twenty years' experience in handling men. Outside construction only—building of lines, etc. Salary about $80 to begin with. Electric lighting preferred. High or low tension, transformers, block system, 3-phase, etc. Three years with Commonwealth Electric Co. Good references. H. F. BIERWIRTH, 679 Clifton Ave., Chicago.

FOR SALE OR TRADE.

Electric light plant in town of 3,000 inhabitants, county site. Have city contract for streets; business growing and splendid opportunity for someone; have compact steam plant, one arc machine and 35 K. W. alternating machine. Price, $9,000. Address "BUSINESS," care Western Electrician, 510 Marquette Building, Chicago.

FOR SALE.

Telephone plant in good shape, in a good town and one of the best telephone fields in the state. Address "TELEPHONE EXCHANGE," care Western Electrician, 510 Marquette Building, Chicago.

FOR SALE.

Alternating system with 550 lights and city contract for pumping water. In good running order. Is owned by bank and must be sold at once. For particulars address N. H. CROWELL, Sioux Rapids, Iowa.

FOR SALE.

Second-hand insulated weatherproof copper wire. No. 6, 14 cents per pound; No. 10, 15 cents per pound.

G. MATHES' SONS COMPANY,
ST. LOUIS, MO.

FOR SALE.

Lot 110-volt new fan motors at bargain prices. Old material purchased. WALSH'S SONS & CO., 280 Washington St., Newark, N. J.

FOR SALE.

Two L. D. 12 T.-H. Arc Machines, 50 lights' capacity.

Ninety-four T.-H. Arc Lamps, class M 12.

Eleven 22-foot "Cutter" Mast arms.

Four Circuit Plug Switchboard, complete.

Wood Cutouts Hoods, Hanger Boards and everything complete for a constant-current, arc-lighting outfit for a small city.

The machines and lamps in first-class condition; in fact, are in operation at the present time. Our object in selling: We wish to go on alternating system. Make us an offer. Address

TITUSVILLE ELECTRIC LIGHT & POWER CO.,
TITUSVILLE, PA.

TO AVOID MOVING TWICE,

We will make especially low prices on the following apparatus for a few days:

One 50 k. w. multipolar, Excelsior, 125-volt Generator, direct-connected to a New York Safety Engine, 12 x 13, practically new.
One 75 k. w. 125-volt multipolar, American Ball Generator, direct-connected to an American Ball Engine, complete with sub-base, used three months.
One 150 h. p. 16 x 15 Phœnix Engine.
One 300 h. p. 14 x 24 x 16 New York Safety Tandem Compound Engine.
One 100 h. p. 13 x 12 Phœnix Engine.
Two 100 k. w. 6-pole, Triumph, 110-volt Generators.
Two 50 k. w. Triumph, multipolar, 110-volt Generators.
Two 50 k. w. Jenney, bipolar, 110-volt Generators.
Two 25 k. w. Jenney, bipolar, 110-volt Generators.
One 250 h. p. Worthington Water-tube Boiler, good for 135 pounds Hartford.
Three 100 h. p., 60 x 18, Phœnix Boiler, good for 95 pounds Hartford.
Write for Price-list No. 43 for other apparatus.

ILLINOIS MAINTENANCE COMPANY,
E. H. Cheney, Mgr. 204 Dearborn St., Chicago.

TREASURY DEPARTMENT, Office, Supervising Architect, Washington, D. C., June 19, 1901. Sealed proposals will be received at this office until 2 o'clock P. M. on the 19th day of July, 1901, and then opened, for the installation of an electric freight elevator, including all labor, materials etc., for the U. S. Mint Building at New Orleans, La., in accordance with the specification, copies of which may be obtained at this office or at the office of the Custodian at New Orleans, La., at the discretion of the Supervising Architect. JAMES KNOX TAYLOR, Supervising Architect.

FOR SALE.

Electric Power Plant.

This plant was installed by the General Electric Company through the Union Iron Works, San Francisco, and was operated but a few months. The machinery is guaranteed in first-class condition, as good as new.

Will name prices f. o. b. Townsend, Montana, or delivered.

One 3-phase alternating-current generator, 500 K. W., 60 cycle with 24 poles, type A. P.; volts full load 2,400, A. M. P. 120, revolutions 300, with rheostat.

One electric generator or exciter, 12½ K. W. multiple direct current exciter, type M. P., class 4-12.5-12.75, volts 125, with rheostat.

One marble generator switchboard panel, 30"x90"x2", containing one general field rheostat, one exciter field rheostat, one station transformer, one potential indicator, one current indicator, one pilot lamp, one ground detector with plug and receptacle, three type L lightning arresters, six feeder fuse blocks, one double pole exciter switch, two single pole switch brake 2,000 volt switches, iron angle frame.

100,000 feet, more or less, No. 2 B. & S. copper wire on reels.

One large lot of electrical fixtures and fittings.

Two Pelton Water Wheels, 350 H. P. each.

The generator is direct connected with two Pelton water wheels, 750 H. P. If to be steam driven, will furnish new outboard bearing, shaft and flexible coupling under plans of General Electric Company.

For full information and prices, apply to
CHAS. E. BILLIN & COMPANY,
1545 Marquette Building, - - CHICAGO.

FOR SALE

(No reasonable offer refused.)

One Armington & Sims Engine, 14 in diameter, 13 in. stroke, with pulleys 66 in. diameter by 15½ in. face.
One Deane Independent Condenser, 12 in. x 16 x 18, 300 H. P.
One piece 5½ in. shafting, 18 ft. 6 in. long, with companion flanges one end.
Three floor hangers, with self oil boxes, for 5½ in shaft, 39 in. drop and adjustable all round.
Three granite capstones for hangers.
Two friction clutch pulleys, 66 in. dia. by 18½ in. face, 36 in. friction with wheel, collar, toggles and shoes complete.
One clamp iron pulley, 66 in dia., 10½ face to clamp on 8½ in. quill.
One bracket quill for floor hanger mentioned above.
One clamp iron pulley, 44 in. dia., 8½ in. face for 5½ in. shaft.
One clamp iron pulley, 44 in. dia., 5½ in. face for 5½ in. shaft.
One clamp iron pulley, 44 in. dia., 5½ in. face, 8½ in. bore.
One A 12 T. H. alternating current generator, 125 cycles — 1000 volts — 60 amperes. Wooden base in operative condition.

All the above goods are for immediate delivery and f. o. b. cars Newton or Watertown, Mass.

For delivery about September 15th we have:

One A 120 T. H. alternating current generator. 125 cycles — 1000 volts — 100 amperes compound wound with iron base.
One A 12 T. H. alternating current generator. 125 cycles — 1000 volts — 60 amperes with wooden base.
One 60 K. W. Stanley Transformer step up. 125 cycles, 1000 volts to 2000 volts.
Seven Station switchboard G. E. transformers, 125 cycles, 350 watts, 1040 to 52-104 volts.
One 5 K. W. Exciter T. H. 110 volts.

Our Students Succeed

Our instruction helps students to better positions and higher salaries. This is what a student says:

A Lineman Benefited.

My course has been a benefit to me in many ways. When I enrolled, I was working as a lineman. Owing to the excellence of your instruction, I was advanced to the position of dynamo tender, and then to trimmer, with an increase in wages. I am now getting practical experience in handling machinery and winding armatures. I shall always be a good friend of the schools.

The Telephone Company of America

Long Distance, Central Energy System.

The only up-to-date 100 per cent. system, full patent protection.

The only first-class system at a cost admitting of no competition.

The only system that can be supplied to the public at **two cents per call.**

The only system that can be installed in every house, office, mill, shop or other place of business **at two cents per call and insure shareholders a handsome profit on their investment.**

The aim of the Telephone Company of America is to place a telephone in every house and place of business and to limit the charge for its use to two cents per call, the same as for sending a letter.

Installation on this plan admits of no competition.

By this system the telephone service will be increased to twenty times its present volume, its value to investors will be many times greater than that of any other system, while the cost of service to the public will be only two cents per call, or one-third the lowest present rates.

The central office and station telephone apparatus are of the highest excellence in quality and appearance.

For particulars write or call at the office of

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.

Especially adapted to all kinds of

ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:

The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

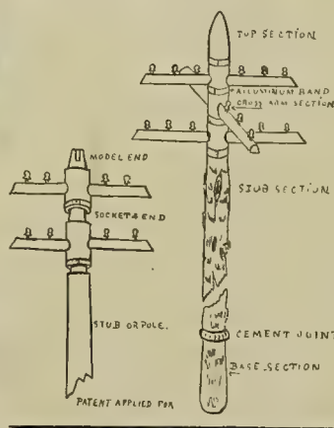
WEATHERPROOF SECTIONAL POLES,

TOPS AND BASES.

LARGE, LIGHT, DURABLE AND CHEAP.



Made of the very best wood, heavily coated with compound. No iron bolts, spikes or lags. Arms and pins secured with wooden plugs and compound. Any pole can be built on by placing another section on top; sections fit together with compound to secure and solidify. Each section is a socket; each socket is strengthened with an aluminum band. All sections complete; any length arms; base sections receive extra heavy coat of compound; all sections have model ends to fit sockets.

Any stub you can secure locally will look well fitted with sectional tops. Sectional poles will last a lifetime and always look well and newly painted. For particulars address
